

COMSTOCK FUNDS, INC.

COMSTOCK CAPITAL VALUE FUND (the “Fund”)

Supplement dated November 21, 2018, to the Fund’s Summary Prospectus, Prospectus and Statement of Additional Information for Class AAA Shares, Class A Shares, Class C Shares, and Class I Shares, dated August 28, 2018

After careful consideration, the Board of Directors (the “Board”) of the Fund approved calling a special meeting of shareholders, to be held as soon as possible, to consider a proposal to change the nature of the Fund’s business from a mutual fund registered under the Investment Company Act of 1940, as amended (the “1940 Act”) to an operating company, and to de-register the Fund as a registered investment company with the Securities and Exchange Commission (the “Proposal”).

This conclusion was based in substantial part on the Board’s belief that the appropriate business strategy to be pursued by the Fund would be becoming an operating company that owns interest in one or more operating businesses and/or to acquire assets other than securities, and try to maximize the utilization of the Fund’s accumulated capital loss carryforwards. If shareholders of the Fund approve the Proposal, the conversion to an operating company is expected to take effect in the second quarter of 2019.

Shareholders of the Fund will receive a combined proxy statement with additional information about the shareholder meeting and the Proposal. Shareholders should read the proxy materials carefully, as they will contain a more detailed description of the Proposal.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE

Comstock Capital Value Fund

A series of Comstock Funds, Inc.

SUMMARY PROSPECTUS August 28, 2018

Class AAA (COMVX), A (DRCVX), C (CPCCX), I (CPCRX)

Before you invest, you may want to review the Fund's Prospectus and Statement of Additional Information ("SAI"), which contain more information about the Fund and its risks. You can find the Fund's Prospectus and SAI and other information about the Fund online at www.gabelli.com. You can also get this information at no cost by calling 800-422-3554 or by sending an email request to info@gabelli.com. The Fund's Prospectus and SAI, both dated August 28, 2018, are incorporated by reference into this Summary Prospectus.

Investment Objective

Comstock Capital Value Fund (the "Fund") seeks to maximize total return, consisting of capital appreciation and current income.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund's Class A shares. More information about these and other discounts is available from your financial professional and in the section entitled, "Classes of Shares" on page 15 of the prospectus, and in Appendix A, "Sales Charge Reductions and Waivers Available through Certain Intermediaries," attached to the prospectus.

	<u>Class AAA Shares</u>	<u>Class A Shares</u>	<u>Class C Shares</u>	<u>Class I Shares</u>
Shareholder Fees				
(fees paid directly from your investment):				
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	5.75%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of redemption or offering price, whichever is lower)	None	None	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (as a percentage of amount invested)	None	None	None	None
Redemption Fees (as a percentage of amount redeemed for shares held 7 days or less)	2.00%	2.00%	2.00%	2.00%
Exchange Fee	None	None	None	None
Annual Fund Operating Expenses				
(expenses that you pay each year as a percentage of the value of your investment):				
Management Fees	1.00%	1.00%	1.00%	1.00%
Distribution and Service (Rule 12b-1) Fees	0.25%	0.25%	1.00%	None
Other Expenses	1.73%	1.73%	1.73%	1.73%
Dividend Expense and Service Fees on Securities Sold Short	0.86%	0.86%	0.86%	0.86%
All Additional Other Expenses	0.87%	0.87%	0.87%	0.87%
Acquired Fund Fees and Expenses	<u>0.02%</u>	<u>0.02%</u>	<u>0.02%</u>	<u>0.02%</u>
Total Annual Fund Operating Expenses	<u>3.00%</u>	<u>3.00%</u>	<u>3.75%</u>	<u>2.75%</u>

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and

the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class AAA Shares	\$303	\$ 927	\$1,577	\$3,318
Class A Shares	\$861	\$1,449	\$2,061	\$3,702
Class C Shares	\$477	\$1,146	\$1,934	\$3,993
Class I Shares	\$278	\$ 853	\$1,454	\$3,080

You would pay the following expenses if you did not redeem your shares of the Fund:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class AAA Shares	\$303	\$ 927	\$1,577	\$3,318
Class A Shares	\$861	\$1,449	\$2,061	\$3,702
Class C Shares	\$377	\$1,146	\$1,934	\$3,993
Class I Shares	\$278	\$ 853	\$1,454	\$3,080

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund's shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 39% of the average value of its portfolio.

Principal Investment Strategies

The Fund follows a value oriented strategy and seeks to achieve its investment objective by investing in equity and debt securities, money market instruments, and derivatives. The Fund may invest in, and may shift frequently among, a wide range of asset classes and market sectors. Thus, during the course of a business cycle, for example, the Fund may invest solely in equity securities, debt securities, or money market instruments, or in a combination of these classes of investments. As a result, Gabelli Funds, LLC (the "Adviser") has considerable flexibility in selecting the types of investments and market sectors for investment of the Fund's assets and is not required to maintain any minimum portion of the Fund's assets in any particular asset class. The Fund may use either long or short positions in pursuit of its investment objective. The Fund's investment performance will depend in large part on the asset allocation selected by the portfolio managers. For each asset class, the Adviser uses a valuation approach to investing by examining the overall economic picture, the characteristics of individual securities and historical market information and technical analysis to determine securities which it believes are overvalued or undervalued.

As of the date of this prospectus, the portfolio managers view the U.S. equity markets as overvalued by most traditional measures and have positioned the Fund to seek profits from a major U.S. equity market decline through a variety of investment practices, including puts and short sales, together with its investments in short-term fixed-income securities. As presently positioned, in the event that U.S. equity markets do not experience a significant decline, the Fund can be expected to underperform other funds that are not similarly positioned for a bear market. The Fund is, however, flexibly managed and the Adviser may, consistent with the Fund's investment strategies, without prior notice to shareholders, change the Fund's asset positioning quickly and decisively.

The equity securities in which the Fund invests include common and preferred stock (including convertible preferred stock), warrants, and depository receipts. There is no restriction on the market capitalization of the Fund's equity securities. The debt securities in which the Fund may invest include: U.S. corporate debt, U.S. government and agency debt, and foreign sovereign and other debt securities (including debt securities from emerging market issuers). The Fund may invest up to 65% of its assets in equity and debt securities of foreign issuers, including those in emerging markets. The Fund may also invest in debt securities convertible into shares of common stock. The Fund's debt securities may have fixed, floating, or variable rates of interest.

The Fund may invest without limit in high yield debt securities (commonly referred to as "junk bonds"), but currently intends to limit such investments to 35% of its assets. High yield debt securities are those rated "Baa" or lower by

Moody's Investors Service, Inc. ("Moody's"), or "BBB" or lower by Standard & Poor's Rating Services ("S&P"), a division of McGraw-Hill Companies or, if unrated, judged by the Adviser to be of comparable quality. There is no restriction on the maturity of the Fund's portfolio or on any individual debt security in the Fund's portfolio. The Adviser may adjust the average maturity according to actual or anticipated changes in the market.

The Fund may invest in high quality domestic and foreign money market instruments, and may enter into repurchase agreements. In addition, when the Adviser determines that a temporary defensive position is advisable or to meet anticipated redemption requests, the Fund may invest without limit in short term debt obligations, such as commercial paper, bank obligations, and U.S. Treasury bills.

The Fund may make short sales, which are transactions in which the Fund sells a security it does not own, with the expectation that the security's value will decline. To complete a short sale, the Fund must borrow the security to make delivery, and then replace the security by purchasing it. The total market value of all of the Fund's short sales may not exceed 50% of the value of the Fund's net assets. In addition, the Fund's short sales of the securities of any single issuer listed on a national securities exchange may not exceed 5% of the value of the Fund's net assets, and the Fund may not sell short more than 5% of the outstanding securities of a single class of securities of an issuer. The Fund may enter into short sales of securities the Fund owns, but such sales cannot exceed 15% of the value of the Fund's net assets. The Fund's compliance with these limitations is calculated at the time a transaction is effected.

The Fund intends to invest in derivatives, which are financial instruments whose value is based on another security, an index of securities or market changes, or exchange rate movements. The Fund may use derivatives to hedge various market risks. Derivative strategies the Fund may use include writing covered call or put options or purchasing put and call options on securities, foreign currencies, or stock indices. The Fund may also purchase or sell stock index futures contracts or interest rate futures contracts and may enter into interest rate or forward currency transactions. In addition, the Fund may purchase futures and options on futures and may purchase options on securities or securities indices for speculative purposes in order to increase the Fund's income or gain. The Fund may enter into futures contracts and options on futures for speculative purposes if, immediately thereafter, the sum of the amount of its initial margin on futures contracts and premiums on options on futures would not exceed 5% of the liquidation value of the Fund's portfolio, provided that in the case of an option that is in-the-money at the time of purchase, the in-the-money amount may be excluded in calculating this 5% limitation. In addition to the preceding limitation, the value of all uncovered put and call options held by the Fund cannot exceed 10% of the Fund's net assets. The Fund may not write covered call and put option contracts in excess of 20% of its net assets. The Fund's compliance with these limitations is only calculated at the time any new position is added, with the result that the limitations may be exceeded if derivative positions held by the Fund appreciate after the new position is added.

Principal Risks

You May Want to Invest in the Fund if:

- you are pursuing a long term investment goal
- you are seeking current income and appreciation of capital
- you are seeking to preserve assets in "down" markets
- you are seeking a fund with a flexible investment strategy that can invest in either equity or debt securities as part of your overall investment strategy
- you are able to tolerate the risks associated with significant investments in foreign securities, high-yield bonds, derivatives, and convertible securities

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not guaranteed; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Convertible Securities Risk.** Convertible securities provide higher yields than the underlying common stock, but generally offer lower yields than nonconvertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates and, in addition, fluctuates in relation to the underlying common stock.

-
- **Derivatives Risk.** Derivatives risk is a combination of several risks, including the risks that: (1) an investment in a derivative instrument will not correlate well with the performance of the securities or asset class to which the Fund seeks exposure, (2) a derivative instrument entailing leverage may result in a loss greater than the principal amount invested, and (3) derivatives not traded on an exchange may be subject to credit risk, as well as liquidity risk and the related risk that the instrument is difficult or impossible to value accurately. The methodology the Fund uses to establish the fair value of a derivative may result in a value materially different from the value obtained using an alternative methodology.
 - **Equity Risk.** Equity risk is the risk that the prices of the securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances.
 - **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs. These risks are more pronounced in the securities of companies located in emerging markets.
 - **High Yield Securities Risk.** High yield securities may have fewer protective provisions and are generally riskier and less liquid than higher rated securities. Issuers of these securities may have difficulty making principal and interest payments when due in the event of a downturn in the economy or unanticipated corporate developments.
 - **Interest Rate Risk, Maturity Risk, and Credit Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. It is likely that there will be less governmental action in the near future to maintain low interest rates. The negative impact on fixed income securities from the resulting rate increases for that and other reasons could be swift and significant. The magnitude of the increase or decline will often be greater for longer term debt securities than shorter term debt securities. It is also possible that the issuer of a debt security will not be able to make interest and principal payments when due.
 - **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
 - **Market Risk.** The risk that the securities markets will fluctuate, sometimes rapidly and unpredictably based on overall economic conditions and other factors.
 - **Portfolio Turnover Risk.** High portfolio turnover may result in increased transaction costs to the Fund, which may result in higher fund expenses and lower total returns. The sale of portfolio securities also may result in the recognition of capital gain, which will be taxable to shareholders when distributed to them, or loss.
 - **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
 - **Rising Stock Market Risk.** The Fund currently anticipates seeking profits from a major U.S. equity market decline through a variety of investment practices. Accordingly, in rising markets its risk of loss will be greater than in declining stock markets.
 - **Short Sale Risk.** A "short sale" is the sale by the Fund of a security which has been borrowed from a third party on the expectation that the market price will drop. If the price of the security rises, the Fund may have to cover short positions at a higher price than the short sale price, resulting in a loss.
 - **U.S. Treasury Securities Risk.** The Fund, from time to time, may invest a portion of its assets in U.S. Treasury securities. U.S. Treasury securities may be subject to fluctuations and as a result, the Fund may experience losses with respect to its holdings of U.S. Treasury securities.

Performance

The bar chart and table that follow provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for one year, five years, and ten years compared with those of a broad based securities market index. As with all mutual funds, the Fund's past performance (before and after taxes) does not predict how the Fund will perform in the future. Updated information on the Fund's results can be obtained by visiting www.gabelli.com.

Sales loads are not reflected in the above chart. If sales loads were reflected, the Fund's returns would have been less than those shown.

During the calendar years shown in the bar chart, the highest return for a quarter was 32.13% (quarter ended December 31, 2008), and the lowest return for a quarter was (16.61)% (quarter ended September 30, 2009).

Year to date total return for the six months ended June 30, 2018 was (3.27)%.

Average Annual Total Returns
(for the years ended December 31, 2017, with
maximum sales charge, if applicable)

	<u>Past</u> <u>One Year</u>	<u>Past</u> <u>Five Years</u>	<u>Past</u> <u>Ten Years</u>
Class AAA Shares (first issued on 12/8/08)			
Return Before Taxes	(20.52)%	(18.52)%	(13.70)%
Class A Shares			
Return Before Taxes	(25.15)%	(19.55)%	(14.24)%
Return After Taxes on Distributions	(25.19)%	(19.51)%	(14.24)%
Return After Taxes on Distributions and Sale of Fund Shares	(14.26)%	(13.10)%	(8.70)%
Class C Shares			
Return Before Taxes	(21.79)%	(19.11)%	(14.33)%
Class I Shares			
Return Before Taxes	(20.41)%	(18.28)%	(13.49)%
Standard & Poor's ("S&P") 500 Index (reflects no deduction for fees, expenses, or taxes)	21.83%	15.79%	8.50%

The historical performance of Class A shares is used to calculate performance for Class AAA shares prior to their issuance. All classes of the Fund would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the "Return After Taxes on Distributions and Sale of Fund Shares" may be greater than "Return Before Taxes" and "Return After Taxes on Distributions" because the

investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts, including "Roth" IRAs and SEP IRAs (collectively, "IRAs"). After-tax returns are shown only for Class A shares. After-tax returns for other classes will vary due to the differences in expenses.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Charles L. Minter, a Director of Comstock Funds, Inc., has served as a portfolio manager of the Fund since April 1987. Mr. Dennis J. DeCore has served as a portfolio manager since December 2014.

Purchase and Sale of Fund Shares

The minimum initial investment for Class AAA, Class A, and Class C shares is \$1,000 (\$250 for IRAs or Coverdell Education Savings Plans). There is no minimum initial investment for Class AAA, Class A, and Class C shares in an automatic monthly investment plan.

Class I shares are available to investors with a minimum investment of at least \$500,000 and purchasing shares directly through G.distributors, LLC, the Fund's distributor ("G.distributors" or the "Distributor"), or investors purchasing Class I shares through brokers or financial intermediaries that have entered into selling agreements with the Distributor specifically with respect to Class I shares. The Distributor reserves the right to waive or change minimum investment amounts. There is no minimum for subsequent investments.

You can purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open for trading (a "Business Day"). You may purchase or redeem Fund shares by written request via mail (The Gabelli Funds, P.O. Box 8308, Boston, MA 02266-8308), personal delivery or overnight delivery (The Gabelli Funds, c/o DST, 30 Dan Road, Canton, MA 02021-2809), Internet, bank wire, or Automated Clearing House ("ACH") system. You may also purchase or redeem Fund shares by telephone at 800-GABELLI (800-422-3554) if you have an existing account with banking instructions on file.

Fund shares can also be purchased or sold through registered broker-dealers or other financial intermediaries that have entered into appropriate selling agreements with the Distributor. The broker-dealer or other financial intermediary will transmit these transaction orders to the Fund on your behalf and send you confirmation of your transactions and periodic account statements showing your investments in the Fund.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
