

Comstock Capital Value Fund

Annual Report — April 30, 2018

To Our Shareholders,

Enclosed are the audited financial statements, including the schedule of investments, as of April 30, 2018, with a description of factors that affected the Fund's performance during the past year. In addition to the Performance Discussion below that outlines the relevant market conditions and investment strategies used by the portfolio managers, we also sent you a general commentary from the portfolio managers regarding the Comstock Capital Value Fund. Both the commentary and the financial statements, including the schedule of investments, will be available on our website at www.gabelli.com/funds.

Performance Discussion (Unaudited)

For the fiscal year ended April 30, 2018, the net asset value ("NAV") per Class A Share of the Comstock Capital Value Fund decreased 10.0% compared with an increase of 14.0% for the Standard & Poor's ("S&P") 500 Index. See page 2 for performance information for all classes of shares.

The Fund seeks to maximize total return, consisting of capital appreciation and current income. The Fund's negative returns over the past year were a reflection of its bearish asset allocation strategy, primarily due to short positions in individual stocks and stock index futures, derivative investments in long options purchased on equity indices, a net investment loss occasioned mostly by dividends and fees on short stock positions, and artificially low interest rates on short term investments. Being short as the major market indices traded near record highs contributed greatly to the overall negative performance.

Your portfolio managers continue to have a bearish stance on the U.S. equity market. The Federal Reserve's ("Fed") balance sheet has grown to nearly \$21 trillion with a monetary policy that has supported the overall market but failed to elevate the economy to a point where market growth is self-sustaining. Major central banks of the world have also provided overly accommodative monetary policies to help stimulate market growth. The portfolio managers of the Fund believe such monetary policy in the U.S. (and also worldwide) distorts the cost of capital and inflates the prices of securities. Several years of zero, or near zero, interest rates have punished savers and forced investors into riskier investments like stocks and bonds. Lower interest rates overvalue the U.S. stock market and artificially inflate financial assets, which increases market risk. This mispricing of capital results in overvaluation of the U.S. stock market. A Fed decision to raise interest rates would drive the U.S. dollar higher and the U.S. stock market lower. A strengthening U.S. dollar reinforces our bearish stance, since it hinders multinational companies from exporting goods abroad. The combination of these factors has created a strong headwind and has proven difficult for the Fund to overcome.

We continue to position our portfolio to benefit our investors in a declining market and will continue to do so until such time that equities are priced more reasonably. We thank you for staying with us through these difficult times.

In the current prospectuses dated August 28, 2017, the expense ratios for Comstock Capital Value Fund Class AAA, A, C, and I Shares are 2.75%, 2.75%, 3.50%, and 2.50%, respectively. Class AAA and Class I Shares have no sales charge. See page 10 for the expense ratios for the year ended April 30, 2018. The maximum sales charge for Class A Shares and C Shares is 5.75% and 1.00%, respectively.

- (a) On April 28, 1987, Comstock Partners, Inc., the Comstock Capital Value Fund's previous investment adviser assumed investment responsibilities and the Fund changed its investment objective to the current investment objective.
- (b) Performance results include the effect of the maximum 5.75% sales charge at the beginning of the period.
- (c) Assuming payment of the 1% maximum contingent deferred sales charge imposed on redemptions made within one year of purchase.
- (d) Since April 30, 1987, the date closest to the Fund's current investment objective inception date for which data is available.
- (e) Since September 30, 1985, the date closest to the Fund's inception date for which data is available.

† Returns represent past performance and do not guarantee future results. Total returns and average annual returns reflect changes in share price, reinvestment of distributions, and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Returns would have been lower had Gabelli Funds, LLC, the Adviser, not reimbursed certain expenses of the Fund for periods prior to October 31, 2002. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days of purchase. Investors should carefully consider the investment objectives, risks, sales charges, and expenses of the Fund before investing. The prospectuses contain information about these and other matters and should be read carefully before investing. To obtain a prospectus please visit our website at www.gabelli.com. The Comstock Capital Value Fund utilizes short selling and derivatives. Short selling of securities and use of derivatives pose special risks and may not be suitable for certain investors. Short selling is a sale of a borrowed security and losses are realized if the price of the security increases between the date the security is sold and the date the Fund replaces it. Derivatives may be riskier than other types of investments because they may respond more to changes in economic conditions than other investments. The S&P 500 Index is a market capitalization weighted index of 500 large capitalization stocks commonly used to represent the U.S. equity market. Dividends are considered reinvested. You cannot invest directly in an index.

†† The Class A Share NAVs are used to calculate performance for the periods prior to the issuance of Class AAA Shares on December 8, 2008, and Class C Shares and Class I Shares on August 22, 1995. The actual performance of the Class C Shares would have been lower and the Class AAA Shares and Class I Shares would have been higher due to the expenses associated with the Class A Shares.

* Effective May 23, 2016, Class R Shares were renamed Class I Shares.

COMPARISON OF CHANGE IN VALUE OF A \$10,000 INVESTMENT IN COMSTOCK CAPITAL VALUE FUND (CLASS A SHARES) AND S&P 500 INDEX (Unaudited)

* Past performance is not predictive of future results. The performance tables and graph do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Comstock Capital Value Fund

Disclosure of Fund Expenses (Unaudited)

For the Six Month Period from November 1, 2017 through April 30, 2018 **Expense Table**

We believe it is important for you to understand the impact of fees and expenses regarding your investment. All mutual funds have operating expenses. As a shareholder of a fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports (like this one), among others. Operating expenses, which are deducted from a fund's gross income, directly reduce the investment return of a fund. When a fund's expenses are expressed as a percentage of its average net assets, this figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period.

The Expense Table below illustrates your Fund's costs in two ways:

Actual Fund Return: This section provides information about actual account values and actual expenses. You may use this section to help you to estimate the actual expenses that you paid over the period after any fee waivers and expense reimbursements. The "Ending Account Value" shown is derived from the Fund's **actual** return during the past six months, and the "Expenses Paid During Period" shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for your Fund under the heading "Expenses Paid During Period" to estimate the expenses you paid during this period.

Hypothetical 5% Return: This section provides information about hypothetical account values and

hypothetical expenses based on the Fund's actual expense ratio. It assumes a hypothetical annualized return of 5% before expenses during the period shown. In this case – because the hypothetical return used is **not** the Fund's actual return – the results do not apply to your investment and you cannot use the hypothetical account value and expense to estimate the actual ending account balance or expenses you paid for the period. This example is useful in making comparisons of the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs such as sales charges (loads), redemption fees, or exchange fees, if any, which are described in the Prospectus. If these costs were applied to your account, your costs would be higher. Therefore, the 5% hypothetical return is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. The "Annualized Expense Ratio" represents the actual expenses for the last six months and may be different from the expense ratio in the Financial Highlights which is for the year ended April 30, 2018.

	Beginning Account Value 11/01/17	Ending Account Value 04/30/18	Annualized Expense Ratio	Expenses Paid During Period*
Comstock Capital Value Fund				
Actual Fund Return				
Class AAA	\$1,000.00	\$ 973.00	3.22%	\$15.75
Class A	\$1,000.00	\$ 971.00	3.41%	\$16.66
Class C	\$1,000.00	\$ 968.90	4.01%	\$19.58
Class I	\$1,000.00	\$ 973.60	3.02%	\$14.78
Hypothetical 5% Return				
Class AAA	\$1,000.00	\$1,008.83	3.22%	\$16.04
Class A	\$1,000.00	\$1,007.88	3.41%	\$16.98
Class C	\$1,000.00	\$1,004.91	4.01%	\$19.93
Class I	\$1,000.00	\$1,009.82	3.02%	\$15.05

* Expenses are equal to the Fund's annualized expense ratio for the last six months multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (181 days), then divided by 365.

Summary of Portfolio Holdings (Unaudited)

The following table presents portfolio holdings as a percent of net assets as of April 30, 2018:

Comstock Capital Value Fund

Long Positions

U.S. Government Obligations	114.6%

Exchange Traded Funds	(0.8)%
Business Services	(0.4)%
Energy	<u>(0.4)%</u>
	<u>100.0%</u>

Short Positions

Consumer Products	(5.7)%
Health Care	(4.6)%
Financial Services	(3.2)%
Real Estate Investment Trusts	(2.9)%
Food and Beverage	(2.9)%
Diversified Industrial	(2.4)%
Retail	(1.6)%

The Fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (the "SEC") for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain this information at www.gabelli.com or by calling the Fund at 800-GABELLI (800-422-3554). The Fund's Form N-Q is available on the SEC's website at www.sec.gov and may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Proxy Voting

The Fund files Form N-PX with its complete proxy voting record for the twelve months ended June 30, no later than August 31 of each year. A description of the Fund's proxy voting policies, procedures, and how the Fund voted proxies relating to portfolio securities is available without charge, upon request, by (i) calling 800-GABELLI (800-422-3554); (ii) writing to The Gabelli Funds at One Corporate Center, Rye, NY 10580-1422; or (iii) visiting the SEC's website at www.sec.gov.

† All per share amounts and net asset values have been adjusted as a result of the 1 for 10 reverse stock split on October 24, 2014. (See note 7).

†† Total return represents aggregate total return of a hypothetical \$1,000 investment at the beginning of the year and sold at the end of the year including reinvestment of distributions and does not reflect the applicable sales charges.

(a) Per share amounts have been calculated using the average shares outstanding method.

(b) Amount represents less than \$0.005 per share.

(c) The Fund incurred interest expense during the years ended April 30, 2018, 2017, and 2016, if interest expense had not been incurred, the ratios of operating expenses to average net assets would have been 2.97%, 2.72%, and 2.90% (Class AAA and Class A), 3.72%, 3.47%, and 3.65% (Class C), and 2.72%, 2.47%, and 2.65% (Class I). For the years ended April 30, 2015 and 2014, the effect of interest expense was minimal.

(d) The Fund incurred dividend expense and service fees on securities sold short. If these expenses and fees had not been incurred, the ratios of operating expenses to average net assets for the years ended April 30, 2018, 2017, 2016, 2015, and 2014 would have been 2.12%, 1.89%, 1.88%, 1.85%, and 1.87% (Class AAA and Class A), 2.87%, 2.64%, 2.63%, 2.60%, and 2.62% (Class C), and 1.87%, 1.64%, 1.63%, 1.60%, and 1.62% (Class I).

(e) The Fund received credits from a designated broker who agreed to pay certain Fund expenses. For the year ended April 30, 2016, if credits had not been received, the expense ratios would have been 2.92%, 2.92%, 3.67%, and 2.67% for Class AAA, Class A, Class C, and Class I, respectively. For the years ended April 30, 2018 and 2017, there was no impact on the expense ratios.

(f) Effective May 23, 2016, Class R Shares were renamed Class I Shares.

See accompanying notes to financial statements.

Comstock Capital Value Fund

Notes to Financial Statements

1. Organization. Comstock Capital Value Fund, a series of the Comstock Funds, Inc. (the “Company”), is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company. The Fund is a diversified portfolio with an investment objective to maximize total return, consisting of capital appreciation and current income.

2. Significant Accounting Policies. As an investment company, the Fund follows the investment company accounting and reporting guidance, which is part of U.S. generally accepted accounting principles (“GAAP”) that may require the use of management estimates and assumptions in the preparation of its financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market’s official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Directors (the “Board”) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the “Adviser”).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt obligations for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price, unless the Board determines such amount does not reflect the securities’ fair value, in which case these securities will be fair value as determined by the Board. Certain securities are valued principally using dealer quotations. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded. OTC futures and options on futures for which market quotations are readily available will be valued by quotations received from a pricing service or, if no quotations are available from a pricing service, by quotations obtained from one or more dealers in the instrument in question by the Adviser.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value American Depositary Receipt securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Board's determinations as to the fair value of investments).

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in the aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of the Fund's investments in securities and other financial instruments by inputs used to value the Fund's investments as of April 30, 2018 is as follows:

	Valuation Inputs		Total Market Value at 4/30/18
	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	
INVESTMENTS IN SECURITIES:			
ASSETS (Market Value):			
Exchange Traded Funds	\$ 1,648,268	—	\$ 1,648,268
U.S. Government Obligations	—	\$23,024,485	23,024,485
TOTAL INVESTMENTS IN SECURITIES – ASSETS	\$ 1,648,268	\$23,024,485	\$24,672,753
LIABILITIES (Market Value):			
Common Stocks Sold Short (a)	\$(5,272,037)	—	\$ (5,272,037)
TOTAL INVESTMENTS IN SECURITIES – LIABILITIES	\$(5,272,037)	—	\$ (5,272,037)
OTHER FINANCIAL INSTRUMENTS:*			
ASSETS (Market Value):			
EQUITY CONTRACTS:			
Exchange Traded Call Options Purchased	\$ 104,000	—	\$ 104,000
Exchange Traded Put Options Purchased	655,265	\$ 151,500	806,765
Assets (Net Unrealized Appreciation):			
EQUITY CONTRACTS:			
Index Futures Contracts - Short Position	229,803	—	229,803
TOTAL OTHER FINANCIAL INSTRUMENTS	\$ 989,068	\$ 151,500	\$ 1,140,568

(a) Please refer to the Schedule of Investments ("SOI") for the industry classifications of these portfolio holdings.

* Other financial instruments are derivatives reflected in the SOI, such as options, futures, forwards, and swaps, which may be valued at the unrealized appreciation/depreciation of the instrument.

The Fund did not have transfers between Level 1 and Level 2 during the year ended April 30, 2018. The Fund's policy is to recognize transfers among Levels as of the beginning of the reporting period.

There were no Level 3 investments held at April 30, 2018 or 2017.

Additional Information to Evaluate Qualitative Information.

General. The Fund uses recognized industry pricing services – approved by the Board and unaffiliated with the Adviser – to value most of its securities, and uses broker quotes provided by market makers of securities not valued by these and other recognized pricing sources. Several different pricing feeds are received to value domestic equity securities, international equity securities, preferred equity securities, and fixed income securities. The data within these feeds are ultimately sourced from major stock exchanges and trading systems where

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

these securities trade. The prices supplied by external sources are checked by obtaining quotations or actual transaction prices from market participants. If a price obtained from the pricing source is deemed unreliable, prices will be sought from another pricing service or from a broker/dealer that trades that security or similar securities.

Fair Valuation. Fair valued securities may be common or preferred equities, warrants, options, rights, or fixed income obligations. Where appropriate, Level 3 securities are those for which market quotations are not available, such as securities not traded for several days, or for which current bids are not available, or which are restricted as to transfer. When fair valuing a security, factors to consider include recent prices of comparable securities that are publicly traded, reliable prices of securities not publicly traded, the use of valuation models, current analyst reports, valuing the income or cash flow of the issuer, or cost if the preceding factors do not apply. The circumstances of Level 3 securities are frequently monitored to determine if fair valuation measures continue to apply.

The Adviser reports quarterly to the Board the results of the application of fair valuation policies and procedures. These may include backtesting the prices realized in subsequent trades of these fair valued securities to fair values previously recognized.

Derivative Financial Instruments. The Fund may engage in various portfolio investment strategies by investing in derivative financial instruments for the purposes of increasing the income of the Fund, hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase, or hedging against a specific transaction with respect to either the currency in which the transaction is denominated or another currency. Investing in certain derivative financial instruments, including participation in the options, futures, or swap markets, entails certain execution, liquidity, hedging, tax, and securities, interest, credit, or currency market risks. Losses may arise if the Adviser's prediction of movements in the direction of the securities, foreign currency, and interest rate markets is inaccurate. Losses may also arise if the counterparty does not perform its duties under a contract, or in the event of default, the Fund may be delayed in or prevented from obtaining payments or other contractual remedies owed to it under derivative contracts. The creditworthiness of the counterparties is closely monitored in order to minimize these risks. Participation in derivative transactions involves investment risks, transaction costs, and potential losses to which the Fund would not be subject absent the use of these strategies. The consequences of these risks, transaction costs, and losses may have a negative impact on the Fund's ability to pay distributions.

Collateral requirements differ by type of derivative. Collateral requirements are set by the broker or exchange clearing house for exchange traded derivatives, while collateral terms are contract specific for derivatives traded over-the-counter. Securities pledged to cover obligations of the Fund under derivative contracts are noted in the Schedule of Investments. Cash collateral, if any, pledged for the same purpose will be reported separately in the Statement of Assets and Liabilities.

The Fund's derivative contracts held at April 30, 2018, are not accounted for as hedging instruments under GAAP and are disclosed in the Schedule of Investments.

Options. The Fund may purchase or write call or put options on securities or indices for the purpose of increasing the income of the Fund. As a writer of put options, the Fund receives a premium at the outset and then bears the risk of unfavorable changes in the price of the financial instrument underlying the option. The

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

Fund would incur a loss if the price of the underlying financial instrument decreases between the date the option is written and the date on which the option is terminated. The Fund would realize a gain, to the extent of the premium, if the price of the financial instrument increases between those dates.

As a purchaser of call options, the Fund pays a premium for the right to buy the underlying security at a specified price. The seller of the call has the obligation to sell the underlying security upon exercise at the exercise price. If the price of the underlying security declines, the Fund would realize a loss upon sale or exercise. If the price of the underlying security increases or stays the same, the Fund would realize a gain upon sale or at expiration date, but only to the extent of the premium paid.

As a purchaser of put options, the Fund pays a premium for the right to sell to the seller of the put option the underlying security at a specified price. The seller of the put has the obligation to purchase the underlying security upon exercise at the exercise price. If the price of the underlying security declines, the Fund would realize a gain upon sale or exercise. If the price of the underlying security increases or stays the same, the Fund would realize a loss upon sale or at expiration date, but only to the extent of the premium paid.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss. If a written put option is exercised, the premium reduces the cost basis of the security. In the case of call options, the exercise prices are referred to as “in-the-money,” “at-the-money,” and “out-of-the-money,” respectively. The Fund may write (a) in-the-money call options when the Adviser expects that the price of the underlying security will remain stable or decline during the option period, (b) at-the-money call options when the Adviser expects that the price of the underlying security will remain stable, decline, or advance moderately during the option period, and (c) out-of-the-money call options when the Adviser expects that the premiums received from writing the call option will be greater than the appreciation in the price of the underlying security above the exercise price. By writing a call option, the Fund limits its opportunity to profit from any increase in the market value of the underlying security above the exercise price of the option. Out-of-the-money, at-the-money, and in-the-money put options (the reverse of call options as to the relation of exercise price to market price) may be utilized in the same market environments that such call options are used in equivalent transactions. Option positions at April 30, 2018 are reflected within the Schedule of Investments.

The Fund’s volume of activity in call and put options purchased during the fiscal year ended April 30, 2018 had average monthly market value of approximately \$187,247 and \$364,439, respectively.

As of April 30, 2018, the value of options purchased that were held with equity risk exposure can be found in the Statement of Assets and Liabilities under Assets, within Investments, at value. For the fiscal year ended April 30, 2018, the effect of options purchased with equity risk exposure can be found in the Statement of Operations, under Net Realized and Unrealized Gain/(Loss) on Investments, Securities Sold Short, and Futures Contracts, within Net realized loss on investments and Net change in unrealized appreciation/depreciation on investments.

Futures Contracts. The Fund may engage in futures contracts for the purpose of hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase. Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the “initial margin.” Subsequent payments

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

("variation margin") are made or received by the Fund each day, depending on the daily fluctuations in the value of the contract, and are included in unrealized appreciation/depreciation on futures contracts. The Fund recognizes a realized gain or loss when the contract is closed.

There are several risks in connection with the use of futures contracts as a hedging instrument. The change in value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in value of the hedged investments. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market. Open positions in futures contracts at April 30, 2018 are reflected within the Schedule of Investments.

The Fund's volume of activity in index futures contracts sold during the fiscal year ended April 30, 2018 had a monthly average notional value of approximately \$13,885,723.

As of April 30, 2018, the equity risk exposure associated with the futures contracts can be found in the Statement of Assets and Liabilities, under Assets, Variation margin receivable. For the fiscal year ended April 30, 2018, the effect of futures contracts with equity risk exposure can be found in the Statement of Operations, under Net Realized and Unrealized Gain/(Loss) on Investments, Securities Sold Short, and Futures Contracts, within Net realized loss on futures contracts and Net change in unrealized appreciation/depreciation on futures contracts.

Securities Sold Short. The Fund enters into short sale transactions. Short selling involves selling securities that may or may not be owned and, at times, borrowing the same securities for delivery to the purchaser, with an obligation to replace such borrowed securities at a later date. The proceeds received from short sales are recorded as liabilities and the Fund records an unrealized gain or loss to the extent of the difference between the proceeds received and the value of an open short position on the day of determination. The Fund records a realized gain or loss when the short position is closed out. By entering into a short sale, the Fund bears the market risk of an unfavorable change in the price of the security sold short. Dividends on short sales are recorded as an expense by the Fund on the ex-dividend date and interest expense is recorded on the accrual basis. The broker retains collateral for the value of the open positions, which is adjusted periodically as the value of the position fluctuates. Securities sold short and details of collateral at April 30, 2018 are reflected within the Schedule of Investments. For the fiscal year ended April 30, 2018, the Fund incurred \$34,951 in service fees related to its investment positions sold short and held by the broker. The amount is included in the Statement of Operations under Expenses, Service fees for securities sold short.

Investments in Other Investment Companies. The Fund may invest, from time to time, in shares of other investment companies (or entities that would be considered investment companies but are excluded from the definition pursuant to certain exceptions under the 1940 Act) (the "Acquired Funds") in accordance with the 1940 Act and related rules. Shareholders in the Fund would bear the pro rata portion of the periodic expenses of the Acquired Funds in addition to the Fund's expenses. For the year ended April 30, 2018, the Fund's pro rata portion of the periodic expenses charged by the Acquired Funds was approximately 2 basis points.

Foreign Currency Translations. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at current exchange rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities, if any, have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/(loss) on investments.

Foreign Securities. The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

Foreign Taxes. The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

Securities Transactions and Investment Income. Securities transactions are accounted for on the trade date with realized gain/(loss) on investments determined by using the identified cost method. Interest income (including amortization of premium and accretion of discount) is recorded on the accrual basis. Premiums and discounts on debt securities are amortized using the effective yield to maturity method. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities that are recorded as soon after the ex-dividend date as the Fund becomes aware of such dividends.

Determination of Net Asset Value and Calculation of Expenses. Certain administrative expenses are common to, and allocated among, various affiliated funds. Such allocations are made on the basis of each fund's average net assets or other criteria directly affecting the expenses as determined by the Adviser pursuant to procedures established by the Board.

In calculating the NAV per share of each class, investment income, realized and unrealized gains and losses, redemption fees, and expenses other than class specific expenses are allocated daily to each class of shares based upon the proportion of net assets of each class at the beginning of each day. Distribution expenses are borne solely by the class incurring the expense.

Custodian Fee Credits and Interest Expense. When cash balances are maintained in the custody account, the Fund receives credits which are used to offset custodian fees. The gross expenses paid under the custody arrangement are included in custodian fees in the Statement of Operations with the corresponding expense offset, if any, shown as "Custodian fee credits." When cash balances are overdrawn, the Fund is charged an overdraft fee equal to 2.00% above the federal funds rate on outstanding balances. This amount, if any, would be included in the Statement of Operations.

Distributions to Shareholders. Distributions to shareholders are recorded on the ex-dividend date. Distributions to shareholders are based on income and capital gains as determined in accordance with federal income tax

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

regulations, which may differ from income and capital gains as determined under GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, and timing differences. These book/tax differences are either temporary or permanent in nature. To the extent these differences are permanent, adjustments are made to the appropriate capital accounts in the period when the differences arise. Permanent differences were primarily due to the current year write-off of the net operating loss, and expiration of capital loss carryforwards. These reclassifications have no impact on the NAV of the Fund. For the fiscal year ended April 30, 2018, reclassifications were made to decrease accumulated net investment loss by \$622,116 and decrease accumulated net realized loss on investments, securities sold short, and futures contracts by \$12,032,216, with an offsetting adjustment to paid-in capital.

No distributions were made during the years ended April 30, 2018 and 2017.

Provision for Income Taxes. The Fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). It is the policy of the Fund to comply with the requirements of the Code applicable to regulated investment companies and to distribute substantially all of its net investment company taxable income and net capital gains. Therefore, no provision for federal income taxes is required.

As of April 30, 2018, the components of accumulated earnings/losses on a tax basis were as follows:

Accumulated capital loss carryforwards	\$(166,969,280)
Net unrealized appreciation	664,343
Qualified late year loss deferral*	<u>(1,030,643)</u>
Total	<u>\$(167,335,580)</u>

* Under the current law, qualified late year losses realized after December 31 through year end for late year ordinary losses and after October 31 through year end for Post-October losses may be elected as occurring on the first day of the following year. For the year ended April 30, 2018, the Fund elected to defer \$122,505, \$514,894, and \$393,244 of late year ordinary losses, post-October short term capital losses, and post-October long term losses, respectively.

At April 30, 2018, the Fund had net capital loss carryforwards for federal income tax purposes which are available to reduce future required distributions of net capital gains to shareholders. The Fund is permitted to carry forward for an unlimited period capital losses incurred in years beginning after December 22, 2010. In addition, these losses must be utilized prior to the losses incurred in pre-enactment taxable years. As a result of the rule, pre-enactment capital loss carryforwards may have an increased likelihood of expiring unused. Additionally, post enactment capital losses that are carried forward will retain their character as either short term or long term capital losses rather than being considered all short term as under previous law.

Capital loss carryforward available through fiscal year 2019	\$ 37,242,276
Short term capital loss carryforward with no expiration	73,073,163
Long term capital loss carryforward with no expiration	<u>56,653,841</u>
Total capital loss carryforwards	<u>\$166,969,280</u>

At April 30, 2018, \$12,025,747 of the capital loss carryforward expired.

At April 30, 2018, the temporary difference between book basis and tax basis net unrealized appreciation/(depreciation) on investments was primarily due to deferral of losses from wash sales, unsettled trades on securities sold short, and mark-to-market adjustments on currency gains and losses.

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

The following summarizes the tax cost of investments, proceeds from short sales, futures transactions, and the related net unrealized appreciation/depreciation at April 30, 2018:

	<u>Cost (Proceeds)</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
Investments and derivative instruments	\$25,754,964	\$ 306,044	\$(477,490)	\$(171,446)
Securities sold short	(6,107,826)	944,561	(108,772)	835,789
		<u>\$1,250,605</u>	<u>\$(586,262)</u>	<u>\$ 664,343</u>

The Fund is required to evaluate tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Fund as tax expense in the Statement of Operations if the tax positions were deemed not to meet the more-likely-than-not threshold. For the fiscal year ended April 30, 2018, the Fund did not incur any income tax, interest, or penalties. As of April 30, 2018, the Adviser has reviewed all open tax years and concluded that there was no impact to the Fund's net assets or results of operations. The Fund's federal and state tax returns for the prior three fiscal years remain open, subject to examination. On an ongoing basis, the Adviser will monitor the Fund's tax positions to determine if adjustments to this conclusion are necessary.

3. Investment Advisory Agreement and Other Transactions. The Fund has entered into an investment advisory agreement (the "Advisory Agreement") with the Adviser which provides that the Fund will pay the Adviser a fee, computed daily and paid monthly, at the annual rate of 1.00% of the value of its average daily net assets. In accordance with the Advisory Agreement, the Adviser provides a continuous investment program for the Fund's portfolio, oversees the administration of all aspects of the Fund's business and affairs, and pays the compensation of all Officers and Directors of the Fund who are affiliated persons of the Adviser.

The Fund pays each Director who is not considered an affiliated person an annual retainer of \$3,000 plus \$1,000 for each Board meeting attended. Each Director is reimbursed by the Fund for any out of pocket expenses incurred in attending meetings. All Board committee members receive \$500 per meeting attended and the Chairman of the Audit Committee and the Lead Director each receives an annual fee of \$1,000. A Director may receive a single meeting fee, allocated among the participating funds, for participation in certain meetings held on behalf of multiple funds. Directors who are directors, trustees, or employees of the Adviser or an affiliated company receive no compensation or expense reimbursement from the Fund.

4. Distribution Plan. The Fund's Board has adopted a distribution plan (the "Plan") for each class of shares, except for Class I Shares, pursuant to Rule 12b-1 under the 1940 Act. Under the Class AAA, Class A, and Class C Share Plans, payments are authorized to G.distributors, LLC (the "Distributor"), an affiliate of the Adviser, at annual rates of 0.25%, 0.25%, and 1.00%, respectively, of the average daily net assets of those classes, the annual limitations under each Plan. Such payments are accrued daily and paid monthly.

5. Portfolio Securities. Purchases and sales of securities during the fiscal year ended April 30, 2018, other than short term securities and U.S. Government Obligations, aggregated \$1,136,665 and \$460,913, respectively.

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

6. Transactions with Affiliates and Other Arrangements. During the fiscal year ended April 30, 2018, the Distributor retained a total of \$6,537 from investors representing commissions (sales charges and underwriting fees) on sales and redemptions of Fund shares.

During the fiscal year ended April 30, 2018, the Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. The amount of such expenses paid through this directed brokerage arrangement during this period was \$1,563.

7. Capital Stock. The Fund offers four classes of shares – Class AAA Shares, Class A Shares, Class C Shares, and Class I Shares. Class AAA and Class I Shares are offered without a sales charge. Class A Shares are subject to a maximum front-end sales charge of 5.75%, and Class C Shares are subject to a 1.00% contingent deferred sales charge for one year after purchase.

The Fund imposes a redemption fee of 2.00% on all classes of shares that are redeemed or exchanged on or before the seventh day after the date of a purchase. The redemption fee is deducted from the proceeds otherwise payable to the redeeming shareholders and is retained by the Fund as an increase in paid-in capital. The redemption fees retained by the Fund during the years ended April 30, 2018 and 2017, if any, can be found in the Statement of Changes in Net Assets under Redemption Fees.

As approved by the Board of Directors, the Fund effected a 1 for 10 reverse stock split on October 24, 2014. The net asset value of each share class increased proportionately at that time.

Transactions in shares of capital stock were as follows:

	<u>Year Ended April 30, 2018</u>	<u>Year Ended April 30, 2017</u>
Class AAA		
Shares sold	208,398	356,446
Shares redeemed	<u>(216,466)</u>	<u>(1,127,187)</u>
Net decrease	<u>(8,068)</u>	<u>(770,741)</u>
Class A		
Shares sold	1,580,873	14,219,116
Shares redeemed	<u>(5,014,658)</u>	<u>(15,144,250)</u>
Net decrease	<u>(3,433,785)</u>	<u>(925,134)</u>
Class C		
Shares sold	177,264	531,076
Shares redeemed	<u>(347,184)</u>	<u>(719,662)</u>
Net decrease	<u>(169,920)</u>	<u>(188,586)</u>
Class I *		
Shares sold	3,721,876	46,659
Shares redeemed	<u>(2,487,851)</u>	<u>(11,040)</u>
Net increase	<u>1,234,025</u>	<u>35,619</u>

* Effective May 23, 2016, Class R Shares were renamed Class I Shares.

Comstock Capital Value Fund

Notes to Financial Statements (Continued)

8. Indemnifications. The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

9. Subsequent Events. Management has evaluated the impact on the Fund of all subsequent events occurring through the date the financial statements were issued and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

Comstock Capital Value Fund

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of
The Comstock Capital Value Fund:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Comstock Capital Value Fund (the “Fund”) (one of the funds constituting Comstock Funds, Inc. (the “Company”)), including the schedule of investments, as of April 30, 2018, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund (one of the funds constituting Comstock Funds, Inc.) at April 30, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of the Company’s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of April 30, 2018, by correspondence with the custodians and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

¹ Address: One Corporate Center, Rye, NY 10580-1422, unless otherwise noted.

² Each Director will hold office for an indefinite term until the earliest of (i) the next meeting of shareholders, if any, called for the purpose of considering the election or re-election of such Director and until the election and qualification of his or her successor, if any, elected at such meeting, or (ii) the date a Director resigns or retires, or a Director is removed by the Board of Directors or shareholders, in accordance with the Company's By-Laws and Articles of Incorporation. For officers, includes time service in prior officer positions with the Fund. Each officer will hold office for an indefinite term until the date he or she resigns or retires or until his or her successor is elected and qualified.

³ "Interested person" of the Company as defined in the 1940 Act. Messrs. Minter and Van der Eb are each considered an "interested person" because of their affiliation with Gabelli Funds, LLC which acts as the Company's investment adviser.

⁴ Address: 2801 Lakeside Drive, Suite 201, Bannockburn, IL 60015.

⁵ This column includes only directorships of companies required to report to the SEC under the Securities Exchange Act of 1934, as amended, i.e., public companies, or other investment companies registered under the 1940 Act.

⁶ Directors who are not interested persons, as defined in the 1940 Act, are considered "Independent" Directors.

⁷ Mr. Adelberg resigned from the Company's Board of Directors on May 9, 2018.

Gabelli/GAMCO Funds and Your Personal Privacy

Who are we?

The Gabelli/GAMCO Funds are investment companies registered with the Securities and Exchange Commission under the Investment Company Act of 1940. We are managed by Gabelli Funds, LLC and GAMCO Asset Management Inc., which are affiliated with GAMCO Investors, Inc. that is a publicly held company with subsidiaries and affiliates that provide investment advisory services for a variety of clients.

What kind of non-public information do we collect about you if you become a fund shareholder?

If you apply to open an account directly with us, you will be giving us some non-public information about yourself. The non-public information we collect about you is:

- *Information you give us on your application form.* This could include your name, address, telephone number, social security number, bank account number, and other information.
- *Information about your transactions with us, any transactions with our affiliates, and transactions with the entities we hire to provide services to you.* This would include information about the shares that you buy or redeem. If we hire someone else to provide services — like a transfer agent — we will also have information about the transactions that you conduct through them.

What information do we disclose and to whom do we disclose it?

We do not disclose any non-public personal information about our customers or former customers to anyone other than our affiliates, our service providers who need to know such information, and as otherwise permitted by law. If you want to find out what the law permits, you can read the privacy rules adopted by the Securities and Exchange Commission. They are in volume 17 of the Code of Federal Regulations, Part 248. The Commission often posts information about its regulations on its website, www.sec.gov.

What do we do to protect your personal information?

We restrict access to non-public personal information about you to the people who need to know that information in order to provide services to you or the fund and to ensure that we are complying with the laws governing the securities business. We maintain physical, electronic, and procedural safeguards to keep your personal information confidential.

Portfolio Management Team Biographies

Charles L. Minter joined Gabelli Funds, LLC in 2000, when the management of the Comstock Funds, Inc. was assumed by Gabelli Funds, LLC. Mr. Minter is currently a Co-Portfolio Manager and Director of the Fund.

Mr. Minter was one of the founders of Comstock Partners, Inc. which was formed in 1986. Prior to forming Comstock Partners, Inc., Mr. Minter worked for Merrill Lynch in Institutional Sales as a Vice President from 1976-1986. Mr. Minter received an MBA degree with distinction from New York University's Graduate School of Business and a BS degree from Florida State University.

Dennis J. DeCore joined Gabelli Funds, LLC in 2014 as Co-Portfolio Manager of the Comstock Funds, Inc. Mr. DeCore has extensive experience in the brokerage business. Prior to joining Gabelli Funds, LLC, he held positions at Merrill Lynch and Nomura Securities. Mr. DeCore received a BS degree in Finance and Economics from Rider University and an MBA degree in Finance from New York University.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.
