

# The GAMCO Global Growth Fund

## Shareholder Commentary December 31, 2009

Caesar Bryan

Howard Ward

### To Our Shareholders,

For the fourth quarter of 2009, the net asset value (“NAV”) per Class AAA Share of The GAMCO Global Growth Fund rose 5.81%, while the Morgan Stanley Capital International All Country (“MSCI AC”) World Index and the Lipper Global Multi-Cap Core Fund Average rose 4.72% and 4.66%, respectively. The Fund’s annualized total returns for the one year, five year, ten year, and since inception periods were 42.92%, 3.74%, (4.03)%, and 8.31%, respectively.

Thank you for your investment in The GAMCO Global Growth Fund.

The economy continues to improve, although it remains premature to declare victory. Getting to this point required an enormous injection of monetary and fiscal stimulus. Victory will only come when the economy is growing without stimulus and the unemployment rate is well into single digits. Still, we appear to be in a much stronger position than a year ago, and for that we are grateful. The trends are positive. Job growth is just around the corner and that is a good thing. Without job growth, the recovery will falter. Both business and consumer confidence has turned up and spending has followed suit. We expect a strong profit recovery in 2010. Whether that is enough to sustain the bull market in stocks remains to be seen.

### Average Annual Returns through December 31, 2009 (a)

	Quarter	1 Year	3 Year	5 Year	10 Year	Since Inception (2/7/94)
GAMCO Global Growth Fund Class AAA	5.81%	42.92%	(2.08)%	3.74%	(4.03)%	8.31%
MSCI AC World Index	4.72	35.41	(4.05)	3.64	0.89	6.16(b)
Lipper Global Multi-Cap Core Fund Average	4.66	31.35	(5.37)	1.96	2.94	6.48

**The expense ratio in the current prospectus is 1.82% for the Fund’s Class AAA Shares. Class AAA Shares do not have a sales charge.**

(a) **Returns represent past performance and do not guarantee future results.** Total returns and average annual returns reflect changes in share price and reinvestment of distributions and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Performance returns for periods of less than one year are not annualized. Current performance may be lower or higher than the performance data presented. Visit [www.gabelli.com](http://www.gabelli.com) for performance information as of the most recent month end. **Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectus contains more information about this and other matters and should be read carefully before investing.** Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks. The Morgan Stanley Capital International (MSCI) All Country (AC) World Index is an unmanaged indicator of stock market performance, while the Lipper Average reflects the average performance of mutual funds classified in this particular category. You cannot invest directly in an index.

(b) From January 31, 1994, the date closest to the Fund’s inception for which data is available.

## Global Allocation

The accompanying chart presents the Fund's holdings by geographic region as of December 31, 2009. The geographic allocation will change based on current global market conditions. Countries and/or regions represented in the chart and discussed in this letter may or may not be included in the Fund's future portfolio.

## HOLDINGS BY GEOGRAPHIC REGION – 12/31/09

## The Economy

The economy began to grow again in the third quarter of 2009. When an economy rebounds from a violent decline as we saw in 2008 and the first half 2009, it typically snaps back with growth of 7% or more for several quarters. So far we are not seeing that. We are seeing and expect to see growth in the 2% to 4% range. This is consistent with long-term trend line growth of 3.3% in GDP, but well short of what would be considered normal for an economy pulling out of recession. This begs the question of what happens to growth once the stimulus is removed. What level of growth are we capable of producing and sustaining given our historically high level of indebtedness?

With total debt equal to a record 370% of GDP, the private sector is working to pay down debt while the public sector is piling on debt at a faster clip. There are consequences to this developing fiscal train wreck. The most important one is the concern that we are edging closer to the tipping point, a level of indebtedness tied to entitlements that will outgrow our capacity to service and retire the associated debt, like an individual that keeps getting further behind on their credit card balance. Sort of like California (sorry), you might say, but on a national scale. Should we reach this point, it will result in slower growth, fewer services, and a weaker currency, and that is an optimistic view. Let us hope that Washington wakes up and gets serious about deficit reduction before we drown in our own red ink.

For now, we can bask in the sunshine and glory of the developing economic momentum, however mild it may be, and marvel at how close we came to our nation's second Great Depression. Of course, delinquency rates at commercial banks are still deteriorating and many homeowners are either underwater on their mortgage or close to it. Housing is arguably the weakest link in the recovery and a pause in the housing recovery would not sit well with investors, especially those invested in bank shares. On a more positive note, we expect increased consumer and government spending, rising exports, and rebounding private investment to drive close to 4% growth in real GDP in 2010. Standard & Poor's 500 (S&P 500) operating profits should advance between 25% and 30%, driven by enhanced productivity and increased consumption. Inflation should remain below 2%, especially at the core level, although inflation may be trending higher before the year is out. Some say this will be a jobless recovery. That is too pessimistic. We do not know who repealed the economic notion that companies should produce, and hire, until their marginal cost equals their marginal profit. The unemployment rate, currently 10%, should recede over the course of the year.

The big test for the economy will be weathering the ultimate withdrawal of Fed induced liquidity. Most Fed watchers view this as a mid 2010 event, but the Fed is in no hurry and could easily avoid tightening until 2011. The Fed is not worried about inflation and would ideally not tighten until the unemployment rate falls below 9%, at a minimum. The sharply positive slope to the yield curve, fostered by the Fed's free money policy, has the added benefit of helping banks generate profits and build capital. At some point, Dr. Bernanke will don his surgical gown and gloves and drain the massive pool of liquidity from the belly of this economic beast. Just as

was the case with Dr. Greenspan, “The Maestro,” it will be years before we can accurately score Dr. Bernanke’s performance. Of course, they do not call him “Helicopter Ben” for nothing.

## **The Global Equity Market**

For investors that managed to remain committed to stocks despite the hysteria, this past year was a pleasant surprise. The upturn in stocks that began in early March did in fact lead the upturn in the economy by several months, which is more typical than not. Unfortunately, industry data confirms that many investors, professionals and amateurs alike, went into risk aversion mode during the fourth quarter of 2008 and first quarter of 2009. Consequently, they missed the rally that propelled the S&P 500 over 60% above its March 2009 low. Some investors embraced an “anything but stocks” mentality, preferring bonds, money market funds, and gold. These decisions had mixed results, depending on timing and security selection. We understand the emotional toll extracted by stocks during the financial crises. As mentioned last quarter, the collapse in share prices left investors dazed, suffering from a form of blunt force trauma to the head. It is a trauma that continues to feed skepticism with regard to both the economic recovery and the stock market rally. It has given the rally a surreal quality.

Investors can thank the Fed and its extraordinary measures of liquidity, including Quantitative Easing, for the rally that has defied the skeptics thus far. As in all investment cycles, at some point the Fed must take its punch bowl away, or risk overheating the economy and an undesired increase in inflation expectations. This is unlikely to happen before mid year and may not happen until 2011. Stocks often, but not always, encounter increased selling when the Fed tightens credit and there is no compelling reason to suggest that it will not happen this time too. No doubt some investors will reduce exposure to stocks in anticipation of a change in Fed policy. However, any flurry of selling connected to a Fed tightening does not usually signal an end to a bull market. This should be true during the current cycle given the exceptionally low base level of interest rates. Still, a 5% to 10% correction, coincident to an initial Fed tightening move, should not be a surprise.

Importantly, stock valuations are quite average. Using the mean First Call estimate of 2010 S&P 500 earnings of \$76, the market is selling at 15 times forward earnings (S&P 500 at 1140), exactly in line with the historical average. This is similar to last quarter, yet the market has moved higher in tandem with rising earnings estimates. Last quarter the mean earnings estimate was \$71. As stated last quarter, we expect rising earnings estimates to continue to pull stocks higher. As stocks moved higher in the fourth quarter, assets in money market funds declined from \$3.4 trillion to \$3.3 trillion. This level of cash represents 25% of the market value of all common stocks in the U.S. and this remains a high level by historical standards. On signs of improving economic growth, we believe more investors will move some of their cash into bonds or stocks in order to increase current yield and/or total return.

MSCI data (all returns in dollars) shows sixteen of twenty-three major national indices advanced in the fourth quarter. The U.S. (+5.9%) was one of the better performers during the quarter, which marked a change from the third quarter, where strength in most other countries made the U.S. a relative laggard. The best performing country was Norway (+14.9%), followed by Singapore (+9.8%), the United Kingdom (+7.0%), Canada (+5.0%), Australia (+4.9%), Switzerland (+3.8%), the Netherlands (+3.7%), Hong Kong and Sweden (+3.6%), Germany (+2.2%), France (+2.1%), Belgium (+1.6%), Spain (+1.3%), and Portugal (+0.4%). Fourth quarter laggards were led by Greece (−22.4%), followed by Austria (−9.8%), Finland (−3.5%), Denmark and Japan (−2.8%), and Ireland and Italy (−2.7%). New Zealand was unchanged during the quarter. In emerging markets, eighteen of twenty-two countries recorded positive performance in the fourth quarter. Of the four largest emerging markets, Brazil (+12.1%) posted the best quarterly performance, followed by Russia (+10.4%), China (+9.5%), and India (+7.5%).

The U.S. Dollar showed a mixed performance during the fourth quarter, strengthening against the Euro and the Japanese Yen, but weakening against the Canadian Dollar and the British Pound. There are still many lingering concerns about the future movement of the U.S. Dollar and its general decline of late. Worries about the ability of policymakers to rein in the flood of liquidity injected into the financial system are front and center in the minds of investors. Dollar weakness generally benefits energy, industrial metals, and gold companies and we have positioned the portfolio to capitalize on this trend.

## **Portfolio Observations**

Directionally, we became more defensive at the margin in the fourth quarter. We sold the balance of several Financial Service issues (Goldman Sachs, BlackRock, Northern Trust, and State Street Corp.). We also sold our remaining shares of some Producer Durables (Deere, Lockheed Martin, L-3 Communications, Fluor, and McDermott). Other sales in the quarter included Coca-Cola Hellenic Bottling, Nintendo, Schlumberger, Straumann Holdings, and Synthes.

Additions to the portfolio were two Consumer Staples (Coca-Cola and Colgate-Palmolive), two energy issues (Anadarko Petroleum and EOG), and one Healthcare issue (Novo-Nordisk).

There were a number of positions that were trimmed and others that were increased. In most cases, changes were geared to taking profits and reducing our significant cyclical exposure. Although at the margin there was a defensive thrust to our portfolio positioning during the quarter, we remain biased toward companies that are economically sensitive. It is not so much that we became defensive, as it was that we became less offensive. The biggest change was our reduction in Financials, based on our view that housing was the weakest link in the recovery and any housing setback would be relatively more negative for the banks. About 45% of the portfolio remains invested in foreign companies.

## **Looking Ahead**

Market timing is not easy (just ask those who sold stocks at the bottom last March). The outlook for stocks is favorable relative to bonds and money market funds, but returns are not likely to be as strong as in 2009. We expect upward pressure on interest rates, which means bond returns on Treasuries will be less than 5% and could be negative. The pressure will come from a growing bond supply, fewer purchases by the Fed and commercial banks, and a gradual rekindling of inflationary expectations. Money market funds will return less than 1%, as the upward pressure on rates will be focused on longer dated bonds. If the market's forward price to earnings ratio remains at 15, which is to say average, then stocks will rise to reflect and discount the growth in earnings expected for 2011. In the back half of 2010, the market will increasingly be focused on 2011 earnings prospects. As we write, the market is selling at 15 times the expected earnings of \$76 for 2010. Come December 2010, it should be selling at 15 times the currently expected earnings of \$86 for 2011. That gives us a price target of 1,290 for the S&P 500, 13% above current levels. Add the market's 2% dividend yield and you would have a total return of 15%. Of course, the market will make adjustments as dictated by changes in earnings expectations, for better or worse. Multiples could change too, to account for changes in inflation expectations, interest rates, and tax rates. A 15% return is above the historical average for stocks (9.7%) and would dwarf returns from Treasuries and money market funds.

Capital gains taxes will continue to have a tax advantage over interest income after tax rates rise in 2011, so this favors stocks, unless current income is a priority. In fact, the capital gains tax advantage over interest income may actually widen for top wage earners after 2011, although that has yet to be determined. Of course, with stocks comes risk, too. There can be no assurance regarding returns this year. An individual's risk

tolerance plays a role here as well. Corporate buyers will be a source of demand for stocks this year. Strategic cross border deals, driven by the decline in the dollar, low funding costs and stock prices relative to 2007 peak, make U.S. companies tempting targets. It is reasonable to expect many U.S. companies with significant inside ownership would be interested in selling their businesses before the increase in capital gains taxes in 2011.

Outside the realm of traditional security analysis, Washington presents investors with its own set of policy concerns. Exactly what tax rates will apply to whom in 2011? What does healthcare reform mean? Will Congress ever get serious about tackling the budget deficit? What will financial regulatory and banking reform look like? What happens with Cap and Trade? What about Iraq, Iran, Afghanistan, and Pakistan? Yemen? What about trade frictions with the Chinese? Who will finance our budget deficit? We expect some anxious moments this year, but we do not know what they will entail nor when they will arrive.

## **Let's Talk Stocks**

The following are stock specifics on selected holdings of our Fund. Favorable earnings prospects do not necessarily translate into higher stock prices, but they do express a positive trend that we believe will develop over time. Individual securities mentioned are not necessarily representative of the entire portfolio. For the following holdings, the percentage of net assets and their share prices stated in U.S. dollar equivalent terms are presented as of December 31, 2009.

*Agnico-Eagle Mines Limited (2.2% of net assets as of December 31, 2009) (AEM - \$54.00 - NYSE)* is a long established Canadian gold producer with operations in Quebec and Finland and exploration and development activities in Canada, Finland, Mexico, and the United States. Agnico-Eagle's LaRonde Mine is Canada's largest operating gold mine in terms of reserves. The company's operating history includes more than thirty years of continuous gold production primarily from underground operations. Since its amalgamation in 1972, Agnico-Eagle has produced over 4.0 million ounces of gold and is one of the lowest total cash cost producers in the North American gold mining industry. The Company has full exposure to higher gold prices consistent with its policy of no forward gold sales and has paid a cash dividend for 27 consecutive years.

*Apache Corporation (2.3%) (APA - \$103.17 - NYSE)* is an independent energy company that explores for, develops, and produces natural gas, crude oil, and natural gas liquids. The company has operations in the United States, Canada, Egypt, the United Kingdom North Sea, Australia, and Argentina. Apache has increased reserves 22 out of 23 years and increased production 28 out of the past 30 years, a testament to their longevity.

*Apple (2.2%) (AAPL - \$210.86 - OTC)* ignited the personal computer revolution in the 1970s with the Apple II and reinvented the personal computer in the 1980s with the Macintosh. Today, Apple continues to lead the industry in innovation with its award winning computers, OS X operating system, and iLife and professional applications. Apple is also spearheading the digital media revolution with its iPod portable music and video players and iTunes online store, and has entered the mobile phone market with its revolutionary iPhone.

*Cheung Kong Holdings LTD (1.9%) (1.HK - \$12.85 - Hong Kong)* is a property development and strategic investment company. It is one of the largest developers in Hong Kong of residential, commercial, and industrial properties. About one in seven private residences in Hong Kong were developed by the company. In Hong Kong alone, members of the Cheung Kong Group include Cheung Kong Holdings, Hutchison Whampoa Limited, and Hongkong Electric Holdings Limited, which are constituent stocks of the Hang Seng Index; Cheung Kong Infrastructure Holdings Limited, CK Life Sciences International (Holdings) Inc., Hutchison Telecommunications International Limited, Hutchison Telecommunications Hong Kong Holdings Limited, Hutchison Harbour Ring Limited, and TOM Group Limited, all of which are companies listed on the Main Board of the Hong Kong Stock Exchange. The combined market capitalization of the Cheung Kong Group's Hong Kong listed companies

amounted to HK\$645 billion as of September 30, 2009. The company also has substantial interests and operations in life sciences and other businesses.

*Freeport-McMoRan Copper & Gold (2.1%) (FCX - \$80.29 - NYSE)* is a leading international mining company with headquarters in Phoenix, Arizona. The company operates large, long-lived, geographically diverse assets with significant proven and probable reserves of copper, gold, and molybdenum. Freeport has a dynamic portfolio of operating, expansion, and growth projects in the copper industry and is the world's largest producer of molybdenum. The company's portfolio of assets includes the Grasberg mining complex, the world's largest copper and gold mine in terms of recoverable reserves, significant mining operations in the Americas including the large scale Morenci and Safford minerals districts in North America, the Cerro Verde, and El Abra operations in South America, and the potentially world class Tenke Fungurume development project in the Democratic Republic of Congo.

*Google (3.0%) (GOOG - \$619.98 - OTC)* is widely recognized as the world's largest search engine. Google's stated mission is to organize the world's information and make it universally accessible and useful. Google generates revenue by providing advertisers with the opportunity to deliver measurable, cost effective online advertising that is relevant to the information displayed on any given webpage. This makes the advertising useful to consumers as well as to the advertiser placing it. We believe this highly innovative and fast growing company is uniquely positioned to create new market opportunities while maintaining its lead in online search.

*Hess Corporation (2.1%) (HES - \$60.5 - NYSE)* is a leading global independent energy company, engaged in the exploration and production of crude oil and natural gas, as well as in refining and in marketing refined petroleum products, natural gas, and electricity. Exploration and production is the engine of future income and growth, currently representing nearly 80% of capital employed and over 95% of annual capital expenditures. The Company has operations in the United States, United Kingdom, Norway, Denmark, Russia, Equatorial Guinea, Algeria, Libya, Gabon, Egypt, Ghana, the Joint Development Area of Malaysia and Thailand, Indonesia, Thailand, Azerbaijan, Australia, Brazil, and St. Lucia. They continue to increase reserves outside the mature regions of the United States and North Sea. The company operates about 1,360 Hess branded sites in sixteen states along the east coast of the United States.

*MasterCard Incorporated (1.8%) (MA - \$255.98 - NYSE)* advances global commerce by providing a critical economic link among financial institutions, businesses, cardholders, and merchants worldwide. As a franchiser, processor, and adviser, MasterCard develops and markets payment solutions, processes approximately twenty-one billion transactions each year, and provides industry leading analysis and consulting services to financial institution customers and merchants. Through its family of brands, including MasterCard®, Maestro®, and Cirrus®, MasterCard serves consumers and businesses in more than 210 countries and territories. We view MasterCard as a unique way to capture the secular growth in global commerce without taking on the credit risk of traditional card issuers.

*Petrobras (2.3%) (PBR - \$42.39 - NYSE)* is Brazil's largest energy company with a presence in twenty-seven countries and employs nearly 55,000 people. The company is divided into four business areas: Exploration and Production, Downstream, Gas & Energy, and International. Petrobras operates nearly 6,000 service stations, more than 100 production platforms, sixteen refineries, and has average annual oil and natural gas production of 2.4 million barrels of oil equivalent per day. Petrobras stands to benefit from rising oil demand with proven reserves of 11.1 billion barrels of oil equivalent, not including the recent discoveries in the mega-fields of Tupi, Jupiter, Carioca, and Bem-te-vi.

*QUALCOMM Inc. (1.8%) (QCOM - \$46.56 - OTC)* is a leader in developing and delivering innovative digital wireless communications products and services based on CDMA and other advanced technologies. The company has over 65,000 patents issued or applied for, over 175 CDMA licensees and approximately 16,100 employees working in 146 worldwide locations. The world leader in next generation mobile technologies, QUALCOMM ideas and inventions are driving wireless growth and helping to connect people to information, entertainment, and one another.

## **In Conclusion**

A few forecasters predicted the downturn. A few other forecasters predicted the upturn. Did anyone predict the downturn and the upturn? These have been and continue to be difficult and emotional times. This translates into volatility and volatility brings opportunity. The last time the nation deleveraged was the twenty years between 1933 and 1953, during which time total debt to GDP was reduced from 260% to 130%. This did not stop stocks from compounding at about 11% over this period, above the historical average of 9.7%. While many factors contributed to these results, it is significant that deleveraging does not appear to have been an obstacle to economic growth and above average stock returns. If anything, the evidence points the other way. This is confirmed by returns over the most recent twenty years, which was a period when total debt to GDP increased from around 220% of GDP to about 370%, and stocks returned 5% per annum, roughly one half the historical average.

With interest rates so low today, even a 5% compound return from stocks over the next twenty years is likely to beat a buy and hold approach to twenty year Treasuries, which are currently priced at a yield to maturity of about 4.5%. Of course, interest rates will not always be this low and who has the luxury of a twenty year investment horizon? Still, equities, warts and all, offer investors a vehicle to build capital over time. It is this desire to create wealth that leads investors to accept a high level of uncertainty with respect to shorter-term equity returns in exchange for a more predictable longer-term return, which is largely a function of earnings growth and dividend payments.

It has been a tumultuous couple of years, to say the least. As we usher in a new decade, we once again thank you for entrusting your assets to us and want to wish you and your family good health, good returns, and a happy new year!

Sincerely,

The GAMCO Global Portfolio Management Team

January 29, 2010

## Multi-Class Shares

GAMCO Global Series Funds, Inc. began offering additional classes of Fund shares in March 2000. Class AAA Shares are no-load shares offered directly by selected broker/dealers. Class A and Class C Shares are targeted to the needs of investors who seek advice through financial consultants. Class I Shares are available solely to certain institutions, which initially invest directly with the Fund. The minimum initial investment amount for Class I Shares is \$500,000. The Board of Trustees determined that expanding the types of Fund shares available through various distribution options would enhance the ability of the Fund to attract additional investors.

### The GAMCO Global Growth Fund Average Annual Returns — December 31, 2009 (a)

	<u>Class AAA Shares</u>	<u>Class A Shares</u>	<u>Class B Shares</u>	<u>Class C Shares</u>	<u>Class I Shares</u>
1 Year .....	42.92%	42.92%	41.93%	41.84%	43.40%
		34.71(c)	36.93(d)	40.84(e)	
5 Year .....	3.74	3.73	2.96	2.96	3.87
		2.51(c)	2.60(d)	2.96	
10 Year .....	(4.03)	(4.02)	(4.70)	(4.73)	(3.97)
		(4.58)(c)	(4.70)	(4.73)

(a) **Returns represent past performance and do not guarantee future results.** Total returns and average annual returns reflect changes in share price and reinvestment of distributions and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit [www.gabelli.com](http://www.gabelli.com) for performance information as of the most recent month end. **Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectus contains more information about this and other matters and should be read carefully before investing.**

The Class AAA Share NAVs per share are used to calculate performance for the periods prior to the issuance of Class A Shares, Class B Shares, Class C Shares, and Class I Shares on March 2, 2000, May 5, 2000, March 12, 2000, and January 11, 2008, respectively. The actual performance of the Class B Shares and Class C Shares would have been lower due to the additional expenses associated with these classes of shares. The actual performance of the Class I Shares would have been higher due to lower expenses related to this class of shares. Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks.

(b) Performance is calculated from inception of Class AAA Shares on February 7, 1994.

(c) Includes the effect of the maximum 5.75% sales charge at the beginning of the period.

(d) Performance results include the deferred sales charges for the Class B Shares upon redemption at the end of the one year and five year periods of 5% and 2%, respectively, of the Fund's NAV per share at the time of purchase or sale, whichever is lower. Class B Shares are not available for new purchases.

(e) Performance results include the deferred sales charges for the Class C Shares upon redemption at the end of the one year period of 1% of the Fund's NAV per share at the time of purchase or sale, whichever is lower.

We have separated the portfolio manager's commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio manager's commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at [www.gabelli.com/funds](http://www.gabelli.com/funds).

## **Gabelli/GAMCO Funds and Your Personal Privacy**

---

### **Who are we?**

The Gabelli/GAMCO Funds are investment companies registered with the Securities and Exchange Commission under the Investment Company Act of 1940. We are managed by Gabelli Funds, LLC or Teton Advisors, Inc., which are affiliated with GAMCO Investors, Inc. GAMCO Investors, Inc. is a publicly held company that has subsidiaries that provide investment advisory or brokerage services for a variety of clients. Teton Advisors, Inc. is a publicly held company that provides investment advisory services to the GAMCO Westwood Funds.

### **What kind of non-public information do we collect about you if you become a shareholder?**

If you apply to open an account directly with us, you will be giving us some non-public information about yourself. The non-public information we collect about you is:

- *Information you give us on your application form.* This could include your name, address, telephone number, social security number, bank account number, and other information.
- *Information about your transactions with us, any transactions with our affiliates, and transactions with the entities we hire to provide services to you.* This would include information about the shares that you buy or redeem. If we hire someone else to provide services—like a transfer agent—we will also have information about the transactions that you conduct through them.

### **What information do we disclose and to whom do we disclose it?**

We do not disclose any non-public personal information about our customers or former customers to anyone other than our affiliates, our service providers who need to know such information, and as otherwise permitted by law. If you want to find out what the law permits, you can read the privacy rules adopted by the Securities and Exchange Commission. They are in volume 17 of the Code of Federal Regulations, Part 248. The Commission often posts information about its regulations on its website, [www.sec.gov](http://www.sec.gov).

### **What do we do to protect your personal information?**

We restrict access to non-public personal information about you to the people who need to know that information in order to provide services to you or the Fund and to ensure that we are complying with the laws governing the securities business. We maintain physical, electronic, and procedural safeguards to keep your personal information confidential.

# GABELLI FAMILY OF FUNDS

## VALUE

### **Gabelli Asset Fund**

Seeks to invest primarily in a diversified portfolio of common stocks selling at significant discounts to their private market value. The Fund's primary objective is growth of capital. (Multiclass)

Portfolio Manager: Mario J. Gabelli, CFA

### **Gabelli Blue Chip Value Fund**

Seeks long term growth of capital through investment primarily in the common stocks of established companies which are temporarily out of favor. The fund's objective is to identify a catalyst or sequence of events that will return the company to a higher value. (Multiclass)

Portfolio Manager: Barbara Marcin, CFA

### **GAMCO Westwood Equity Fund**

Seeks to invest primarily in the common stock of well seasoned companies that have recently reported positive earnings surprises and are trading below Westwood's proprietary growth rate estimates. The Fund's primary objective is capital appreciation. (Multiclass)

Portfolio Manager: Susan M. Byrne

## FOCUSED VALUE

### **Gabelli Value Fund**

Seeks to invest in securities of companies believed to be undervalued. The Fund's primary objective is long-term capital appreciation. (Multiclass)

Portfolio Manager: Mario J. Gabelli, CFA

## SMALL CAP VALUE

### **Gabelli Small Cap Fund**

Seeks to invest primarily in common stock of smaller companies (market capitalizations at the time of investment of \$2 billion or less) believed to have rapid revenue and earnings growth potential. The Fund's primary objective is capital appreciation. (Multiclass)

Portfolio Manager: Mario J. Gabelli, CFA

### **GAMCO Westwood SmallCap Equity Fund**

Seeks to invest primarily in smaller capitalization equity securities – market caps of \$2.5 billion or less. The Fund's primary objective is long-term capital appreciation. (Multiclass)

Portfolio Manager: Nicholas F. Galluccio

### **Gabelli Woodland Small Cap Value Fund**

Seeks to invest primarily in the common stocks of smaller companies (market capitalizations generally less than \$3.0 billion) believed to be undervalued with shareholder oriented management teams that are employing strategies to grow the company's value. The Fund's primary objective is capital appreciation. (Multiclass)

Portfolio Manager: Elizabeth M. Lilly, CFA

## GROWTH

### **GAMCO Growth Fund**

Seeks to invest primarily in large cap stocks believed to have favorable, yet undervalued, prospects for earnings growth. The Fund's primary objective is capital appreciation. (Multiclass)

Portfolio Manager: Howard F. Ward, CFA

### **GAMCO International Growth Fund**

Seeks to invest in the equity securities of foreign issuers with long-term capital appreciation potential. The Fund offers investors global diversification. (Multiclass)

Portfolio Manager: Caesar Bryan

## AGGRESSIVE GROWTH

### **GAMCO Global Growth Fund**

Seeks capital appreciation through a disciplined investment program focusing on the globalization and interactivity of the world's marketplace. The Fund invests in companies at the forefront of accelerated growth. The Fund's primary objective is capital appreciation. (Multiclass)

Team Managed

## MICRO-CAP

### **GAMCO Westwood Mighty Mites<sup>SM</sup> Fund**

Seeks to invest in micro-cap companies that have market capitalizations of \$300 million or less. The Fund's primary objective is long-term capital appreciation. (Multiclass)

Team Managed

## EQUITY INCOME

### **Gabelli Equity Income Fund**

Seeks to invest primarily in equity securities with above average market yields. The Fund pays monthly dividends and seeks a high level of total return with an emphasis on income. (Multiclass)

Portfolio Manager: Mario J. Gabelli, CFA

### **GAMCO Westwood Balanced Fund**

Seeks to invest in a balanced and diversified portfolio of stocks and bonds. The Fund's primary objective is both capital appreciation and current income. (Multiclass)

Co-Portfolio Managers: Susan M. Byrne  
Mark Freeman, CFA

### **GAMCO Westwood Income Fund**

Seeks to provide a high level of current income as well as long-term capital appreciation by investing in income producing equity and fixed income securities. (Multiclass)

Portfolio Manager: Barbara Marcin, CFA

## SPECIALTY EQUITY

### **GAMCO Global Convertible Securities Fund**

Seeks to invest principally in bonds and preferred stocks which are convertible into common stock of foreign and domestic companies. The Fund's primary objective is total return through a combination of current income and capital appreciation. (Multiclass)

Team Managed

### **GAMCO Global Opportunity Fund**

Seeks to invest in common stock of companies which have rapid growth in revenues and earnings and potential for above average capital appreciation or are undervalued. The Fund's primary objective is capital appreciation. (Multiclass)

Team Managed

### **Gabelli SRI Green Fund**

Seeks to invest in common and preferred stocks meeting guidelines for social responsibility (avoiding defense contractors and manufacturers of alcohol, abortifacients, gaming, and tobacco products) and sustainability (companies engaged in climate change, energy security and independence, natural resource shortages, organic living, and urbanization). The Fund's primary objective is capital appreciation. (Multiclass)

Co-Portfolio Managers: Christopher C. Desmarais  
John M. Segrich, CFA

## SECTOR

### **GAMCO Global Telecommunications Fund**

Seeks to invest in telecommunications companies throughout the world – targeting undervalued companies with strong earnings and cash flow dynamics. The Fund's primary objective is capital appreciation. (Multiclass)

Team Managed

## GAMCO Gold Fund

Seeks to invest in a global portfolio of equity securities of gold mining and related companies. The Fund's objective is long-term capital appreciation. Investment in gold stocks is considered speculative and is affected by a variety of worldwide economic, financial, and political factors. (Multiclass)

Portfolio Manager: Caesar Bryan

## Gabelli Utilities Fund

Seeks to provide a high level of total return through a combination of capital appreciation and current income. (Multiclass)

Team Managed

## MERGER AND ARBITRAGE

### **Gabelli ABC Fund**

Seeks to invest in securities with attractive opportunities for appreciation or investment income. The Fund's primary objective is total return in various market conditions without excessive risk of capital loss. (No-load)

Portfolio Manager: Mario J. Gabelli, CFA

### **Gabelli Enterprise Mergers and Acquisitions Fund**

Seeks to invest in securities believed to be likely acquisition targets within 12–18 months or in arbitrage transactions of publicly announced mergers or other corporate reorganizations. The Fund's primary objective is capital appreciation. (Multiclass)

Portfolio Manager: Mario J. Gabelli, CFA

## CONTRARIAN

### **GAMCO Mathers Fund**

Seeks long-term capital appreciation in various market conditions without excessive risk of capital loss. (No-load)

Portfolio Manager: Henry Van der Eb, CFA

### **Comstock Capital Value Fund**

Seeks capital appreciation and current income. The Fund may use either long or short positions to achieve its objective. (Multiclass)

Portfolio Manager: Martin Weiner, CFA

## FIXED INCOME

### **GAMCO Westwood Intermediate Bond Fund**

Seeks to invest in a diversified portfolio of bonds with various maturities. The Fund's primary objective is total return. (Multiclass)

Portfolio Manager: Mark Freeman, CFA

## CASH MANAGEMENT-MONEY MARKET

### **Gabelli U.S. Treasury Money Market Fund**

Seeks to invest exclusively in short-term U.S. Treasury securities. The Fund's primary objective is to provide high current income consistent with the preservation of principal and liquidity. (No-load)

Co-Portfolio Managers: Judith A. Raneri  
Ronald S. Eaker

An investment in the above Money Market Fund is neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund.

The Funds may invest in foreign securities which involve risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks.

To receive a prospectus, call **800-GABELLI** (422-3554). Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectus contains more information about this and other matters and should be read carefully before investing.
