## ***PROSPECTUS***

*March 1, 2010*

*The Securities and Exchange Commission has not approved or disapproved the shares described in this Prospectus or determined whether this Prospectus is accurate or complete. Any representation to the contrary is a criminal offense.*

## SUMMARY OF THE FUND

### Investment Objective

The Fund seeks to provide capital appreciation.

### Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy and hold Class AAA Shares of the Fund.

	<u>Class AAA Shares</u>
<b>Shareholder Fees</b> (fees paid directly from your investment):	
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price) . . . . .	None
Maximum Deferred Sales Charge (Load) (as a percentage of redemption or offering price, whichever is lower) . . . . .	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (as a percentage of amount invested) . . . . .	None
Redemption Fee (as a percentage of amount redeemed for shares held 7 days or less) payable to the Fund: . . . .	2.00%
Exchange Fee . . . . .	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment):	
Management Fees . . . . .	0.94%
Distribution (Rule 12b-1) Expenses . . . . .	0.25%
Other Expenses . . . . .	<u>0.35%</u>
Total Annual Fund Operating Expenses . . . . .	<u>1.54%</u>

### Expense Example

This example is intended to help you compare the cost of investing in Class AAA Shares of the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$157	\$486	\$839	\$1,834

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 97% of the average value of its portfolio.

### ***Principal Investment Strategies***

Under normal circumstances, the Fund intends to invest primarily in equity securities of companies believed to be likely acquisition targets within 12 to 18 months. The Fund also may engage in arbitrage transactions by investing in the equity securities of companies that are involved in publicly announced mergers, takeovers, tender offers, leveraged buyouts, spin-offs, liquidations, and other corporate reorganizations. When a company agrees to be acquired by another company, its stock price often quickly rises to just below the stated acquisition price. If Gabelli Funds, LLC (the “Adviser”) determines that the acquisition is likely to be consummated on schedule at the stated acquisition price, then the Fund may purchase (if it does not already hold) or increase its investment in the selling company’s securities, offering the Fund the possibility of returns in excess of the return on cash equivalents with a limited risk of excessive loss of capital. At times, the stock of the acquiring company also may be purchased or sold short. The Fund may hold a significant portion of its assets in cash in anticipation of arbitrage opportunities.

The Fund may invest in companies of any size and from time to time may invest primarily in companies with large, medium, or small market capitalizations. The Fund generally invests in securities of U.S. companies, but also may invest its assets in foreign securities, including emerging market securities. The Fund may engage in various portfolio strategies, including using derivatives, to enhance potential gain.

The Fund intends to invest primarily in common stocks, but it may also invest in other securities that the Adviser believes provide opportunities for capital appreciation, such as preferred stocks, warrants, and securities convertible into common stock, including convertible securities which are below investment grade. The Fund may also invest in debt securities, including in debt securities which are below investment grade (“junk bonds”). It is expected that the Fund will engage in active or frequent trading of portfolio securities to achieve its investment objective.

In choosing investments, the Adviser searches for the best values on securities that it believes have the potential to achieve the Fund’s investment objective of capital appreciation. In seeking to identify companies that are likely to be acquisition targets, the Adviser considers, among other things, consolidation trends within particular industries, whether a particular industry or company is undergoing a fundamental change or restructuring, the Adviser’s assessment of the “private market value” of individual companies and the potential for an event or catalyst to occur that enhances a company’s underlying value. The “private market value” of a company is the value that the Adviser believes informed investors would be willing to pay to acquire the entire company. The Adviser seeks to limit excessive risk of capital loss by utilizing various investment strategies, including investing in value oriented equity securities that should trade at a significant discount to the Adviser’s assessment of their private market value.

In evaluating arbitrage opportunities with respect to companies involved in publicly announced mergers or other corporate restructurings, the Adviser seeks to identify investments in companies where the discount from the stated or appraised value of the security significantly overstates the risk of the contingencies involved in completing the transaction, significantly undervalues the securities, assets, or cash to be received by shareholders of the prospective portfolio company as a result of the contemplated transaction, or fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of such contingencies requires unusually broad knowledge and experience on the part of the Adviser which must appraise not only the value of the issuer and its component businesses as well as the assets or securities to be received as a result of the contemplated transaction but also the financial resources and business motivation of the acquirer and the dynamics and business climate when the offer of the proposal is in progress. Since such investments are ordinarily short-term in nature, they will tend to increase the turnover rate of the Fund, thereby increasing

its brokerage and other transaction expenses. The Adviser intends to select investments of the type described, which, in its view, have a reasonable prospect of capital appreciation that is significant in relation to both risks involved and the potential of available alternate investments. The Adviser may sell a security for a variety of reasons, such as when the security is selling in the public market at or near the Adviser's estimate of its private market value or if the catalyst expected to happen fails to materialize.

The Fund is non-diversified which means it can invest in a limited number of issuers.

### ***Principal Risks***

#### ***You May Want to Invest in the Fund if:***

- you are a long-term investor
- you seek both growth of capital and some income
- you believe that the market will favor value over growth stocks over the long term
- you wish to include a value strategy

An investment in the Fund is not guaranteed; you may lose money by investing in the Fund. When you sell your shares of the Fund, they could be worth more or less than what you paid for them.

The principal risks presented by the Fund are:

- **Convertible Securities Risk.** Convertible securities provide higher yields than the underlying common stock, but generally offer lower yields than nonconvertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates and, in addition, fluctuates in relation to the underlying common stock.
- **Credit Quality Risk.** The actual or perceived reduction in the creditworthiness of debt issuers generally will have adverse effects on the values of their debt securities. It is possible that the issuer of a security will not be able to make interest and principal payments when due. Lower rated bonds involve greater risks of default or downgrade and are more volatile than investment-grade securities. Lower rated bonds involve a greater risk of price declines than investment-grade securities due to actual or perceived changes to an issuer's creditworthiness.
- **Derivatives Risk.** The Fund's investment in derivatives may rise or fall more rapidly than other investments. These transactions are subject to changes in the value of the underlying security on which such transactions are based. Even a small investment in derivative securities can have a significant impact on the Fund's exposure to stock market values, interest rates, or currency exchange rates. Derivatives are subject to a number of risks such as liquidity risk, interest rate risk, market risk, credit risk, and portfolio management risk. They also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not correlate well with the underlying asset, rate, or index.
- **Equity Risk.** Stocks and other equity securities generally fluctuate in value more than bonds and may decline in value over short or extended periods. The value of such securities will change based on changes in a company's financial condition and in overall market and economic conditions.
- **Foreign Investing and Emerging Markets Risk.** The value of the Fund's investments in foreign securities may fall due to adverse political, social, and economic developments abroad and decreases in foreign currency values relative to the U.S. dollar. Foreign markets also may be less liquid and more volatile than U.S. markets. These risks are greater generally for investments in emerging market issuers than for issuers in more developed countries.
- **Interest Rate Risk.** When interest rates decline, the value of the Fund's debt securities generally will rise. Conversely, when interest rates rise, the value of the Fund's debt securities generally

declines. The magnitude of the decline will often be greater for longer-term debt securities than shorter-term debt securities.

- **Issuer-Specific Risk.** The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the market as a whole. The Fund could lose all of its investment in a company's securities.
- **Large-Capitalization Risk.** Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Many larger companies also may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.
- **Liquidity Risk.** The risk that certain securities (particularly illiquid securities and restricted securities) may be difficult or impossible to sell at the time and the price that the Adviser would like. This may result in a loss or may be costly to the Fund.
- **Market Risk.** The risk that the securities markets will move down, sometimes rapidly and unpredictably based on overall economic conditions and other factors.
- **Merger Risk.** In general, securities of companies which are the subject of a tender or exchange offer or a merger, consolidation, liquidation, or reorganization proposal sell at a premium to their historic market price immediately prior to the announcement of an offer for the company. However, it is possible that the value of securities of a company involved in such a transaction will not rise and in fact may fall, in which case the Fund would lose money. It is also possible that the Adviser's assessment that a particular company is likely to be acquired or acquired during a specific time frame may be incorrect, in which case the Fund may not realize any premium on its investment and could lose money if the value of the securities declines during the Fund's holding period.
- **Non-Diversification Risk.** The Fund is non-diversified, which means that the proportion of its assets that may be invested in the securities of a single issuer is not limited by the Investment Company Act of 1940, as amended (the "1940 Act"). As a non-diversified mutual fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified mutual fund.
- **Portfolio Management Risk.** The risk that the strategies used by the Adviser and its securities selections fail to produce the intended result.
- **Portfolio Turnover Risk.** High portfolio turnover may result in increased transaction costs to the Fund, which may result in higher fund expenses and lower total returns. The sale of portfolio securities also may result in the recognition of capital gain, which will be taxable to shareholders when distributed to them, or loss.
- **Security Risk.** The risk that the value of a security may move up and down, sometimes rapidly and unpredictably based upon changes in a company's financial condition as well as overall market and economic conditions.
- **Short Sale Risk.** A "short sale" is the sale by the Fund of a security which has been borrowed from a third party on the expectation that the market price will drop. If the price of the security rises, the Fund may have to cover short positions at a higher price than the short sale price, resulting in a loss.
- **Small and Mid-Capitalization Risk.** Risk is greater for the securities of small- and mid-capitalization companies (including small unseasoned companies that have been in operation less than three years) because they generally are more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources. The securities of small- and mid-capitalization companies also may trade less frequently and in smaller volume than larger companies. As a result, the value of such securities may be more

volatile than the securities of larger companies, and the Fund may experience difficulty in purchasing or selling such securities at the desired time and price.

- **Special Situations Risk.** The Fund may use aggressive investment techniques, including seeking to benefit from “special situations,” such as mergers, reorganizations, or other unusual events expected to affect a particular issuer. There is a risk that the “special situation” might not occur, which could have a negative impact on the price of the issuer’s securities and fail to produce gains or produce a loss for the Fund.

### ***Performance***

The bar chart and table that follow provide an indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns for one year, five years, and since inception compare with those of a broad-based securities market index. As with all mutual funds, the Fund’s past performance (before and after taxes) does not predict how the Fund will perform in the future. This may be particularly true for the Fund since a different investment adviser was responsible for the management of the Fund prior to March 11, 2008. Updated information on the Fund’s results can be obtained by visiting [www.gabelli.com](http://www.gabelli.com).

**GABELLI ENTERPRISE MERGERS AND ACQUISITIONS FUND**  
**(Total Returns for the Years Ended December 31)**

The bar chart above shows the total returns for Class A Shares (which are not offered by this Prospectus) for the periods shown. Sales loads are not reflected in the above chart. If sales loads were reflected, the Fund’s returns would be less than those shown.

During the years shown in the bar chart, the highest return for a quarter was 19.12% (quarter ended June 30, 2009) and the lowest return for a quarter was (17.79)% (quarter ended December 31, 2008).

<u>Average Annual Total Returns (for the years ended December 31, 2009)</u>	<u>Past One Year</u>	<u>Past Five Years</u>	<u>Since Inception</u>
Gabelli Enterprise Mergers and Acquisitions Fund			
Class A Shares (first issued on 2/28/01)			
Return Before Taxes .....	25.47%	2.51%	3.66%
Return After Taxes on Distributions .....	25.33%	1.01%	2.54%
Return After Taxes on Distributions and Sale of Fund Shares .....	16.72%	1.47%	2.61%
Standard & Poor's ("S&P") 500 Index (reflects no deduction for fees, expenses or taxes) .....	26.47%	0.42%	0.69%

The returns shown are those of Class A Shares of the Fund, which are not offered in this Prospectus, as Class AAA Shares were first issued on March 1, 2010. The Class AAA Shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities, however, annual returns of the Class AAA Shares would be higher than returns for Class A Shares because of their lower fees and expenses.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or Individual Retirement Accounts ("IRAs").

### ***Management***

**The Adviser.** Gabelli Funds, LLC serves as the Adviser to the Fund.

**The Portfolio Manager.** Mr. Mario J. Gabelli, CFA, Chairman, Chief Executive Officer, and Chief Investment Officer — Value Portfolios of the Adviser, has served as Portfolio Manager of the Fund since the Fund's inception on February 28, 2001.

### ***Purchase and Sale of Fund Shares***

The minimum initial investment must be at least \$1,000 (\$250 for "IRAs", "Roth" IRAs, or "Coverdell" Education Saving Plans). There is no minimum initial investment in an automatic monthly investment plan. There are no subsequent minimum investments.

You can purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open for trading (a "Business Day"). You may purchase or redeem Fund shares by written request via mail (The Gabelli Funds, P.O. Box 8308, Boston, MA 02266-8308), by personal delivery (The Gabelli Funds, c/o BFDS, 30 Dan Road, Canton, MA 02021-2809), or by bank wire.

You may also redeem Fund shares by telephone at 1-800-GABELLI (1-800-422-3554), on the Internet at [www.gabelli.com](http://www.gabelli.com), or through an automatic cash withdrawal plan.

### ***Tax Information***

The Fund's distributions will generally be taxable as ordinary income or long-term capital gains to taxable investors.

### ***Payments to Broker-Dealers and Other Financial Intermediaries***

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of the Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's Website for more information.

### ***INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE, INVESTMENT STRATEGIES, AND RELATED RISKS***

The Fund's investment objective is to seek to provide capital appreciation. The investment objective is fundamental and may not be changed without shareholder approval.

Under normal circumstances, the Fund intends to invest primarily in equity securities of companies believed to be likely acquisition targets within 12 to 18 months. The Fund also may engage in arbitrage transactions by investing in the equity securities of companies that are involved in publicly announced mergers, takeovers, tender offers, leveraged buyouts, spin-offs, liquidations, and other corporate reorganizations. When a company agrees to be acquired by another company, its stock price often quickly rises to just below the stated acquisition price. If the Adviser determines that the acquisition is likely to be consummated on schedule at the stated acquisition price, then the Fund may purchase (if it does not already hold) or increase its investment in the selling company's securities, offering the Fund the possibility of returns in excess of the return on cash equivalents with a limited risk of excessive loss of capital. At times, the stock of the acquiring company also may be purchased or sold short. The Fund may hold a significant portion of its assets in cash in anticipation of arbitrage opportunities.

The Fund may invest in companies of any size and from time to time may invest primarily in companies with large, medium, or small market capitalizations. The Fund generally invests in securities of U.S. companies, but it also may invest its assets in foreign securities, including emerging market securities. The Fund may engage in various portfolio strategies, including using derivatives, to enhance potential gain.

The Fund intends to invest primarily in common stocks, but it may also invest in other securities that the Adviser believes provide opportunities for capital appreciation, such as preferred stocks, warrants, and securities convertible into common stock, including convertible securities which are below investment grade. The Fund may also invest in debt securities, including in debt securities which are below investment grade ("junk bonds"). It is expected that the Fund will engage in active or frequent trading of portfolio securities to achieve its investment objective. In this connection, it is expected that the Fund will have a portfolio turnover rate of 150% or more.

In choosing investments, the Adviser searches for the best values on securities that it believes have the potential to achieve the Fund's investment objective of capital appreciation. In seeking to identify companies that are likely to be acquisition targets, the Adviser considers, among other things, consolidation trends within particular industries, whether a particular industry or company is undergoing a fundamental change or restructuring, the Adviser's assessment of the "private market value" of individual companies and the potential for an event or catalyst to occur that enhances a company's underlying value. The "private market value" of a company is the value that the Adviser believes informed investors would be willing to pay to acquire the entire company. The Adviser seeks to limit excessive risk of capital loss by utilizing various investment strategies, including investing in value oriented equity securities that should trade at a significant discount to the Adviser's assessment of their private market value.

In evaluating arbitrage opportunities with respect to companies involved in publicly announced mergers or other corporate restructurings, the Adviser seeks to identify investments in companies where the

discount from the stated or appraised value of the security significantly overstates the risk of the contingencies involved in completing the transaction, significantly undervalues the securities, assets, or cash to be received by shareholders of the prospective portfolio company as a result of the contemplated transaction, or fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of such contingencies requires unusually broad knowledge and experience on the part of the Adviser which must appraise not only the value of the issuer and its component businesses as well as the assets or securities to be received as a result of the contemplated transaction but also the financial resources and business motivation of the acquirer and the dynamics and business climate when the offer of the proposal is in progress. Since such investments are ordinarily short-term in nature, they will tend to increase the turnover rate of the Fund, thereby increasing its brokerage and other transaction expenses. The Adviser intends to select investments of the type described, which, in its view, have a reasonable prospect of capital appreciation that is significant in relation to both risks involved and the potential of available alternate investments. The Adviser may sell a security for a variety of reasons, such as when the security is selling in the public market at or near the Adviser's estimate of its private market value or if the catalyst expected to happen fails to materialize.

The Fund is non-diversified which means it can invest in a limited number of issuers.

The Fund may use derivative instruments to seek enhanced returns or to try to hedge investment risks, although it is not anticipated that it will do so to a significant degree. In general terms, a derivative instrument is an investment contract whose value depends on (or is derived from) the value of an underlying asset, reference rate, or index. Options, futures contracts, and forwards are examples of derivatives.

For purposes of realizing additional income, the Fund may lend its portfolio securities to broker-dealers approved by the Corporation's Board of Directors (the "Board"). Generally, any such loan of portfolio securities will be continuously secured by collateral at least equal to the value of the security loaned. Such collateral will be in the form of cash, marketable securities issued or guaranteed by the U.S. Government or its agencies, or a standby letter of credit issued by qualified banks. Loans will only be made to firms deemed by the Adviser to be of good standing and will not be made unless, in the judgment of the Adviser, the consideration to be earned from such loans would justify the risk.

The Fund may engage in short sales. A "short sale" is the sale by the Fund of a security which has been borrowed from a third party on the expectation that the market price will drop. If the price of the security drops, the Fund will make a profit by purchasing the security in the open market at a lower price than at which it sold the security. If the price of the security rises, the Fund may have to cover short positions at a higher price than the short sale price, resulting in a loss. The Fund generally will only engage in covered short sales. In a covered short sale, the Fund either (1) borrows and sells securities it already owns (also known as a short sale "against the box"), or (2) designates on the records of the Adviser, or with the Corporation's custodian, cash, U.S. government securities, or other liquid securities in an amount equal to the market value of the securities sold short.

For temporary defensive purposes, the Fund may invest, without limit, in cash, money market instruments or high quality short term debt securities, including repurchase agreements. To the extent the Fund is invested in these instruments, the Fund will not be pursuing its investment objective.

An investment in the Fund is not guaranteed; you may lose money by investing in the Fund. When you sell your shares of the Fund, they could be worth more or less than what you paid for them.

The principal risks presented by the Fund are:

- **Convertible Securities Risk.** The Fund may invest in convertible securities which may include both convertible debt and convertible preferred stock. Such securities may be converted into shares of the underlying common stock at either a stated price or stated rate. Therefore, convertible securities enable the holder to benefit from increases in the market price of the underlying common stock. Convertible securities provide higher yields than the underlying common stock, but generally offer lower yields than nonconvertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates and, in addition, fluctuates in relation to the underlying common stock. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock; however, the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security held by the Fund is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into underlying common stock or sell it to a third party. Investments by the Fund in convertible debt securities are not subject to any ratings restrictions, although the Adviser will consider such ratings, and any changes in such ratings, in its determination of whether the Fund should invest and/or continue to hold the securities. The credit standing of the issuer and other factors may have an effect on a convertible security's investment value. Convertible securities rank senior to common stock in a corporation's capital structure, but are usually subordinated to comparable non-convertible securities. Convertible securities are subject to interest rate risk and credit risk and are often lower-quality securities.
- **Credit Quality Risk.** The actual or perceived reduction in the creditworthiness of debt issuers generally will have adverse effects on the values of their debt securities. It is possible that the issuer of a security will not be able to make interest and principal payments when due. Discontinuation of these payments could substantially adversely affect the price of the bond. Lower rated bonds involve greater risks of default or downgrade and are more volatile than investment-grade securities. Lower rated bonds involve a greater risk of price declines than investment-grade securities due to actual or perceived changes to an issuer's creditworthiness. In addition, issuers of lower rated bonds may be more susceptible than other issuers to economic downturns. Lower rated bonds are especially subject to the risk that the issuer may not be able to pay interest and ultimately repay principal upon maturity.
- **Currency Risk.** The risk that fluctuations in the exchange rates between the U.S. dollar and foreign currencies may negatively affect an investment. A change in the value of any such currency against the U.S. dollar will result in a change in the U.S. dollar value of the Fund's assets and income.
- **Derivatives Risk.** Derivatives are financial contracts whose value is based on the value of an underlying asset, reference rate or index. The Fund's investment in derivatives may rise or fall more rapidly than other investments. These transactions are subject to changes in the value of the underlying security on which such transactions are based. Even a small investment in derivative securities can have a significant impact on the Fund's exposure to stock market values, interest rates, or currency exchange rates. Derivatives are subject to a number of risks such as liquidity risk, interest rate risk, market risk, credit risk, and portfolio management risk. They also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative

may not correlate well with the underlying asset, rate or index. The possible lack of a liquid secondary market for derivatives and the resulting inability of the Fund to sell or otherwise close a derivatives position could expose the Fund to losses and could make derivatives more difficult for the Fund to value accurately. These types of transactions will be used primarily as a substitute for taking a position in the underlying asset and/or for hedging purposes. When a derivative security is used as a hedge against an offsetting position that the Fund also holds, any loss generated by the derivative security should be substantially offset by gains on the hedged instrument, and vice versa. To the extent that the Fund uses a derivative security for purposes other than as a hedge, the Fund is directly exposed to the risks of that derivative security and any loss generated by the derivative security will not be offset by a gain.

- **Equity Risk.** Stocks and other equity securities generally fluctuate in value more than bonds and may decline in value over short or extended periods. The value of such securities will change based on changes in a company's financial condition and in overall market and economic conditions. Recently, the financial markets have experienced a period of extreme stress which has resulted in unusual and extreme volatility in the equity markets and in the prices of individual stocks. In some cases, the prices of stocks of individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. These market conditions add significantly to the risk of short term volatility of the Fund.
- **Foreign Investing and Emerging Markets Risk.** The value of the Fund's investments in foreign securities may fall due to adverse political, social, and economic developments abroad and decreases in foreign currency values relative to the U.S. dollar. Foreign markets also may be less liquid and more volatile than U.S. markets. These risks are greater generally for investments in emerging market issuers than for issuers in more developed countries.
- **Illiquid and Restricted Securities Risk.** The Fund may invest in illiquid and restricted securities. Illiquid securities are securities that the Fund cannot sell on an open market. This means that the Fund might not be able to sell an illiquid security when it desires and that it might be difficult to value such a security. Restricted securities are securities that are subject to contractual restrictions on resale. Such a restriction could limit a security's liquidity.
- **Information Risk.** The risk that key information about a security is inaccurate or unavailable.
- **Interest Rate Risk.** When interest rates decline, the value of the Fund's debt securities generally will rise. Conversely, when interest rates rise, the value of the Fund's debt securities generally declines. The magnitude of the decline will often be greater for longer-term debt securities than shorter-term debt securities.
- **Issuer-Specific Risk.** The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the market as a whole. The Fund could lose all of its investment in a company's securities.
- **Large-Capitalization Risk.** Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Many larger companies also may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.
- **Lending Risk.** The Fund may lend portfolio securities with a value of up to 33% of the Fund's total assets, including collateral received for securities lent. If the Fund lends securities, there is a risk that the securities will not be available to the Fund on a timely basis, and the Fund, therefore, may lose the opportunity to sell the securities at a desirable price. In addition, as with other extensions of secured credit, there is the risk of possible delay in receiving additional collateral or in the

recovery of the securities, possible loss of rights in the collateral should the borrower fail financially or a decline in the value of the collateral held by a fund.

- **Leverage Risk.** The risk associated with securities or practices (e.g., borrowing) that multiply small price movements into large changes in value.
- **Liquidity Risk.** The risk that certain securities may be difficult or impossible to sell at the time and the price that the Adviser would like. This may result in a loss or may be costly to the Fund.
- **Market Risk.** The risk that the securities markets will move down, sometimes rapidly and unpredictably based on overall economic conditions and other factors.
- **Merger Risk.** In general, securities of companies which are the subject of a tender or exchange offer or a merger, consolidation, liquidation or reorganization proposal sell at a premium to their historic market price immediately prior to the announcement of an offer for the company. However, it is possible that the value of securities of a company involved in such a transaction will not rise and in fact may fall, in which case the Fund would lose money. It is also possible that the Adviser's assessment that a particular company is likely to be acquired or acquired during a specific time frame may be incorrect, in which case the Fund may not realize any premium on its investment and could lose money if the value of the securities declines during the Fund's holding period. The Fund's return also could be adversely impacted to the extent that the Adviser's strategies fail to identify companies for investment by the Fund that become the subject of a merger or similar transaction that results in an increase in the value of the securities of those companies. Moreover, publicly announced mergers and similar types of transactions may be renegotiated or terminated, in which case the Fund may lose money. In addition, if a transaction takes a longer time to close than the Adviser originally anticipated, the Fund may realize a lower than expected rate of return.
- **Non-Diversification Risk.** The Fund is non-diversified, which means that the proportion of its assets that may be invested in the securities of a single issuer is not limited by the 1940 Act. As a non-diversified mutual fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified mutual fund. The use of such a focused investment strategy may increase the volatility of the Fund's investment performance, as the Fund may be more susceptible to risks associated with a single economic, political, or regulatory event than a diversified fund. If the securities in which the Fund invests perform poorly, the Fund could incur greater losses than it would have had it been invested in a greater number of securities.
- **Opportunity Risk.** The risk of missing out on an investment opportunity because the assets necessary to take advantage of it are tied up in less profitable investments.
- **Political Risk.** The risk of losses directly attributable to government or political actions.
- **Portfolio Management Risk.** The risk that the strategies used by the Adviser and its securities selections fail to produce the intended result.
- **Portfolio Turnover Risk.** High portfolio turnover may result in increased transaction costs to the Fund, which may result in higher fund expenses and lower total returns. The sale of portfolio securities also may result in the recognition of capital gain, which will be taxable to shareholders when distributed to them, or loss. Given the frequency of sales, any such net gain may be short-term capital gain or loss. Unlike long-term capital gain, short-term capital gain is taxable to individuals at the same rates as ordinary income.
- **Repurchase Agreements Risk.** The Fund may enter into repurchase agreements under which the Fund purchases a security that a seller has agreed to repurchase from the Fund at a later date at the same price plus interest. If a seller defaults and the security declines in value, the Fund

might incur a loss. If the seller declares bankruptcy, the Fund may not be able to sell the security at the desired time.

- **Security Risk.** The risk that the value of a security may move up and down, sometimes rapidly and unpredictably based upon changes in a company's financial condition as well as overall market and economic conditions.
- **Short Sale Risk.** A "short sale" is the sale by the Fund of a security which has been borrowed from a third party on the expectation that the market price will drop. If the price of the security rises, the Fund may have to cover short positions at a higher price than the short sale price, resulting in a loss.
- **Small and Mid-Capitalization Risk.** Risk is greater for the securities of small- and mid-capitalization companies because they generally are more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources. The securities of small- and mid-capitalization companies also may trade less frequently and in smaller volume than larger companies. As a result, the value of such securities may be more volatile than the securities of larger companies, and the Fund may experience difficulty in purchasing or selling such securities at the desired time and price. In general, these risks are greater for small-capitalization companies than for mid-capitalization companies.
- **Special Situations Risk.** The Fund may use aggressive investment techniques, including seeking to benefit from "special situations," such as mergers, reorganizations, or other unusual events expected to affect a particular issuer. There is a risk that the "special situation" might not occur, which could have a negative impact on the price of the issuer's securities and fail to produce gains or produce a loss for the Fund.
- **Unseasoned Companies Risk.** The Fund may invest in small unseasoned companies. These are companies that have been in operation less than three years, including operation of any predecessors. These securities may have limited liquidity and their prices may be very volatile.
- **Valuation Risk.** The risk that the Fund has valued certain securities higher than it can sell them for.

**Portfolio Holdings.** A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information (the "SAI").

### ***MANAGEMENT OF THE FUND***

**The Adviser.** Gabelli Funds, LLC, with its principal offices located at One Corporate Center, Rye, New York 10580-1422, serves as investment adviser to the Fund. The Adviser makes investment decisions for the Fund and continuously reviews and administers the Fund's investment program and manages the Fund's operations under the general supervision of the Board. The Adviser also manages several other open-end and closed-end investment companies in the Gabelli/GAMCO family of funds. The Adviser is a New York limited liability company organized in 1999 as successor to GGCP, Inc., a New York corporation organized in 1980. The Adviser is a wholly owned subsidiary of GAMCO Investors, Inc. ("GBL"), a publicly held company listed on the NYSE.

As compensation for its services and related expenses borne by the Adviser, the Fund will pay to the Adviser a monthly fee at the annual rate of 0.935% of the Fund's average daily net asset value on the first \$1 billion; 0.910% on the next \$1 billion; 0.8850% on the next \$3 billion; 0.860% on the next \$5 billion; and 0.835% thereafter. Class AAA Shares of the Fund were initially issued on March 1, 2010.

A discussion regarding the basis for the decision by the Board to approve the investment advisory agreement with the Adviser is available in the Fund's annual report for the fiscal year ended October 31, 2007.

**The Portfolio Manager.** Mr. Mario J. Gabelli, CFA, is primarily responsible for the day-to-day investment management of the Fund. Mr. Gabelli has been Chairman, Chief Executive Officer, and Chief Investment Officer-Value Portfolios of the Adviser and its predecessor since inception, as well as its parent company, GBL. Mr. Gabelli also acts as Chief Executive Officer and Chief Investment Officer-Value Portfolios of GAMCO Asset Management Inc., another wholly owned subsidiary of GBL, and is an officer or director of various other companies affiliated with GBL. The Adviser relies to a considerable extent on the expertise of Mr. Gabelli, who may be difficult to replace in the event of his death, disability, or resignation.

The Fund's SAI provides additional information about the portfolio manager's compensation, other accounts managed by him, and his ownership of securities in the funds he manages.

**Regulatory Matters.** On April 24, 2008, the Adviser entered into an administrative settlement with the Securities and Exchange Commission ("SEC") to resolve the SEC's inquiry regarding prior frequent trading activity in shares of the GAMCO Global Growth Fund (the "Global Growth Fund") by one investor who was banned from the Global Growth Fund in August 2002. In the settlement, the SEC found that the Adviser had violated Section 206(2) of the Investment Advisers Act, Section 17(d) of the 1940 Act and Rule 17d-1 thereunder, and had aided and abetted and caused violations of Section 12(d)(1)(B)(i) of the 1940 Act. Under the terms of the settlement, the Adviser, while neither admitting nor denying the SEC's findings and allegations, agreed, among other things, to pay the previously reserved total of \$16 million (including a \$5 million penalty), of which at least \$11 million will be distributed to shareholders of the Global Growth Fund in accordance with a plan developed by an independent distribution consultant and approved by the independent directors of the Global Growth Fund and the staff of the SEC, and to cease and desist from future violations of the above-referenced federal securities laws. The settlement did not have a material adverse impact on the Adviser or its ability to fulfill its obligations under the investment advisory agreement. On the same day, the SEC filed a civil action against the Executive Vice President and Chief Operating Officer of the Adviser, alleging violations of certain federal securities laws arising from the same matter. The officer is also an officer of the Global Growth Fund and other funds in the Gabelli/GAMCO fund complex, including the Fund. The officer denies the allegations and is continuing in his positions with the Adviser and the funds. The Adviser currently expects that any resolution of the action against the officer will not have a material adverse impact on the Adviser or its ability to fulfill its obligations under the investment advisory agreement.

## ***INDEX DESCRIPTION***

### **S&P 500 Index**

The S&P 500 Index is a widely recognized, unmanaged index of common stock prices. You cannot invest directly in the S&P 500 Index.

## ***PURCHASE OF SHARES***

You can purchase the Fund's shares on any Business Day. The Fund's Class AAA Shares are offered only to (1) clients of financial intermediaries (i) that charge such clients an ongoing fee for advisory, investment, consulting, or a similar service, or (ii) where Gabelli & Company, Inc., the Fund's distributor

(the “Distributor”) has entered into an agreement permitting the financial intermediary to offer Class AAA Shares through its mutual fund supermarket network or platform, and (2) customers of the Distributor.

- **By Mail or In Person.** You may open an account by mailing a completed subscription order form with a check or money order payable to “Gabelli Enterprise Mergers and Acquisitions Fund” to:

By Mail

The Gabelli Funds  
P.O. Box 8308  
Boston, MA 02266-8308

By Personal Delivery

The Gabelli Funds  
c/o BFDS  
30 Dan Road  
Canton, MA 02021-2809

You can obtain a subscription order form by calling 800-GABELLI (800-422-3554). Checks made payable to a third party and endorsed by the depositor are not acceptable. For additional investments, send a check to the above address with a note stating your exact name and account number, the name of the Fund(s) and class of shares you wish to purchase.

- **By Bank Wire.** To open an account using the bank wire transfer system, first telephone the Fund at 800-GABELLI (800-422-3554) to obtain a new account number. Then instruct your bank to wire funds to:

State Street Bank and Trust Company  
225 Franklin Street, Boston, MA 02110  
ABA #011-0000-28 REF DDA #99046187

Re: Gabelli Enterprise Mergers and Acquisitions Fund  
Account # \_\_\_\_\_  
Account of [Registered Owners]

If you are making an initial purchase, you should also complete and mail a subscription order form to the address shown under “By Mail.” Note that banks may charge fees for wiring funds, although the Fund’s Transfer Agent, State Street Bank and Trust Company (“State Street”), will not charge you for receiving wire transfers.

**Share Price.** The Fund sells its shares based on the net asset value per share (“NAV”) next determined after the time as of which the Fund receives your completed subscription order form and your payment. See “Pricing of Fund Shares” for a description of the calculation of the NAV.

**Minimum Investments.** Your minimum initial investment must be at least \$1,000. See “Retirement Plans/Education Savings Plans” and “Automatic Investment Plan” regarding minimum investment amounts applicable to such plans.

There is no minimum for subsequent investments. Broker-dealers may have different minimum investment requirements.

**Retirement Plans/Education Savings Plans.** The Fund makes available IRAs, “Roth” IRAs, SEP IRAs, and “Coverdell” Education Savings Plans for investment in Fund shares. Applications may be obtained from the Distributor by calling 800-GABELLI (800-422-3554). Self-employed investors may purchase shares of the Fund through tax-deductible contributions to existing retirement plans for self-employed persons, known as “Keogh” or “H.R.-10” plans; the Fund does not currently act as a sponsor to such plans. Fund shares may also be a suitable investment for other types of qualified pension or profit-sharing plans which are employer sponsored, including deferred compensation or salary reduction plans known as “401(k) Plans”. The minimum initial investment in all such retirement plans is \$250. There is no minimum for subsequent investments in retirement plans.

**Automatic Investment Plan.** The Fund offers an automatic monthly investment plan. There is no initial minimum investment for accounts establishing an automatic investment plan. Call the Distributor at 800-GABELLI (800-422-3554) for more details about the plan.

**Telephone or Internet Investment Plan.** You may purchase additional shares of the Fund by telephone and/or over the Internet if your bank is a member of the Automated Clearing House (“ACH”) system. You must also have a completed, approved Investment Plan application on file with the Fund’s Transfer Agent. There is a minimum of \$100 for each telephone or Internet investment. However, you may split the \$100 minimum between two funds. To initiate an ACH purchase, please call 800-GABELLI (800-422-3554) or 800-872-5365 or visit our website at [www.gabelli.com](http://www.gabelli.com).

**General.** State Street will not issue share certificates unless you request them. The Fund reserves the right to (i) reject any purchase order if, in the opinion of the Fund’s management, it is in the Fund’s best interest to do so, (ii) suspend the offering of shares for any period of time, and (iii) waive the Fund’s minimum purchase requirements. The Fund also offers other classes of shares under different selling and shareholder servicing arrangements pursuant to a separate Prospectus. Except for differences attributable to these arrangements the shares of all Classes are substantially the same.

**Customer Identification Program.** Federal law requires the Fund to obtain, verify, and record identifying information, which may include the name, residential, or business street address, date of birth (for an individual), social security or taxpayer identification number, or other identifying information, for each investor who opens or reopens an account with the Fund. Applications without the required information may be rejected or placed on hold until the Fund verifies the account holder’s identity.

**Rule 12b-1 Plan.** The Fund has adopted a distribution plan under Rule 12b-1 (the “Plan”) for Class AAA Shares of the Fund. Under this Plan, the Fund may use its assets to finance activities relating to the sale of its Class AAA Shares and the provision of certain shareholder services.

	<u>Class AAA</u>
Service Fees .....	0.25%

This is an annual rate based on the value of the Class AAA Shares’ average daily net assets. Because the Rule 12b-1 fees are paid out of the Fund’s assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. Due to the payment of Rule 12b-1 fees, long-term shareholders may indirectly pay more than the equivalent of the maximum permitted front-end sales charge.

**Third Party Arrangements.** The Adviser and its affiliates may utilize a portion of their assets, which may include revenues received from 12b-1 fees, to pay all or a portion of the charges of various programs that make shares of the Fund available to their customers. In addition to amounts paid to brokers, dealers, or financial intermediaries as a re-allowance of a portion of the sales commission, the Adviser or an applicable affiliate may, from time to time, at its expense out of its own financial resources (a source of which may be payments under the Funds’ distribution plans), make cash payments to some but not all brokers, dealers, or financial intermediaries for shareholder services, as an incentive to sell shares of the Funds, and/or to promote retention of their customers’ assets in the Funds. These payments, sometimes referred to as “revenue sharing”, do not change the price paid by investors to purchase the Fund’s shares or the amount the Fund receives as proceeds from such sales. Revenue sharing payments may be made to brokers, dealers, and other financial intermediaries that provide services to the Fund or to shareholders in the Fund, including (without limitation) the following programs: shareholder servicing, transaction processing, subaccounting services, marketing support, and/or access to sales meetings, sales representatives, and management representatives of the broker, dealer,

or other financial intermediary. Revenue sharing payments may also be made to brokers, dealers, and other financial intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list, in other sales programs, or as an expense reimbursement in cases where the broker, dealer, or other financial intermediary provides shareholder services to Fund shareholders. These payments may take a variety of forms, including (without limitation) compensation for sales, “trail” fees for shareholder servicing and maintenance of shareholder accounts, and finder’s fees that vary depending on the share class and the dollar amount of shares sold. Revenue sharing payments may be structured: (i) as a percentage of net sales; (ii) as a percentage of net assets; and/or (iii) as a fixed dollar amount.

The Adviser or an applicable affiliate may also provide non-cash compensation to broker/dealer firms or other financial intermediaries, in accordance with applicable rules of the Financial Industry Regulatory Authority (“FINRA”), such as the reimbursement of travel, lodging, and meal expenses incurred in connection with attendance at educational and due diligence meetings or seminars by qualified registered representatives of those firms and, in certain cases, their families; meeting fees; certain entertainment; reimbursement for advertising or other promotional expenses; or other permitted expenses as determined in accordance with applicable FINRA rules. In certain cases these other payments could be significant.

Subject to tax limitations and approval by the Board, the Fund may also make payments to third parties out of its own assets (other than 12b-1 payments), for a portion of the charges for those programs that generally represent savings of expenses experienced by the Fund resulting from shareholders investing in the Fund through such programs rather than investing directly in the Fund.

The Adviser or an applicable affiliate negotiates the level of payments described above to any particular broker, dealer, or other financial intermediary with each firm. Currently, such payments range from 0.10% to 0.40% per year of the average daily net assets of the Fund attributable to the particular firm depending on the nature and level of services and other factors.

### ***REDEMPTION OF SHARES***

You can redeem shares of the Fund on any Business Day. The Fund may temporarily stop redeeming its shares when the NYSE is closed or trading on the NYSE is restricted, when an emergency exists and the Fund cannot sell its shares or accurately determine the value of its assets, or if the SEC orders the Fund to suspend redemptions.

The Fund redeems its shares based on the NAV next determined after the time as of which the Fund receives your redemption request in proper form. See “Pricing of Fund Shares” for a description of the calculation of NAV.

The Fund is intended for long-term investors and not for those who wish to trade frequently in Fund shares. The Fund believes that excessive short-term trading of Fund shares creates risks for the Fund and its long-term shareholders, including interference with efficient portfolio management, increased administrative and brokerage costs, and potential dilution in the value of Fund shares. In addition, because the Fund may invest in foreign securities traded primarily on markets that close prior to the time the Fund determines its NAV, frequent trading by some shareholders may, in certain circumstances, dilute the value of Fund shares held by other shareholders. This may occur when an event that affects the value of the foreign security takes place after the close of the primary foreign market, but before the time that the Fund determines its NAV. Certain investors may seek to take advantage of the fact that there will be a delay in the adjustment of the market price for a security caused by this event until the foreign market reopens (referred to as price arbitrage). If this occurs, frequent traders who attempt this type of price arbitrage may dilute the value of the Fund’s shares to the extent they receive shares or proceeds

based upon NAVs that have been calculated using the closing market prices for foreign securities, if those prices have not been adjusted to reflect a change in the fair value of the foreign securities. In an effort to prevent price arbitrage, the Fund has procedures designed to adjust closing market prices of foreign securities before it calculates its NAV when it believes such an event has occurred that will have more than a minimal effect on the NAV. Prices are adjusted to reflect what the Fund believes are the fair values of these foreign securities at the time the Fund determines its NAV (called fair value pricing). Fair value pricing, however, involves judgments that are inherently subjective and inexact, since it is not possible to always be sure when an event will affect a market price and to what extent. As a result, there can be no assurance that fair value pricing will always eliminate the risk of price arbitrage.

In order to discourage frequent short-term trading in Fund shares, the Fund has adopted policies and procedures which impose a 2.00% redemption fee (short-term trading fee) on Class AAA Shares that are redeemed or exchanged within seven (7) days or less after the date of a purchase. This fee is calculated based on the shares' aggregate NAV on the date of redemption and deducted from the redemption proceeds. The redemption fee is not a sales charge, it is retained by the Fund, and does not benefit the Fund's Adviser or any other third party. For purposes of computing the redemption fee, shares will be redeemed in reverse order of purchase (the latest shares acquired will be treated as being redeemed first). Redemptions to which the fee applies include redemption of shares resulting from an exchange made pursuant to the Fund's exchange privilege. The redemption fee will not apply to redemptions of shares where (i) the shares were purchased through automatic reinvestment of dividends or other distributions, (ii) the redemption is initiated by the Fund, (iii) the shares were purchased through programs that collect the redemption fees at the program level and remit them to the Fund, or (iv) the shares were purchased through programs that the Adviser determines to have appropriate anti-short-term trading policies in place or as to which the Adviser has received assurances that look-through redemption fee procedures or effective anti-short-term trading policies and procedures are in place.

While the Fund has entered into information sharing agreements with financial intermediaries which contractually require such financial intermediaries to provide the Fund with information relating to its customers investing in the Fund through non-disclosed or omnibus accounts, the Fund cannot guarantee the accuracy of the information provided to it from financial intermediaries and may not always be able to track short-term trading effected through these financial intermediaries. In addition, because the Fund is required to rely on information provided by the financial intermediary as to the applicable redemption fee, the Fund cannot guarantee that the financial intermediary is always imposing such fee on the underlying shareholder in accordance with the Fund's policies. Subject to the exclusions discussed above, the Fund seeks to apply these policies uniformly.

You may redeem shares through the Distributor or directly from the Fund through the Fund's Transfer Agent:

- **By Letter.** You may mail a letter requesting the redemption of shares to: **The Gabelli Funds, P.O. Box 8308, Boston, MA 02266-8308.** Your letter should state the name of the Fund and the share class, the dollar amount or number of shares you wish to redeem, and your account number. You must sign the letter in exactly the same way the account is registered, and if there is more than one owner of shares, all owners must sign. A signature guarantee is required for each signature on your redemption letter. You can obtain a signature guarantee from financial institutions such as commercial banks, brokers, dealers, and savings associations. A notary public cannot provide a signature guarantee.

- **By Telephone or the Internet.** Unless you have requested that telephone or Internet redemptions from your account not be permitted, you may redeem your shares in an account (excluding an IRA) directly registered with State Street by calling either 800-GABELLI (800-422-3554) or 800-872-5365 (617-328-5000 from outside the United States) or by visiting our website at [www.gabelli.com](http://www.gabelli.com). *You may not redeem Fund shares held through an IRA through the Internet.* IRA holders should consult a tax adviser concerning the current tax rules applicable to IRAs. If State Street properly acts on telephone or Internet instructions after following reasonable procedures to protect against unauthorized transactions, neither State Street nor the Fund will be responsible for any losses due to unauthorized telephone or Internet transactions and instead you would be responsible. You may request that proceeds from telephone or Internet redemptions be mailed to you by check (if your address has not changed in the prior 30 days), forwarded to you by bank wire, or invested in another mutual fund advised by the Adviser (see “Exchanges of Shares”). Among the procedures that State Street may use are passwords or verification of personal information. The Fund may impose limitations from time to time on telephone or Internet redemptions.
  1. Telephone or Internet Redemption By Check. The Fund will make checks payable to the name in which the account is registered and normally will mail the check to the address of record within seven days.
  2. Telephone or Internet Redemption By Bank Wire. The Fund accepts telephone or Internet requests for wire redemption in amounts of at least \$1,000. The Fund will send a wire to either a bank designated on your subscription order form or on a subsequent letter with a guaranteed signature. The proceeds are normally wired on the next Business Day.
- **Automatic Cash Withdrawal Plan.** You may automatically redeem shares on a monthly, quarterly, or annual basis if you have at least \$10,000 in your account and if your account is directly registered with State Street. Please call 800-GABELLI (800-422-3554) for more information about this plan.

**Involuntary Redemption.** The Fund may redeem all shares in your account (other than an IRA) if their value falls below \$1,000 as a result of redemptions (but not as a result of a decline in NAV). You will be notified in writing if the Fund initiates such action and it will allow 30 days for you to increase the value of your account to at least \$1,000.

**Redemption Proceeds.** A redemption request received by the Fund will be effected based on the NAV next determined after the time as of which the Fund or, if applicable, its authorized designee receives the request. If you request redemption proceeds by check, the Fund will normally mail the check to you within seven days after receipt of your redemption request. If you purchased your Fund shares by check or through the Automatic Investment Plan, you may not receive proceeds from your redemption until the check clears, which may take up to as many as 10 days following purchase. While the Fund will delay the processing of the redemption payment until the check clears, your shares will be valued at the next determined NAV after receipt of your redemption request.

**Redemption in Kind.** In certain circumstances, the Fund may pay your redemption proceeds wholly or partially in portfolio securities. Where applicable, payments would be made in portfolio securities only in the rare instance that the Board believes that it would be in the best interest not to pay redemption proceeds in cash.

## **EXCHANGE OF SHARES**

You can exchange shares of the Fund you hold for shares of the same class of certain other funds managed by the Adviser or its affiliates based on their relative NAV. To obtain a list of the funds whose shares you may acquire through an exchange, call 800-GABELLI (800-422-3554). You may also exchange your shares for shares of a money market fund managed by the Adviser or its affiliates.

In effecting an exchange:

- you must meet the minimum investment requirements for the fund whose shares you wish to purchase through exchange;
- if you are exchanging into a fund with a higher sales charge, you must pay the difference at the time of exchange;
- if you are exchanging from a fund with a redemption fee applicable to the redemption involved in your exchange, you must pay the redemption fee at the time of exchange;
- you may realize a taxable gain or loss;
- you should read the prospectus of the fund whose shares you are purchasing through exchange. Call 800-GABELLI (800-422-3554) or visit our website at [www.gabelli.com](http://www.gabelli.com) to obtain the prospectus; and
- you should be aware that brokers may charge a fee for handling an exchange for you.

You may exchange shares through the Distributor, directly from the Fund's Transfer Agent, or through a registered broker-dealer.

- **Exchange by Telephone.** You may give exchange instructions by telephone by calling 800-GABELLI (800-422-3554). You may not exchange shares by telephone if you hold share certificates.
- **Exchange by Mail.** You may send a written request for exchanges to: **The Gabelli Funds, P.O. Box 8308, Boston, MA 02266-8308**. Your letter should state your name, your account number, the dollar amount or number of shares you wish to exchange, the name and class of the fund(s) whose shares you wish to exchange, and the name of the fund(s) whose shares you wish to acquire.
- **Exchange through the Internet.** You may also give exchange instructions via the Internet at [www.gabelli.com](http://www.gabelli.com). You may not exchange shares through the Internet if you hold share certificates. The Fund may impose limitations from time to time on Internet exchanges.

The Fund may modify or terminate the exchange privilege at any time. You will be given notice 60 days prior to any material change in the exchange privilege.

Your broker may charge you a processing fee for assisting you in purchasing or redeeming shares of the Fund. This charge is set by your broker and does not benefit the Fund or the Adviser in any way. It would be in addition to the sales charges and other costs, if any, described in this Prospectus and must be disclosed to you by your broker.

## **PRICING OF FUND SHARES**

The Fund's NAV is calculated separately for each class of shares on each Business Day. The NYSE is open Monday through Friday, but currently is scheduled to be closed on New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day and on the preceding Friday or subsequent Monday when a holiday falls on a Saturday or Sunday, respectively.

The Fund's NAV is determined as of the close of regular trading on the NYSE, normally 4:00 p.m., Eastern Time. The NAV is computed by dividing the value of the Fund's net assets (i.e., the value of its

securities and other assets less its liabilities, including expenses payable or accrued but excluding capital stock and surplus) attributable to the Class AAA Shares by the total number of Class AAA Shares outstanding at the time the determination is made. The price of Fund shares for the purpose of purchase and redemption orders will be based upon the calculation of NAV of each class next made after the time as of which the purchase or redemption order is received in proper form.

Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by the Adviser.

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market but prior to the close of business on the day the securities are being valued. Debt instruments with remaining maturities of 60 days or less that are not credit impaired are valued at amortized cost, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Debt instruments having a maturity greater than 60 days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons to the valuation and changes in valuation of similar securities, including a comparison of foreign securities to the equivalent U.S. dollar value American Depositary Receipt ("ADR") securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

### ***DIVIDENDS AND DISTRIBUTIONS***

The Fund intends to pay dividends and capital gain distributions, if any, on an annual basis. You may have dividends or capital gain distributions that are declared by the Fund reinvested automatically at NAV in additional shares of the Fund. You will make an election to receive dividends and distributions in cash or Fund shares at the time you first purchase your shares. You may change this election by notifying the Fund or your broker in writing at any time prior to the record date for a particular dividend or distribution. There are no sales or other charges in connection with the reinvestment of dividends and capital gain distributions. Shares purchased through dividend reinvestment will receive a price without a sales charge based on the NAV on the reinvestment date, which is typically the date dividends are paid to shareholders. There is no fixed dividend rate, and there can be no assurance that the Fund will realize any capital gains or other income with which to pay dividends and distributions. Dividends and distributions may differ for different classes of shares.

## **TAX INFORMATION**

The Fund intends to meet all requirements of the Internal Revenue Code necessary to continue to qualify for treatment as a “regulated investment company” and thus does not expect to pay any federal income tax on net income and capital gains it distributes to its shareholders.

Fund distributions paid to you, whether in cash or reinvested in additional shares, are generally taxable to you (unless you invest through a tax-exempt vehicle such as an IRA or 401(k) plan). Distributions derived from net investment income (including the excess of net short-term capital gain over net long-term capital loss) are generally taxable at ordinary income rates, except that under current law the Fund’s dividends attributable to “qualified dividend income” (i.e., dividends it receives on stock of most U.S. and certain foreign corporations with respect to which the Fund satisfies certain holding period, debt financing and other restrictions) generally are subject to a 15% maximum federal income tax rate for individual shareholders who satisfy those restrictions with respect to the Fund shares on which the dividends were paid. Distributions of net gains from investments that the Fund owns for more than one year and that it designates as capital gain dividends generally are taxable to you as long-term capital gain, regardless of how long you have held fund shares, and also are subject to a 15% maximum federal income tax rate for individual shareholders to the extent the distributions are attributable to net capital gain the Fund recognizes on sales or exchanges of capital assets through its last taxable year beginning before January 1, 2011.

Any gain an individual shareholder recognizes on a redemption of his or her fund shares that have been held for more than one year will qualify for the 15% maximum federal income tax rate described above, provided such shares are held as capital assets. If you purchase shares of the Fund shortly before it declares a distribution, a portion of the purchase price may be returned to you as a taxable distribution even though it represents, in effect, a partial return of your investment.

If you receive more than \$10 annually in taxable distributions from the Fund, you will receive a Form 1099 to help you report those distributions and redemption proceeds, if any, that exceed \$600 for the year on your federal income tax return. Be sure to keep that form as a permanent record. A fee may be charged for any duplicate forms that are requested.

This summary of tax consequences is intended for general information only and is subject to change by legislative or administrative action, and any such change may be retroactive. A more complete discussion of the tax rules applicable to you can be found in the SAI that is incorporated by reference into this Prospectus. You should consult a tax adviser concerning the federal, state, and local tax consequences of your investment in the Fund.

## **MAILINGS TO SHAREHOLDERS AND E-DELIVERY**

In our continuing efforts to reduce duplicative mail and Fund expenses, we currently send a single copy of prospectuses and shareholder reports to your household even if more than one family member in your household owns the same fund or funds described in the prospectus or report. Additional copies of our prospectuses and reports may be obtained by calling 800-GABELLI (800-422-3554). If you do not want us to continue to consolidate your fund mailings and would prefer to receive separate mailings at any time in the future, please call us at the telephone number above and we will resume separate mailings, in accordance with your instructions within 30 days of your request. The Fund offers electronic delivery of Fund documents. Direct shareholders of the Fund can elect to receive the Fund’s annual, semi-annual, and quarterly Fund reports, manager commentaries, and prospectuses via e-delivery. For more information or to sign up for e-delivery, please visit the Fund’s website at [www.gabelli.com](http://www.gabelli.com). Shareholders who purchased the Fund through a financial intermediary should contact their financial intermediary to sign up for e-delivery of Fund documents, if available.

---

## ***FINANCIAL HIGHLIGHTS***

The Financial Highlights table is intended to help you understand the financial performance of the Fund for the past five fiscal years. The total returns in the table represent the rate that an investor would have earned or lost on an investment (assuming reinvestment of all dividends and distributions). This information has been audited by PricewaterhouseCoopers LLP, independent registered public accounting firm, whose report, along with the Fund's financial statements and related notes, are included in the annual report, which is available upon request. As of March 1, 2010, Class AAA Shares were not issued, and therefore no previous financial history is available as of that date. Financial Highlights from the Class A Shares have been included instead as the information would be substantially the same for the Class AAA Shares since such shares are invested in the same portfolio of securities as the Class A Shares. The annual returns for each class would differ only to the extent that the classes do not have the same expenses. The actual performance for the Class AAA Shares would have been higher than the Class A Shares due to the sales charge and higher fees and expenses associated with the Class A Shares.

## Gabelli Enterprise Mergers and Acquisitions Fund Financial Highlights

Selected data for a share of capital stock outstanding throughout each period:

Period Ended October 31	Income from Investment Operations			Distributions			Ratios to Average Net Assets/ Supplemental Data							
	Net Asset Value, Beginning of Period	Net Investment Income(a)	Net Realized Gain (Loss) on Investments	Total from Investment Operations	Net Realized Gain on Investments	Total Distributions	Redemption Fees(a)	Net Asset Value, End of Period	Total Return† (in 000's)	Net Assets, End of Period (in 000's)	Net Investment Income(b)	Operating Expenses Before Waivers/ Reimburse- ments/ Reductions	Operating Expenses Before Waivers/ Reimburse- ments/ Reductions	Portfolio Turnover Rate
<b>Class A</b>														
2009	\$ 8.66	\$ 0.05	\$ 1.16	\$ 1.21	\$(0.74)	\$(0.74)	\$0.00(d)	\$ 9.13	16.09%	\$ 71,935	0.59%	1.74%(e)(f)	1.74%	97%
2008	13.17	0.02	(3.64)	(3.62)	(0.89)	(0.89)	0.00(d)	8.66	(29.16)	111,249	0.16	1.86(e)(f)	1.86	130
2007	12.75	0.09	1.18	1.27	(0.59)	(0.59)	0.00(d)	13.17	10.52	401,709	0.68	1.70	1.70	216
2006	11.62	0.23	1.43	1.66	(0.42)	(0.53)	0.00(d)	12.75	14.73	289,464	1.84	1.66	1.66	227
2005	11.26	0.05	0.70	0.75	(0.39)	(0.39)	0.00(d)	11.62	6.77	186,769	0.42	1.71	1.71	183

† Total return represents aggregate total return of a hypothetical \$1,000 investment at the beginning of the period and sold at the end of the period including reinvestment of distributions and does not reflect applicable sales charge.

- (a) Per share amounts have been calculated using the average shares outstanding method.  
 (b) Net investment income ratios do not include a reduction for fees paid indirectly, including such reduction for fees paid indirectly, the net investment income ratios for the years ended October 31, 2007, 2006, and 2005 would have been 0.72%, 1.87%, and 0.47% (Class A). For the year ended October 31, 2008, the effect of the fees paid indirectly was minimal. For the year ended October 31, 2009 there were no fees paid indirectly.  
 (c) The operating expense ratios do not include a reduction of expense for fees paid indirectly, including such reduction for fees paid indirectly, the expense ratios for the years ended October 2007, 2006, and 2005 would have been 1.66%, 1.63%, and 1.66% (Class A). For the year ended October 31, 2008, the effect of the fees paid indirectly was minimal. For the year ended October 31, 2009 there were no fees paid indirectly.  
 (d) Amount represents less than \$0.005 per share.  
 (e) The Fund incurred interest expense during the year ended October 31, 2008. If interest expense had not been incurred, the ratio of operating expenses to average net assets would have been 1.79% (Class A). For the year ended October 31, 2009, the effect of interest expense was minimal.  
 (f) The ratios do not include a reduction of expenses for custodian fee credits on cash balances maintained with the custodian. For the years ended October 31, 2009 and October 31, 2008, the effect of the custodian fee credits was minimal. For the year ended October 31, 2009, the effect of the advisory fee reduction on unsupervised assets was minimal.

## GABELLI FUNDS AND YOUR PERSONAL PRIVACY

### ***Who are we?***

The Gabelli/GAMCO Funds are investment companies registered with the Securities and Exchange Commission under the 1940 Act. We are managed by Gabelli Funds, LLC or Teton Advisors, Inc. (formerly Gabelli Advisers, Inc.), which are affiliated with GAMCO Investors, Inc. GAMCO Investors, Inc. is a publicly held company that has subsidiaries which provide investment advisory or brokerage services for a variety of clients.

### ***What kind of non-public information do we collect about you if you become a Gabelli customer?***

If you apply to open an account directly with us, you will be giving us some non-public information about yourself. The non-public information we collect about you is:

- *Information you give us on your application form.* This could include your name, address, telephone number, social security number, bank account number, and other information.
- *Information about your transactions with us, any transactions with our affiliates, and transactions with the entities we hire to provide services to you.* This would include information about the shares that you buy or redeem. If we hire someone else to provide services — like a transfer agent — we will also have information about the transactions you conduct through them.

### ***What information do we disclose and to whom do we disclose it?***

We do not disclose any non-public personal information about our customers or former customers to anyone, other than our affiliates, our service providers who need to know such information, and as otherwise permitted by law. If you want to find out what the law permits, you can read the privacy rules adopted by the Securities and Exchange Commission. They are in volume 17 of the Code of Federal Regulations, Part 248. The Securities and Exchange Commission often posts information about its regulations on its website, [www.sec.gov](http://www.sec.gov).

### ***What do we do to protect your personal information?***

We restrict access to non-public personal information about you to the people who need to know that information in order to provide services to shareholders of the Fund and to ensure that we are complying with the laws governing the securities business. We maintain physical, electronic, and procedural safeguards to keep your personal information confidential.

***This is not part of the Prospectus.***
