CAPITAL STRUCTURE

1.6 Million Common Shares	\$25 Million (NAV)
Series A Cumulative Preferred Shares	\$21 Million

Leverage Risk. The use of leverage, which can be described as exposure to changes in price at a ratio greater than the amount of equity invested, through the issuance of preferred shares, magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. The Fund's use of leverage in its investment operations subjects it to substantial risk of loss.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.

The Fund's NAV per share will fluctuate with changes in the market value of the Fund's portfolio securities. Stocks are subject to market, economic, and business risks that cause their prices to fluctuate. Investors acquire shares of the Fund on a securities exchange at market value, which fluctuates according to the dynamics of supply and demand. When Fund shares are sold, they may be worth more or less than their original cost. Consequently, you can lose money by investing in the Fund.

** For purposes of calculating these comparative results, November 2, 2016, the date when the common shares began trading separately on the NYSE American, is considered the inception date.*

(a) Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The S&P 500 Index is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.

(b) The total returns reflect changes in the NAV per share and are net of expenses. The inception return is based on a NAV of \$18.46 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016 the Fund traded as a combination.

(c) The total returns reflect changes in closing market values on the NYSE American. The inception return is based on price of \$19.75 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016 the Fund traded as a combination.

(d) From October 31, 2016, the date closest to the Fund's inception for which data is available.
