The Russell 2000 Index is an unmanaged index of 2,000 small cap U.S. stocks that is generally considered to be representative of small capitalization issues in the U.S. stock market. The Russell 2000 Value Index measures the performance of the small-capitalization sector of the U.S. equity market. It is a subset of the Russell 2000 Index. These Indexes are not available for direct investment and its returns do not reflect expenses that are deducted from the Fund's returns. Small capitalization stocks are subject to significant price fluctuations and business risks. The stocks of smaller companies may trade less frequently and experience more abrupt price movements than stocks of larger companies; therefore, investing in this sector involves special challenges.
