Leverage Risk. The use of leverage, which can be described as exposure to changes in price at a ratio greater than the amount of equity invested, through the issuance of preferred shares, magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. The Fund's use of leverage in its investment operations subjects it to substantial risk of loss.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.

The Fund's NAV per share will fluctuate with changes in the market value of the Fund's portfolio securities. Stocks are subject to market, economic, and business risks that cause their prices to fluctuate. Investors acquire shares of the Fund on a securities exchange at market value, which fluctuates according to the dynamics of supply and demand. When Fund shares are sold, they may be worth more or less than their original cost. Consequently, you can lose money by investing in the Fund.

(a) Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. Current performance may be lower or higher than the performance data presented. Visit [www.gabelli.com](#) for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. The Dow Jones Industrial Average is an unmanaged index of 30 large capitalization stocks. The S&P 500 and the Nasdaq Composite Indices are unmanaged indicators of stock market performance. Dividends are considered reinvested except for the Nasdaq Composite Index. You cannot invest directly in an index.

(b) Total returns and average annual returns reflect changes in the NAV per share and reinvestment of distributions at NAV on the ex-dividend date and adjustment for the spin-off and are net of expenses. Since inception return is based on an initial NAV of \$19.06.

(c) Total returns and average annual returns reflect changes in closing market values on the NYSE and reinvestment of distributions and adjustment for the spin-off. Since inception return is based on an initial offering price of \$20.00.
