

The GAMCO Global Growth Fund

Shareholder Commentary – December 31, 2017

(Y)our Portfolio Management Team

Caesar M. P. Bryan

Howard F. Ward, CFA

To Our Shareholders,

Thank you for your investment in The GAMCO Global Growth Fund.

For the quarter ended December 31, 2017, the net asset value (“NAV”) per Class I Share of The GAMCO Global Growth Fund increased 6.5% compared with an increase of 5.7% for the Morgan Stanley Capital International (“MSCI”) All Country (“AC”) World Index. See page 2 for additional performance information.

It’s a familiar refrain. Stocks rose last quarter – the ninth consecutive quarterly gain - on the back of rising earnings, continued low interest rates and better than expected growth in Europe and Asia. Adding some torque to the market’s advance was enthusiasm over the tax reform package passed just before Christmas. The corporate tax cut element of this package will boost earnings by several percentage points in 2018. With the loss of the SALT (state and local tax) deduction, not all individual tax payers will benefit, but the boost to earnings, incentives to invest (via full expensing of certain capital expenditures items) and repatriate foreign profits are likely to elevate the slope of trend line GDP growth, at least for a bit. Investors appear delighted with this fiscal policy cocktail as both the economy and stock market exited 2017 with substantial confidence and momentum.

The Economy

According to the Bloomberg Economic Survey, the consensus estimate for real GDP growth in 2018 is 2.6%. This compares to a likely growth rate of about 2.4% for 2017. Three months ago economists were expecting growth of 2.3% in 2018. We suspect the positive revision of expectations from 2.3% to 2.6% will be further elevated to a number closer to if not exceeding 3.0%. The likely boost to capital investment from tax reform is the primary factor responsible for our more optimistic view of 2018 growth, although wage and employment gains, along with the lower individual tax rates, will provide an assist to consumer spending as

Average Annual Returns through December 31, 2017 (a)

	Quarter	1 Year	3 Year	5 Year	10 Year	15 Year	Since Inception (2/7/94)
Class I (GGGIX)	6.53%	29.84%	9.61%	12.14%	6.36%	10.24%	9.24%
Class AAA (GICPX)	6.40	29.02	8.86	11.53	5.92	9.94	9.05
MSCI AC World Index	5.73	23.97	9.30	10.80	4.65	9.00	7.32(b)
Lipper Global Large-Cap Growth Fund Classification	5.46	28.42	9.89	11.18	5.40	9.65	7.60
Class A (GGGAX)	6.37	28.98	8.85	11.53	5.92	9.94	9.06
With sales charge (c)	0.25	21.56	6.73	10.22	5.30	9.51	8.79
Class C (GGGCX)	6.18	28.04	8.03	10.69	5.13	9.11	8.44
With contingent deferred sales charge (d)	5.18	27.04	8.03	10.69	5.13	9.11	8.44

In the current prospectuses dated April 28, 2017, the gross expense ratios for Class AAA, A, C, and I Shares are 1.72%, 1.72%, 2.47%, and 1.47%, respectively, and the net expense ratios for these share classes after contractual reimbursements by Gabelli Funds, LLC, (the "Adviser") are 1.72%, 1.72%, 2.47%, and 1.00%, respectively. Class AAA and Class I Shares do not have a sales charge. The maximum sales charge for Class A Shares and Class C Shares is 5.75% and 1.00%, respectively.

- (a) *Returns represent past performance and do not guarantee future results. Total returns and average annual returns reflect changes in share price, reinvestment of distributions, and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Returns for Class I Shares would have been lower had the Adviser not reimbursed certain expenses. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days of purchase. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectuses contain information about these and other matters and should be read carefully before investing. To obtain a prospectus, please visit our website at www.gabelli.com. Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks. The Class AAA Share NAVs are used to calculate performance for the periods prior to the issuance of Class A Shares, Class C Shares, and Class I Shares on March 2, 2000, March 12, 2000, and January 11, 2008, respectively. The actual performance of the Class A and Class C Shares would have been lower due to the additional fees and expenses associated with these classes of shares. The actual performance of Class I Shares would have been higher due to lower expenses related to this class of shares. The MSCI AC World Index is an unmanaged market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI AC World Index consists of 45 country indices comprising 24 developed and 21 emerging market country indices. The Lipper Global Large-Cap Growth Fund Classification reflects the performance of mutual funds classified in this particular category. Dividends are considered reinvested. You cannot invest directly in an index.*
- (b) MSCI AC World Index since inception performance is a blend of Gross Performance excluding applicable taxes and Net Performance. This benchmark's Net Performance began on December 29, 2000.
- (c) Performance results include the effect of the maximum 5.75% sales charge at the beginning of the period.
- (d) Assuming payment of the 1% maximum contingent deferred sales charge imposed on redemptions made within one year of purchase.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, are available on our website at www.gabelli.com.

well. This does not mean to suggest we are on the cusp of returning to 3.0% or greater trend line growth. While a few quarters or a year at that level can be achieved with an important assist from tax reform, anything more requires a meaningful increase in productivity growth and that remains elusive.

Current expectations for S&P earnings in 2018 are about \$148, up from \$146 last quarter. This compares to operating earnings of about \$134 in 2017 (still to be reported at this writing). Positive revisions to expectations are likely here too. A number higher than \$150 is not out of the question for 2018. So earnings growth this year of at least 10% is likely and 15% or more is doable. This level of earnings growth provides a tailwind for the economy, especially with new capital investment incentives. At 4.1%, the unemployment rate cannot be expected to drop much further. Given the low unemployment rate, annualized wage rate gains should accelerate to 3% and eventually 4%. Typical recessions – as if anything is typical anymore – are usually preceded by 4% gains in wages.

Given the economy's healthy trajectory, it is no surprise the Federal Reserve Board is expected to continue on its course to normalize interest rates. This involves raising short-term rates and shrinking its \$4.5 trillion balance sheet (a move now referred to as QT or quantitative tightening). The Federal Reserve is currently expected to raise rates 3 times in 2018, possibly 4 if the economy or inflation runs hot. The first increase is expected in March. The big unknown is at what interest rate level does the tension between stocks and bonds become too much? How high does the 10 year Treasury yield have to go before the stock market cries uncle? For the last 4 years the 10 year Treasury has mostly traded in the 2.0% to 2.6% yield band, has averaged 2.2% and is currently 2.5%.

At the end of 2013 when the 10 year yield briefly hit 3.0%, the forward PE (price to earnings ratio) on the S&P was about 15. It's about 18 now. Given continued ultra-low rates abroad (the German 10 year yields 0.40% and the Japanese version yields 0.05%), demand for Treasuries may keep a lid on the 10 year yield even as the Federal Reserve tightens in response to rising growth or inflation expectations.

The Markets

We must be skeptical of any attempt at precision forecasting as far as the stock market is concerned. That goes for our forecasts as well. While there is no doubting the stock market's momentum entering 2018, a 5% pullback could happen anytime. We are already at a record 14 months plus since the last 5% drop, an event that we usually see 3 times each year. The complacency exhibited by stocks over the past year is remarkable and should not be expected to continue. We still have not had as much as a 3% fall since before the 2016 election. Feeling good today, which we do, has little if any bearing on how we will feel in May or July, let alone November.

We must not lose sight of the historical nature of this bull market. This is the second longest bull market in history (and the third longest economic expansion). If the market's advance continues into September, it will be the longest bull market in history, surpassing the roaring bull of 1990's fame (think dot com bubble). Slow and steady economic growth with historically low interest rates – engineered to a degree – has been the not so secret sauce of this bull market run. Is the market's slow and steady diet becoming not so slow? How long can we keep consumer price inflation in a bottle? Does financial asset inflation, which we have had aplenty, imply anything for consumer prices?

The S&P has returned 387% (price change plus reinvested dividends) since March 9, 2009. We have some concerns. The Federal Reserve is intent on removing liquidity from the economy and valuations are historically high unless we are at a “new normal” for interest rates and 10 year yields don’t go much above 3% (currently 2.5%). The total stock market capitalization as a percentage of GDP has only been higher in the dot com bubble that peaked in early 2000. Surely this is at least the top of the 8th inning for this gracefully aging bull market? Other major central banks are a step or two behind the Federal Reserve but for how long? How long until they are all in tightening mode?

The European Central Bank (ECB) has begun to reduce stimulus and the Bank of Japan (BOJ) is likely to follow suit before the year is out. Should yields rise overseas, as quantitative easing (QE) recedes, Treasuries may lose some appeal and pressure stocks. Trump talks tough on trade and may induce a trade war. Trump barks at North Korea and taunts them with the possibility of war. While the stock market has liked Trump’s deregulation and tax reform policies, it won’t like a trade war, let alone a shooting war with North Korea or anyone else.

Don’t forget the yield curve. Wall Streeters delight in sharing their yield curve insights. Should we view the ongoing flattening of the yield curve with alarm (the spread between 2 and 10 year Treasury yields has fallen from 291 basis points in 2010 to 50 basis points in early January)? Should the yield curve actually invert, which typically only happens prior to recession, alarms will ring on Wall Street. One does not take an inverted yield curve lightly, but we aren’t there yet. And then there is the Mueller investigation, which could represent a Black Swan of sorts and could lead to a Constitutional crisis. Such a crisis could be triggered by Trump himself should he fire Mueller or Deputy Attorney General Rod Rosenstein.

Portfolio Observations

We eliminated ten holdings during the quarter and added four for a net reduction of six, making for 72 issues in the portfolio. We sold NextEra Energy to better prepare for higher interest rates as NextEra is particularly sensitive to changes in rates. Celgene was sold to cut back on higher beta health care in what is likely to be a more difficult market environment this year. General Electric was sold when we determined a significant dividend cut was likely amid growing concern regarding the company’s earnings quality, a concern that grew during the quarter after the release of third quarter earnings. EOG Resources and Schlumberger were sold due to lack of confidence in their sustainable earnings growth. CK Hutchison was sold due to concerns of slowing growth in China and its related debt bubble. Liberty Global was eliminated to reduce overall media exposure. Reckitt Benckiser and Roche were sold due to disappointing earnings growth. Lockheed Martin was sold due to its valuation, which we deemed to be fully priced for the near term.

We established new positions in Rockwell Automation (1.1% of net assets as of December 30, 2017), Palo Alto Networks (0.3%), Danone (1.0%) and Adidas (1.4%). Rockwell is a leading supplier of products that are used in helping to run and manage highly automated factories. Based in Milwaukee, Rockwell received a takeover bid from Emerson Electric during the quarter which the company rejected. Palo Alto Networks, based in Santa Clara, is arguably the leading provider of cybersecurity software for the enterprise market. Cybersecurity software will be a fertile growth market for many years to come as threats from both state sponsored and private computer hackers continue to grow at a frightening pace. Danone, the French yogurt maker, has a portfolio of leading natural and organic food brands. Danone solidified its leading position in dairy with the acquisition of WhiteWave in April 2017. Danone is tracking ahead of schedule in delivering €300 million in synergies. Adidas has been a market share gainer in North America, where it has made a splash with its

retro-style Stan Smith sneaker. The company has a long runway to drive earnings growth as it brings its North American operating margins in-line with peers.

We trimmed three positions: Bristol-Myers Squibb (0.3%), Comcast (0.5%) and Charter Communications (0.4%). We increased a number of positions with the biggest increases being in the holdings of Disney (1.5%), Starbucks (1.5%), Nike (0.8%), Home Depot (2.1%), Alibaba (3.7%), First Republic Bank (0.8%) and UnitedHealth Group (2.9%). At quarter's end we were overweight (relative to the MSCI All Country World Index) Health Care, Technology and Consumer Discretionary. We were underweight Energy, Materials, Telecommunication Services and Utilities. We were essentially neutral in Consumer Staples, Real Estate and Industrials. From a cyclical perspective, we regard our positioning as modestly defensive with respect to stock selection while maintaining what is essentially a fully invested position given our skepticism with respect to market timing.

Performance Commentary

Our relatively positive fourth quarter performance was driven by some of our largest holdings. Holdings with the most positive impact on performance for the quarter (based upon price change and the size of the holding) were, in order, Tencent (4.9%), Microsoft (3.8%), Fanuc (3.4%), Adobe (2.7%), Alphabet (4.2%), UnitedHealth (2.9%), Home Depot (2.1%), Amazon (2.3%), Sherwin-Williams (1.8%) and LVMH (2.8%). The largest detractors from performance were, in order, Celgene, First Republic Bank, Liberty Global, Swatch Group (2.0%), Charter Communications, Reckitt Benckiser, Jardine Matheson (1.9%), Comcast, Adidas (1.4%), and CK Hutchison.

For the full year, the stocks with the most positive impact on performance were, in order, Tencent, Facebook (4.5%), Keyence (3.7%), Adobe, Alphabet, Microsoft, LVMH, Alibaba, Amazon, and Visa (2.2%). Likewise, the most negative contributors for the year were, in order, Schlumberger* Celgene*, O'Reilly Auto*, AutoZone*, Subaru*, General Electric*, Adidas, WPP*, Snap-on* and BP*

In Conclusion

We have mixed emotions about this year. Both the economy and stock market enter the year with good momentum. Expectations are high, however, begging the question as to can they be met? The Federal Reserve is withdrawing liquidity and wants to normalize interest rates. It is hard to see price/earnings multiples expanding from already lofty levels while the Federal Reserve is slowly removing the punch bowl. Investors are on a tax cut high of sorts in early January. Earnings expectations have ratcheted higher, increasing the odds of disappointment. Market volatility has been historically low. We must believe volatility will rise. China's growth appears to be slowing. What are the implications for Japan, its largest trading partner? Has Europe's growth rate peaked? Can the reality of the tax package live up to its billing? What are the unintended consequences?

As good as investors feel today, we expect them to feel less good within six months. Will Trump's trade policy maneuvers hurt global growth and dampen investor sentiment? Protectionist measures, if enacted, are unlikely to achieve their desired ends because other countries retaliate. Are we being too downbeat? That's possible. We were surprised at the market's unrelenting rise last year. Maybe we are all underestimating the impact on growth from tax reform. It's possible the bull market rises through September, becoming the longest bull market in history. Maybe the Federal Reserve sees growth slowing and backs off.

*No longer held as of December 31, 2017

We will continue to manage the portfolio with a defensive growth tilt. We know we can't call the market with precision. We want you to understand our thinking on the major issues we expect to confront this year. History tells us we shouldn't actually feel relaxed about stocks when so many others feel good about them. In the context of what will be a nine year bull market come March, we know we are in the late innings. But in those late euphoric innings of a bull market, stocks can rise materially. A skeptic could fairly ask if last year was in fact the euphoric advance we speak of. The answer is yes but some will argue that it didn't meet the definition of a euphoric rise. We don't know, last year was the eighth year of a bull market and Boeing rose 90%, NVIDIA 81%, Amazon 55%, Facebook 53%, Alphabet 46%, MasterCard 46% and we could go on. This market doesn't owe us anything.

Our focus will be on our companies' earnings expectations both for 2018 and 2019, the direction and level of inflation and interest rates and the slope of the yield curve. At the risk of sounding repetitive, we want to thank you again for your investment in the fund and wish you good health and higher stocks in 2018!

Global Allocation

The accompanying chart presents the Fund's holdings by geographic region as of December 31, 2017. The geographic allocation will change based on current global market conditions. Countries and/or regions represented in the chart and discussed in this commentary may or may not be included in the Fund's future portfolio.

HOLDINGS BY GEOGRAPHIC REGION

Let's Talk Stocks

The following are stock specifics on selected holdings of our Fund. Favorable earnings prospects do not necessarily translate into higher stock prices, but they do express a positive trend that we believe will develop over time. Individual securities mentioned are not necessarily representative of the entire portfolio. For the following holdings, the percentage of net assets and their share prices stated in U.S. dollar equivalent terms are presented as of December 31, 2017.

Adobe Systems (2.7% of net assets as of December 31, 2017) (ADBE – \$175.24 – NASDAQ) is the global leader in digital marketing and digital media solutions. Adobe has the most comprehensive end-to-end solution for digital marketing. Its tools allow customers to create digital content, deploy it across media and devices, and measure and optimize it over time. Adobe has successfully transitioned from a product-based desktop business to a cloud-based subscription business. Over 80% of total revenue is now recurring and that number is poised to climb higher as 7 million customers worldwide are yet to migrate. The demand for design capabilities continues to rise at a dramatic pace, as reflected in Adobe's large and growing total addressable market of \$64 billion in 2019.

Alibaba (3.7%) (BABA – \$172.43 – NYSE) operates the largest global ecommerce system and is a primary beneficiary of the growing, consumer-driven, middle class in China. In addition to the portfolio of ecommerce marketplace portals, Alibaba's ecosystem includes the largest third-party payment service provider in China (Alipay), online marketing technology platforms, and hyperscale public cloud computing similar to Amazon's AWS.

Alphabet (4.2%) (GOOG/GOOGL – \$1046.40/\$1053.40 – NASDAQ) is the parent company of Google, the world's leading internet search engine. The company benefits from a powerful competitive moat in one of the best secular markets, digital advertising, in which Google maintains ~45% market share. The company generates revenue by providing advertisers the opportunity to deliver targeted and measurable advertising. Alphabet's healthy core search business has allowed the company to pursue new market opportunities such as streaming video (YouTube Red), life sciences (Verily), autonomous driving (Waymo) and a variety of other "moonshot" projects.

Facebook's (4.5%) (FB – \$176.46 – NASDAQ) mission is to give people the power to share and make the world more open and connected. Facebook's unique cache of user profiles creates a powerful targeted advertising platform. As of September 30, 2017, Facebook had 2.1 billion monthly active users (MAUs) worldwide. Facebook continues to grow its worldwide user base at a mid-teens rate, largely driven by the proliferation of mobile devices in the emerging markets. Users are spending more time on the platform, driven largely by the recent emphasis on video. Facebook is able to drive pricing power by continuously improving the effectiveness of its ads. Meanwhile, there remains runway to further monetize Facebook properties Instagram, Messenger and WhatsApp.

FANUC (3.4%) (6954.T – \$240.16/¥27,060 – Tokyo Stock Exchange) manufactures factory automation systems, equipment and robots, including robots used in precision assembly and injection molding machines. The company's tools are primarily used in the machine tool and automotive industries, with customers including OEMs GM, Ford and Volkswagen.

KEYENCE (3.7%) (6861.T – \$560.20/¥63,120 – Tokyo Stock Exchange) – Japan) has steadily grown since 1974 to become an innovative leader in the development and manufacturing of industrial automation and inspection equipment worldwide. Products consist of code readers, laser markers, machine vision systems, measuring systems, microscopes, sensors, and static eliminators. Today, KEYENCE serves over 200,000 customers in 70 countries around the world.

LVMH (2.8%) (LVMH.P – \$294.44/€245.40 – Euronext Paris) is a leading luxury brand with a balanced portfolio of products and diverse geographical revenue. The unique portfolio is comprised of Wines & Spirits, Fashion & Leather Goods, Perfumes & Cosmetics and Watches & Jewelry. Approximately 27% of revenue is derived from Asia, where the brands are resonating well, especially amongst the Chinese.

Microsoft (3.8%) (MSFT – \$85.54 – NASDAQ) is the world's largest software company and develops software products for computing devices ranging from PC's to servers to its Xbox game console. Microsoft is transitioning to a subscription business with high recurring revenue. The transition from Office to cloud-based Office 365 is resulting in user base growth and per user pricing lift. Microsoft's Azure is emerging as a rapidly growing public cloud winner behind Amazon's AWS. The recent acquisition of LinkedIn will allow Microsoft to integrate data from LinkedIn's economic graph with Microsoft's professional cloud.

Tencent Holdings (4.9%) (700HK – \$51.97/HKD 406.00 – Hong Kong Stock Exchange), headquartered in Shenzhen, is one of the largest internet companies in the world and the biggest computer game publisher in the world. The company infiltrates every aspect of digital life for the mobile-first Chinese consumer. Its offerings include social network platforms, instant messaging services, e-commerce marketplaces, online video games, mobile payment applications and online advertising. As of December 31, 2016, Tencent's QQ web portal had 868 million monthly active users (MAUs); the Weixin and WeChat apps, combined, had 889 million MAUs; Qzone, its social media network, had 638 MAUs.

UnitedHealth Group (2.9%) (UNH – \$220.46 – NYSE) is one of the largest and most diversified managed care companies in the United States. Its high growth Optum services business provides wellness and care management programs, financial services, information technology solutions and pharmacy benefit management (PBM) services to an additional 115 million customers.

Minimum Initial Investment – \$1,000

The Fund's minimum initial investment for regular accounts is \$1,000. There are no subsequent investment minimums. No initial minimum is required for those establishing an Automatic Investment Plan. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days after the date of purchase. See the prospectuses for more details.

www.gabelli.com

Please visit us on the Internet. Our homepage at www.gabelli.com contains information about GAMCO Investors, Inc., the Gabelli/GAMCO Mutual Funds, IRAs, 401(k)s, current and historical quarterly reports, closing prices, and other current news.

The Fund's daily NAVs are available in the financial press and each evening after 7:00 PM (Eastern Time) by calling 800-GABELLI (800-422-3554). Please call us during the business day, between 8:00 AM – 7:00 PM (Eastern Time), for further information.

We welcome your comments and questions via e-mail at info@gabelli.com. You may sign up for our e-mail alerts at www.gabelli.com and receive early notice of quarterly report availability, news events, media sightings, and mutual fund prices and performance.

e-delivery

We are pleased to offer electronic delivery of Gabelli fund documents. Direct shareholders of our mutual funds can elect to receive their Annual and Semiannual Reports, Manager Commentaries, and Prospectuses via e-delivery. For more information or to sign up for e-delivery, please visit our website at www.gabelli.com.

Multi-Class Shares

GAMCO Global Series Funds began offering additional classes of Fund shares in March 2000. Class AAA Shares are no-load shares offered directly through selected broker/dealers. Class A and Class C Shares are targeted to the needs of investors who seek advice through financial consultants. Class I Shares are available directly through the Fund's distributor or brokers that have entered into selling agreements specifically with respect to Class I Shares. The Board of Directors determined that expanding the types of Fund shares available through various distribution options would enhance the ability of the Fund to attract additional investors.

Gabelli/GAMCO Funds and Your Personal Privacy

Who are we?

The Gabelli/GAMCO Funds are investment companies registered with the Securities and Exchange Commission under the Investment Company Act of 1940. We are managed by Gabelli Funds, LLC and GAMCO Asset Management Inc., which are affiliated with GAMCO Investors, Inc. GAMCO Investors, Inc. is a publicly held company that has subsidiaries that provide investment advisory services for a variety of clients.

What kind of non-public information do we collect about you if you become a fund shareholder?

If you apply to open an account directly with us, you will be giving us some non-public information about yourself. The non-public information we collect about you is:

- *Information you give us on your application form.* This could include your name, address, telephone number, social security number, bank account number, and other information.
- *Information about your transactions with us, any transactions with our affiliates, and transactions with the entities we hire to provide services to you.* This would include information about the shares that you buy or redeem. If we hire someone else to provide services—like a transfer agent—we will also have information about the transactions that you conduct through them.

What information do we disclose and to whom do we disclose it?

We do not disclose any non-public personal information about our customers or former customers to anyone other than our affiliates, our service providers who need to know such information, and as otherwise permitted by law. If you want to find out what the law permits, you can read the privacy rules adopted by the Securities and Exchange Commission. They are in volume 17 of the Code of Federal Regulations, Part 248. The Commission often posts information about its regulations on its website, www.sec.gov.

What do we do to protect your personal information?

We restrict access to non-public personal information about you to the people who need to know that information in order to provide services to you or the fund and to ensure that we are complying with the laws governing the securities business. We maintain physical, electronic, and procedural safeguards to keep your personal information confidential.

The GAMCO Global Growth Fund

Annual Report — December 31, 2017
(Y)our Portfolio Management Team

Caesar M. P. Bryan

Howard F. Ward, CFA

To Our Shareholders,

For the year ended December 31, 2017, the net asset value (“NAV”) per Class I Share of The GAMCO Global Growth Fund increased 29.8% compared with an increase of 24.0% for the Morgan Stanley Capital International (“MSCI”) All Country (“AC”) World Index. Other classes of shares are available. See page 3 for performance information for all classes of shares.

Enclosed are the financial statements, including the schedule of investments, as of December 31, 2017.

Performance Discussion (Unaudited)

The Fund’s investment objective is to provide investors with appreciation of capital. Current income is a secondary objective of the Fund.

The Fund’s investment strategy is to invest at least 65% of its total assets in common stocks of companies which the portfolio managers believe are likely to have rapid growth in revenues and earnings and potential for above average capital appreciation or are undervalued. The Fund invests primarily in common stocks of foreign and domestic small-capitalization, mid-capitalization, and large-capitalization issuers. As a “global” fund, the Fund invests in securities of issuers, located in at least three countries, and at least 40% of the Fund’s total net assets are invested in securities of non-U.S. issuers.

After a sluggish start to the year, the U.S. economy grew at a faster than anticipated 3.1% and 3.3% in the second and third quarters, respectively. At 4.1%, unemployment stands at a ten-year low while consumer wealth of nearly \$97 trillion is at an all-time high. Housing starts of 1.3 million units continue their steady increase, but remain comfortably below the prior peak of 2.2 million units. The U.S. is in its ninth year of economic expansion, making this the third longest expansion at 101 months, trailing only 1961-1969 and 1991-2001 (those expansions were 106 and 120 months, respectively). Perhaps as important, the global economy is in synchronized expansion, which benefited the Fund. For all of 2017, the Eurozone is set to grow 2.2%, its fastest since 2007 while Japan has accelerated to 1.5%; China is likely to post growth of 6.7%. The stock market rose in the latter half of the year, following President Trump’s agenda on tax reform, deregulation, and fiscal stimulus. The Federal Reserve raised the Federal Funds rate for the fifth time since October of 2014, now ranging from 1.25%-1.50%.

Selected holdings that contributed positively to performance in 2017 were: Tencent Holding Ltd. (4.9% of net assets as of December 31, 2017) which had strong business and revenue growth across multiple business lines including games, digital content, online advertising and payment related services; Facebook Inc. (4.5%) had robust top line growth and digital advertising spending continued to grow at a relatively fast pace; and Keyence Corp. (3.7%) which had record sales, high profit metrics and a relatively strong balance sheet.

Some of our weaker performing holdings during the year were: Schlumberger Ltd. (no longer held as of December 31, 2017) which declined on the ensuing restructuring of the dynamics in the energy markets, as well as the transition to natural gas and renewables and unconventional drilling methods have taken their toll on exploration and production; Celgene Corp. (no longer held) which pipeline setbacks have hampered much of the company's potential upside; and Subaru Corp. (no longer held) which had inspection scandals, a series of compliance failings in regards to quality control, prompting calls for better governance.

Thank you for your investment in The GAMCO Global Growth Fund.

We appreciate your confidence and trust.

Comparative Results

Average Annual Returns through December 31, 2017 (a) (Unaudited)

	1 Year	5 Year	10 Year	15 Year	Since Inception (2/7/94)
Class I (GGGIX)	29.84%	12.14%	6.36%	10.24%	9.24%
Class AAA (GICPX)	29.02	11.53	5.92	9.94	9.05
MSCI AC World Index	23.97	10.80	4.65	9.00	7.32(b)
Lipper Global Large-Cap Growth Fund Classification	28.42	11.18	5.40	9.65	7.60
Class A (GGGAX)	28.98	11.53	5.92	9.94	9.06
With sales charge (c)	21.56	10.22	5.30	9.51	8.79
Class C (GGGCX)	28.04	10.69	5.13	9.11	8.44
With contingent deferred sales charge (d)	27.04	10.69	5.13	9.11	8.44

In the current prospectuses dated April 28, 2017, the gross expense ratios for Class AAA, A, C, and I Shares are 1.72%, 1.72%, 2.47%, and 1.47%, respectively, and the net expense ratios for these share classes after contractual reimbursements by Gabelli Funds, LLC, (the "Adviser") are 1.72%, 1.72%, 2.47%, and 1.00%, respectively. See page 10 for the expense ratios for the year ended December 31, 2017. Class AAA and Class I Shares do not have a sales charge. The maximum sales charge for Class A Shares and Class C Shares is 5.75% and 1.00%, respectively.

- (a) Returns represent past performance and do not guarantee future results. Total returns and average annual returns reflect changes in share price, reinvestment of distributions, and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Returns for Class I Shares would have been lower had the Adviser not reimbursed certain expenses. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days after the date of purchase. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectuses contain information about these and other matters and should be read carefully before investing. To obtain a prospectus, please visit our website at www.gabelli.com. Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks. The Class AAA Share NAVs are used to calculate performance for the periods prior to the issuance of Class A Shares, Class C Shares, and Class I Shares on March 2, 2000, March 12, 2000, and January 11, 2008, respectively. The actual performance of the Class A and Class C Shares would have been lower due to the additional fees and expenses associated with these classes of shares. The actual performance of Class I Shares would have been higher due to lower expenses related to this class of shares. The MSCI AC World Index is an unmanaged market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI AC World Index consists of 45 country indices comprising 24 developed and 21 emerging market country indices. The Lipper Global Large-Cap Growth Fund Classification reflects the performance of mutual funds classified in this particular category. Dividends are considered reinvested. You cannot invest directly in an index.
- (b) MSCI AC World Index since inception performance is a blend of Gross Performance excluding applicable taxes and Net Performance. This benchmark's Net Performance began on December 29, 2000.
- (c) Performance results include the effect of the maximum 5.75% sales charge at the beginning of the period.
- (d) Assuming payment of the 1% maximum contingent deferred sales charge imposed on redemptions made within one year of purchase.

COMPARISON OF CHANGE IN VALUE OF A \$10,000 INVESTMENT IN THE GAMCO GLOBAL GROWTH FUND (CLASS AAA SHARES), MSCI AC WORLD INDEX, AND LIPPER GLOBAL LARGE-CAP GROWTH FUND CLASSIFICATION (Unaudited)

* Past performance is not predictive of future results. The performance tables and graph do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

The GAMCO Global Growth Fund

Disclosure of Fund Expenses (Unaudited)

For the Six Month Period from July 1, 2017 through December 31, 2017

Expense Table

We believe it is important for you to understand the impact of fees and expenses regarding your investment. All mutual funds have operating expenses. As a shareholder of a fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports (like this one), among others. Operating expenses, which are deducted from a fund's gross income, directly reduce the investment return of a fund. When a fund's expenses are expressed as a percentage of its average net assets, this figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period.

The Expense Table below illustrates your Fund's costs in two ways:

Actual Fund Return: This section provides information about actual account values and actual expenses. You may use this section to help you to estimate the actual expenses that you paid over the period after any fee waivers and expense reimbursements. The "Ending Account Value" shown is derived from the Fund's **actual** return during the past six months, and the "Expenses Paid During Period" shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for your Fund under the heading "Expenses Paid During Period" to estimate the expenses you paid during this period.

Hypothetical 5% Return: This section provides information about hypothetical account values and

hypothetical expenses based on the Fund's actual expense ratio. It assumes a hypothetical annualized return of 5% before expenses during the period shown. In this case – because the hypothetical return used is **not** the Fund's actual return – the results do not apply to your investment and you cannot use the hypothetical account value and expense to estimate the actual ending account balance or expenses you paid for the period. This example is useful in making comparisons of the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs such as sales charges (loads), redemption fees, or exchange fees, if any, which are described in the Prospectus. If these costs were applied to your account, your costs would be higher. Therefore, the 5% hypothetical return is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. The "Annualized Expense Ratio" represents the actual expenses for the last six months and may be different from the expense ratio in the Financial Highlights which is for the year ended December 31, 2017.

	Beginning Account Value 07/01/17	Ending Account Value 12/31/17	Annualized Expense Ratio	Expenses Paid During Period*
The GAMCO Global Growth Fund				
Actual Fund Return				
Class AAA	\$1,000.00	\$1,121.80	1.63%	\$ 8.72
Class A	\$1,000.00	\$1,121.80	1.63%	\$ 8.72
Class C	\$1,000.00	\$1,117.60	2.37%	\$12.65
Class I	\$1,000.00	\$1,125.30	1.00%	\$ 5.36
Hypothetical 5% Return				
Class AAA	\$1,000.00	\$1,016.99	1.63%	\$ 8.29
Class A	\$1,000.00	\$1,016.99	1.63%	\$ 8.29
Class C	\$1,000.00	\$1,013.26	2.37%	\$12.03
Class I	\$1,000.00	\$1,020.16	1.00%	\$ 5.09

* Expenses are equal to the Fund's annualized expense ratio for the last six months multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184 days), then divided by 365.

Summary of Portfolio Holdings (Unaudited)

The following table presents portfolio holdings as a percent of net assets as of December 31, 2017:

The GAMCO Global Growth Fund

Information Technology	36.4%	Materials	2.3%
Consumer Discretionary	19.1%	U.S. Government Obligations	0.4%
Health Care	12.8%	Other Assets and Liabilities (Net)	<u>(0.2)%</u>
Industrials	11.3%		<u>100.0%</u>
Consumer Staples	8.3%		
Financials	6.0%		
Real Estate	3.6%		

The Fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (the "SEC") for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain this information at www.gabelli.com or by calling the Fund at 800-GABELLI (800-422-3554). The Fund's Form N-Q is available on the SEC's website at www.sec.gov and may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Proxy Voting

The Fund files Form N-PX with its complete proxy voting record for the twelve months ended June 30, no later than August 31 of each year. A description of the Fund's proxy voting policies, procedures, and how the Fund voted proxies relating to portfolio securities is available without charge, upon request, by (i) calling 800-GABELLI (800-422-3554); (ii) writing to The Gabelli Funds at One Corporate Center, Rye, NY 10580-1422; or (iii) visiting the SEC's website at www.sec.gov.

† Total return represents aggregate total return of a hypothetical \$1,000 investment at the beginning of the year and sold at the end of the year including reinvestment of distributions and does not reflect the applicable sales charges.

(a) Per share amounts have been calculated using the average shares outstanding method.

(b) Amount represents less than \$0.005 per share.

(c) The Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. For the years ended December 31, 2017, 2016, and 2015, there was no impact on the expense ratios.

(d) During the year ended December 31, 2016, the Fund received reimbursements of custody expenses paid in prior years. Had such reimbursement (allocated by relative net asset values of the Fund's share classes) been included in that period, the expense ratios would have been 1.20%(Class AAA), 1.21%(Class A), 1.96%(Class C), and 0.47%(Class I).

(e) Under an expense reimbursement agreement with the Adviser, the Adviser reimbursed certain Class I expenses to the Fund of \$19,466, \$14,648, \$12,486, and \$3,489 for the years ended December 31, 2017, 2016, 2015, and 2014, respectively.

See accompanying notes to financial statements.

The GAMCO Global Growth Fund

Notes to Financial Statements

1. Organization. The GAMCO Global Growth Fund, a series of GAMCO Global Series Funds, Inc. (the “Corporation”), was incorporated on July 16, 1993 in Maryland. The Fund is a non-diversified open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and one of four separately managed portfolios (collectively, the “Portfolios”) of the Corporation. The Fund’s primary objective is capital appreciation. The Fund commenced investment operations on February 7, 1994.

2. Significant Accounting Policies. As an investment company, the Fund follows the investment company accounting and reporting guidance, which is part of U.S. generally accepted accounting principles (“GAAP”) that may require the use of management estimates and assumptions in the preparation of its financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market’s official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Directors (the “Board”) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the “Adviser”).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt obligations for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Such debt obligations are valued through prices provided by a Pricing Service approved by the Board. Certain securities are valued principally using dealer quotations.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value American Depositary Receipt securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

The Fund employs a fair value model to adjust prices to reflect events affecting the values of certain portfolio securities which occur between the close of trading on the principal market for such securities (foreign exchanges and over-the-counter markets) at the time when net asset values of the Fund are determined. If the Fund’s valuation committee believes that a particular event would materially affect net asset value, further adjustment is considered.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Board's determinations as to the fair value of investments).

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in the aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The closing price is adjusted from the local close, therefore, such securities are classified as Level 2 in the fair value hierarchy presented below. The summary of the Fund's investments in securities by inputs used to value the Fund's investments as of December 31, 2017 is as follows:

	Valuation Inputs			Total Market Value at 12/31/17
	Level 1 Quoted Prices	Level 2 Observable Inputs	Other Significant Inputs	
INVESTMENTS IN SECURITIES:				
ASSETS (Market Value):				
Common Stocks (a)	\$88,454,258	—	—	\$88,454,258
U.S. Government Obligations	—	\$394,023	—	394,023
TOTAL INVESTMENTS IN SECURITIES – ASSETS	\$88,454,258	\$394,023	—	\$88,848,281

(a) Please refer to the Schedule of Investments for the industry classifications of these portfolio holdings.

The Fund did not have transfers between Level 1 and Level 2 during the year ended December 31, 2017. The Fund's policy is to recognize transfers among Levels as of the beginning of the reporting period.

There were no Level 3 investments held at December 31, 2017 or December 31, 2016.

Additional Information to Evaluate Qualitative Information.

General. The Fund uses recognized industry pricing services – approved by the Board and unaffiliated with the Adviser – to value most of its securities, and uses broker quotes provided by market makers of securities not valued by these and other recognized pricing sources. Several different pricing feeds are received to value domestic equity securities, international equity securities, preferred equity securities, and fixed income securities. The data within these feeds are ultimately sourced from major stock exchanges and trading systems where these securities trade. The prices supplied by external sources are checked by obtaining quotations or actual transaction prices from market participants. If a price obtained from the pricing source is deemed unreliable, prices will be sought from another pricing service or from a broker/dealer that trades that security or similar securities.

Fair Valuation. Fair valued securities may be common or preferred equities, warrants, options, rights, or fixed income obligations. Where appropriate, Level 3 securities are those for which market quotations are not available, such as securities not traded for several days, or for which current bids are not available, or which are restricted as to transfer. When fair valuing a security, factors to consider include recent prices of comparable securities that are publicly traded, reliable prices of securities not publicly traded, the use of valuation models,

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

current analyst reports, valuing the income or cash flow of the issuer, or cost if the preceding factors do not apply. The circumstances of Level 3 securities are frequently monitored to determine if fair valuation measures continue to apply.

The Adviser reports quarterly to the Board the results of the application of fair valuation policies and procedures. These may include backtesting the prices realized in subsequent trades of these fair valued securities to fair values previously recognized.

Foreign Currency Translations. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at current exchange rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/(loss) on investments.

Foreign Securities. The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

Foreign Taxes. The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

Securities Transactions and Investment Income. Securities transactions are accounted for on the trade date with realized gain or loss on investments determined by using the identified cost method. Interest income (including amortization of premium and accretion of discount) is recorded on an accrual basis. Premiums and discounts on debt securities are amortized using the effective yield to maturity method. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities that are recorded as soon after the ex-dividend date as the Fund becomes aware of such dividends.

Determination of Net Asset Value and Calculation of Expenses. Certain administrative expenses are common to, and allocated among, various affiliated funds. Such allocations are made on the basis of each fund's average net assets or other criteria directly affecting the expenses as determined by the Adviser pursuant to procedures established by the Board.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

In calculating NAV per share of each class, investment income, realized and unrealized gains and losses, redemption fees, and expenses other than class specific expenses are allocated daily to each class of shares based upon the proportion of net assets of each class at the beginning of each day. Distribution expenses are borne solely by the class incurring the expense.

Distributions to Shareholders. Distributions to shareholders are recorded on the ex-dividend date. Distributions to shareholders are based on income and capital gains as determined in accordance with federal income tax regulations, which may differ from income and capital gains as determined under GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, timing differences, and differing characterizations of distributions made by the Fund. Distributions from net investment income for federal income tax purposes include net realized gains on foreign currency transactions. These book/tax differences are either temporary or permanent in nature. To the extent these differences are permanent, adjustments are made to the appropriate capital accounts in the period when the differences arise. Permanent differences were primarily due to net operating losses. These reclassifications have no impact on the NAV of the Fund. These reclassifications have no impact on the NAV of the Fund. For the year ended December 31, 2017, reclassifications were made to decrease accumulated distributions in excess of net investment income by \$321,947 and increase accumulated net realized gain on investments and foreign currency transactions by \$1,023, with an offsetting adjustment to paid-in capital.

The tax character of distributions paid during the years ended December 31, 2017 and 2016 was as follows:

	Year Ended December 31, 2017	Year Ended December 31, 2016
Distributions paid from:		
Ordinary income (inclusive of short term capital gains)	—	\$ 352,241
Net long term capital gains	\$2,715,285	4,453,143
Return of capital	10,148	—
Total distributions paid	<u>\$2,725,433</u>	<u>\$4,805,384</u>

Provision for Income Taxes. The Fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). It is the policy of the Fund to comply with the requirements of the Code applicable to regulated investment companies and to distribute substantially all of its net investment company taxable income and net capital gains. Therefore, no provision for federal income taxes is required.

At December 31, 2017, the components of accumulated earnings/losses on a tax basis were as follows:

Net unrealized appreciation on investments and foreign currency translations	\$33,567,940
Total	<u>\$33,567,940</u>

The Fund is permitted to carry capital losses forward for an unlimited period. Capital losses that are carried forward will retain their character as either short term or long term capital losses.

At December 31, 2017, the temporary difference between book basis and tax basis net unrealized appreciation on investments was due to deferral of losses from wash sales for tax purposes, mark-to-market adjustments on investments no longer considered a passive foreign investment company and basis adjustments for litigation gains.

The GAMCO Global Growth Fund Notes to Financial Statements (Continued)

The following summarizes the tax cost of investments and the related net unrealized appreciation at December 31, 2017:

	<u>Cost</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
Investments	\$55,280,824	\$33,994,299	\$(426,842)	\$33,567,457

The Fund is required to evaluate tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Fund as tax expense in the Statement of Operations if the tax positions were deemed not to meet the more-likely-than-not threshold. During the year ended December 31, 2017, the Fund did not incur any income tax, interest, or penalties. As of December 31, 2017, the Adviser has reviewed all open tax years and concluded that there was no impact to the Fund's net assets or results of operations. The Fund's federal and state tax returns for the prior three fiscal years remain open, subject to examination. On an ongoing basis, the Adviser will monitor the Fund's tax positions to determine if adjustments to this conclusion are necessary.

3. Investment Advisory Agreement and Other Transactions. The Fund has entered into an investment advisory agreement (the "Advisory Agreement") with the Adviser which provides that the Fund will pay the Adviser a fee, computed daily and paid monthly, at the annual rate of 1.00% of the value of its average daily net assets. In accordance with the Advisory Agreement, the Adviser provides a continuous investment program for the Fund's portfolio, oversees the administration of all aspects of the Fund's business and affairs, and pays the compensation of all Officers and Directors of the Fund who are affiliated persons of the Adviser.

The Adviser has contractually agreed to waive its investment advisory fee and/or reimburse expenses of Class I Shares to the extent necessary to maintain the total operating expenses (excluding brokerage, acquired fund fees and expenses, interest, taxes, and extraordinary expenses) until at least April 30, 2019 at no more than 1.00% of the value of its average daily net assets. For the year ended December 31, 2017, the Adviser reimbursed certain Class I Share expenses in the amount of \$19,466. In addition, the Fund has agreed, during the two year period following any waiver or reimbursement by the Adviser, to repay such amount to the extent, that after giving effect to the repayment, such adjusted annualized total operating expenses of the Fund would not exceed 1.00% of the value of the Fund's average daily net assets for Class I Shares. The agreement is renewable annually. At December 31, 2017, the cumulative amount which the Class I Shares may repay the Adviser, subject to the terms above, is \$34,114:

For the year ended December 31, 2016, expiring December 31, 2018	\$14,648
For the year ended December 31, 2017, expiring December 31, 2019	19,466
	<u>\$34,114</u>

The Corporation pays each Director who is not considered to be an affiliated person an annual retainer of \$6,000 plus \$1,000 for each Board meeting attended and they are reimbursed for any out of pocket expenses incurred in attending meetings. All Board committee members receive \$1,000 per meeting attended. The Chairman of the Audit Committee receives an annual fee of \$3,000, and the Lead Director receives an annual fee of \$2,000. A Director may receive a single meeting fee, allocated among the participating funds, for attending certain meetings held on behalf of multiple funds. Directors who are directors or employees of the Adviser or an affiliated company receive no compensation or expense reimbursement from the Corporation.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

4. Distribution Plan. The Fund's Board has adopted a distribution plan (the "Plan") for each class of shares, except for Class I Shares, pursuant to Rule 12b-1 under the 1940 Act. Under the Class AAA, Class A, and Class C Share Plans, payments are authorized to G.distributors, LLC (the "Distributor"), an affiliate of the Adviser, at annual rates of 0.25%, 0.25%, and 1.00%, respectively, of the average daily net assets of those classes, the annual limitations under each Plan. Such payments are accrued daily and paid monthly.

5. Portfolio Securities. Purchases and sales of securities during the year ended December 31, 2017, other than short term securities and U.S. Government obligations, aggregated \$34,180,773 and \$38,062,347, respectively.

6. Transactions with Affiliates and Other Arrangements. During the year ended December 31, 2017, the Distributor retained a total of \$2,889 from investors representing commissions (sales charges and underwriting fees) on sales and redemptions of Fund shares.

The Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. The amount of such expenses paid through this directed brokerage arrangement during this period was \$1,822.

The cost of calculating the Fund's NAV per share is a Fund expense pursuant to the Advisory Agreement. During the year ended December 31, 2017, the Fund paid or accrued \$45,000 to the Adviser in connection with the cost of computing the Fund's NAV.

7. Line of Credit. The Fund participates in an unsecured line of credit which expires on March 8, 2018 and may be renewed annually, of up to \$75,000,000 under which it may borrow up to 10% of its net assets from the custodian for temporary borrowing purposes. Borrowings under this arrangement bear interest at a floating rate equal to the higher of the overnight Federal Funds rate plus 125 basis points or the 30-day LIBOR plus 125 basis points in effect on that day. This amount, if any, would be included in "Interest expense" in the Statement of Operations. At December 31, 2017, there were no borrowings outstanding under the line of credit.

The average daily amount of borrowings outstanding under the line of credit during the year ended December 31, 2017 was \$10,384, with a weighted average interest rate of 2.25%. The maximum amount borrowed at any time during the year ended December 31, 2017 was \$575,000.

8. Capital Stock. The Fund offers four classes of shares – Class AAA Shares, Class A Shares, Class C Shares, and Class I Shares. Class AAA and Class I Shares are offered without a sales charge. Class A Shares are subject to a maximum front-end sales charge of 5.75%, and Class C Shares are subject to a 1.00% contingent deferred sales charge for one year after purchase.

The Fund imposes a redemption fee of 2.00% on all classes of shares that are redeemed or exchanged on or before the seventh day after the date of a purchase. The redemption fee is deducted from the proceeds otherwise payable to the redeeming shareholders and is retained by the Fund as an increase in paid-in capital. The redemption fees retained by the Fund during the years ended December 31, 2017 and 2016, if any, can be found in the Statement of Changes in Net Assets under Redemption Fees.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

9. Indemnifications. The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

10. Subsequent Events. Management has evaluated the impact on the Fund of all subsequent events occurring through the date the financial statements were issued and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

The GAMCO Global Growth Fund

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of
The GAMCO Global Growth Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of The GAMCO Global Growth Fund (the "Fund") (one of the funds constituting GAMCO Global Series Funds, Inc. (the "Corporation")), including the schedule of investments, as of December 31, 2017, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund (one of the funds constituting GAMCO Global Series Funds, Inc.) at December 31, 2017, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Corporation is not required to have, nor were we engaged to perform, an audit of the Corporation's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2017, by correspondence with the custodian. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst + Young LLP

We have served as the auditor of one or more Gabelli/GAMCO Funds investment companies since 1992.

The GAMCO Global Growth Fund

Board Consideration and Re-Approval of Investment Advisory Agreement (Unaudited)

During the six months ended December 31, 2017, the Board of Directors of the Corporation approved the continuation of the investment advisory agreement with the Adviser for the Fund on the basis of the recommendation by the directors (the “Independent Board Members”) who are not “interested persons” of the Fund. The following paragraphs summarize the material information and factors considered by the Independent Board Members as well as their conclusions relative to such factors.

Nature, Extent, and Quality of Services. The Independent Board Members considered information regarding the Fund’s portfolio managers, the depth of the analyst pool available to the Adviser and the portfolio managers, the scope of supervisory, administrative, shareholder, and other services supervised or provided by the Adviser and the absence of significant service problems reported to the Board. The Independent Board Members noted the experience, length of service, and reputation of the Fund’s portfolio managers.

Investment Performance. The Independent Board Members reviewed the short, medium, and long term performance of the Fund (as of September 30, 2017) against a peer group of seven other comparable funds prepared by the Adviser (the “Adviser Peer Group”), and against a peer group prepared by Broadridge (the “Broadridge Performance Peer Group”) consisting of all retail and institutional global large cap growth funds, regardless of asset size or primary channel of distribution, as represented by the Lipper Global Large Cap Growth Index. The Independent Board Members noted that the Fund’s performance was in the first (highest) quartile for the one and five year periods, the second quartile for the three year period, and the first quartile for the ten year period, as measured against the Adviser Peer Group. Against the Broadridge Performance Peer Group, the Independent Board Members noted that the Fund’s performance was in the third quintile for the one and five year periods, the fourth quintile for the three year period, and the second quintile for the ten year period.

Profitability. The Independent Board Members reviewed summary data regarding the profitability of the Fund to the Adviser both with a pro rata administrative overhead charge and with a stand alone administrative charge. The Independent Board Members also noted that a portion of the Fund’s portfolio transactions were executed by an affiliated broker of the Adviser and that another affiliated broker of the Adviser received distribution fees and minor amounts of sales commissions.

Economies of Scale. The Independent Board Members discussed the major elements of the Adviser’s cost structure, the relationship of those elements to potential economies of scale and reviewed data provided by the Adviser.

Sharing of Economies of Scale. The Independent Board Members noted that the investment management fee schedule for the Fund does not take into account any potential economies of scale that may develop.

Service and Cost Comparisons. The Independent Board Members compared the expense ratios of the investment management fee, other expenses, and total expenses of the Fund with similar expense ratios of the Adviser Peer Group and a peer group of eight other global large cap growth funds selected by Broadridge, and noted that the Adviser’s management fee includes substantially all administrative services of the Fund as well as investment advisory services. The Independent Board Members noted that the Fund’s total expense ratio was the highest of both peer groups, but that the Fund’s size was below average within each peer group. The Independent Board Members also noted that the advisory fee structure was the same as that in effect for most

The GAMCO Global Growth Fund

Board Consideration and Re-Approval of Investment Advisory Agreement (Unaudited) (Continued)

of the Gabelli funds. The Independent Board Members were presented with, but did not consider to be material to their decision, various information comparing the advisory fee with the fee for other types of accounts managed by the Adviser.

Conclusions. The Independent Board Members concluded that the Fund enjoyed highly experienced portfolio management services and good ancillary services and an acceptable performance record. The Independent Board Members also concluded that the Fund's expense ratios and the profitability to the Adviser of managing the Fund were reasonable, and that economies of scale were not a significant factor in their thinking at this time. The Independent Board Members did not view the potential profitability of ancillary services as material to their decision. On the basis of the foregoing and without assigning particular weight to any single conclusion, the Independent Board Members determined to recommend continuation of the investment management agreement to the full Board.

Based on a consideration of all these factors in their totality, the Board Members, including all of the Independent Board Members, determined that each Fund's advisory fee was fair and reasonable with respect to the quality of services provided and in light of the other factors described above that the Board deemed relevant. Accordingly, the Board Members determined to approve the continuation of each Fund's Advisory Agreement. The Board Members based their decision on evaluations of all these factors as a whole and did not consider any one factor as all-important or controlling.

The GAMCO Global Growth Fund Additional Fund Information (Unaudited)

Portfolio Management Team Biographies

Caesar M. P. Bryan joined GAMCO Asset Management in 1994. He is a member of the global investment team of Gabelli Funds, LLC and portfolio manager of several funds within the Gabelli/GAMCO Fund Complex. Prior to joining Gabelli, Mr. Bryan was a portfolio manager at Lexington Management. He began his investment career at Samuel Montagu Company, the London based merchant bank. Mr. Bryan graduated from the University of Southampton in England with a Bachelor of Law and is a member of the English Bar.

Howard F. Ward, CFA, joined Gabelli Funds in 1995 and currently serves as GAMCO's Chief Investment Officer of Growth Equities as well as a Gabelli Funds, LLC portfolio manager for several funds within the Gabelli/GAMCO Fund Complex. Prior to joining Gabelli, Mr. Ward served as Managing Director and Lead Portfolio Manager for several Scudder mutual funds. He also was an Investment Officer in the Institutional Investment Department with Brown Brothers, Harriman & Co. Mr. Ward received his BA in Economics from Northwestern University.

2017 TAX NOTICE TO SHAREHOLDERS (Unaudited)

For the year ended December 31, 2017, the Fund paid to shareholders long term capital gains totaling \$2,715,285, or the maximum allowable. The distribution of long term capital gains has been designated as a capital gain dividend by the Fund's Board of Directors.

All designations are based on financial information available as of the date of this annual report and, accordingly, are subject to change. For each item, it is the intention of the Fund to designate the maximum amount permitted under the Internal Revenue Code and the regulations thereunder.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.
