

The Gabelli Global Utility & Income Trust

Shareholder Commentary – December 31, 2018

To Our Shareholders,

For the quarter ended December 31, 2018, the net asset value (“NAV”) total return of The Gabelli Global Utility & Income Trust (the “Fund”) was (5.4)% , compared with a total return of 1.4% for the Standard & Poor’s (“S&P”) 500 Utilities Index. The total return for the Fund’s publicly traded shares was (14.5)% . The Fund’s NAV per share was \$18.75, while the price of the publicly traded shares closed at \$16.10 on the NYSE American.

Comparative Results

Average Annual Returns through December 31, 2018 (a)

	<u>Quarter</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>Since Inception (05/28/04)</u>
Gabelli Global Utility & Income Trust						
NAV Total Return (b)	(5.37)%	(8.86)%	5.43%	2.77%	7.01%	6.49%
Investment Total Return (c)	(14.45)	(16.74)	6.57	2.74	7.58	5.66
S&P 500 Utilities Index	1.36	4.11	10.72	10.74	10.46	9.85
Lipper Utility Fund Average	(2.50)	2.38	9.46	6.69	10.08	9.29

(a) *Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. The Fund's use of leverage may magnify the volatility of net asset value changes versus Funds that do not employ leverage. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The S&P 500 Utilities Index is an unmanaged indicator of electric and gas utility stock performance. The Lipper Utility Fund Average reflects the average performance of mutual funds classified in this particular category. The S&P 500 Index is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.*

(b) Total returns and average annual returns reflect changes in the NAV per share, reinvestment of distributions at NAV on the ex-dividend date, and adjustments for rights offerings and are net of expenses. Since inception return is based on an initial NAV of \$19.06.

(c) Total returns and average annual returns reflect changes in closing market values on the NYSE American, reinvestment of distributions, and adjustments for rights offerings. Since inception return is based on an initial offering price of \$20.00.

Your portfolio management team follows the Wall Street adage “Eat Your Own Cooking” and owns approximately 8% of the Fund’s common shares.

**GABELLI GLOBAL UTILITY & INCOME TRUST
COMPLETES SUCCESSFUL RIGHTS OFFERING
RAISES \$85 MILLION**

The Board of Trustees of the Fund is pleased to announce the completion of its transferable rights offering in which the Fund issued approximately 1.2 million common and 1.2 million newly issued Series B Cumulative Puttable and Callable preferred shares (the “Series B Preferred”), totaling \$85 million.

Utility Performance and Outlook

In 2018, the S&P 500 Utilities Index (SPU) returned 4.1% including dividends, compared with a decline of 4.4% total return from the S&P 500 Index (S&P 500). Since the September 20, 2018, the S&P 500 market peak, the utility index outperformed by over 15% as the SPU returned 1.1% through year-end, compared to the 14.0% loss for the S&P 500. The SPU has also outperformed over the past 3 and 5 year periods. Utility stocks continue to benefit from strong fundamentals, including 5%-6% earnings growth and merger activity, but we attribute the most recent outperformance to defensive appeal and the fourth quarter decline in long term interest rates. Since late September 2018, investors have grown increasingly worried that the long U.S. economic expansion could slow as a result of Fed rate hikes, a global trade war, and other geopolitical issues.

Table 1 Utilities Outperformed Over the Past Several Periods

	2018	2017	2016	Since Market All-Time High 9/20/18	Since First Tightening 12/14/15	3-Year Total Return	5-Year Total Return
S&P 500 Utilities	4.1%	12.1%	16.3%	1.1%	41.5%	34.1%	67.4%
S&P 500 Index	(4.4)	21.8	12.0	(14.0)	32.0	28.3	50.9
10-Year Treasury Yield (Beginning of Period)	2.41	2.45	2.27	2.38	2.23	2.27	3.04
10-Year Treasury Yield (End of Period)	2.69	2.41	2.45	2.69	2.69	2.69	2.69

Source: Thomson One

On December 19, 2018, the Fed raised the Federal Funds rate 0.25% to 2.5%, marking the ninth rate increase in three years (four times in 2018; three times in 2017). The 250 basis points of tightening has resulted in a flattened yield curve, with a significant 111-basis point increase in the 2-year U.S. Treasury yield to 2.48% (from 1.37%), a more modest 38-basis increase in the 10-year yield to 2.69% (from 2.31%), and a muted 13-basis point increase in the 30-year U.S. Treasury yield to 3.02% (from 2.89%). The Fed now considers its monetary policy to be “neutral” and risks to its economic outlook are balanced.

We continue to emphasize that, while utility stocks are sensitive to interest rates, they are by no means bond proxies. Earnings and dividend growth primarily determine long term total returns and mitigate the negative impact of higher interest rates. The 1-year, 3-year and 5-year utility outperformance reflects the low risk 5% earnings and dividend growth delivered over the last several years, as well as the even higher 5%-6% growth rate expected over the next several years. Utility stocks represent a compelling investment opportunity above and beyond the “safe haven” and “interest rate sensitive” label.

Fundamental Outlook: Super Investment Cycle Continues

We believe that the combination of strong utility fundamentals, the Fed’s vigilance, the flattened yield curve, and the potential for escalating geopolitical volatility and/or domestic economic slowdown bode well for the relative performance of utilities. Strong fundamentals include focused strategies, opportunities for infrastructure investment, improved regulatory principles, low natural gas prices, healthy balance sheets, and investment grade credit ratings. Our universe of electric utility stocks offers a median current return of 3.2% and 5%-6% annual earnings and dividend growth, which is higher than forecast inflation and historical 3%-4% growth rates. Further, the sector continues to consolidate as smaller and mid-size utilities are bought by larger utilities relative to other sectors.

The utility sector is undergoing unprecedented change, resulting in a multi-year “super” investment cycle. The U.S. power generation fleet is rapidly moving from high carbon coal generation to low carbon natural gas and zero carbon renewables. Electric utilities are modernizing the power grid to incorporate renewables, distributed generation, electric vehicle charging stations, and increased safety and reliability. Natural gas and water utilities have accelerated pipe investment programs to replace aging and unsafe pipe, as well as to expand service to incorporate the growing demand for natural gas. The high capital investment is likely to progress for several years and translates into earnings growth, as regulators allow fair returns on investment. Despite the significant investment in infrastructure, electric bill increases have been mitigated by low natural gas prices, more efficient generation, lower financing costs, and tax reform. In September of 2018, the average U.S. retail electric rate of 10.56 cents/kWH was nearly unchanged from the 10.70 cent/kWH in July of 2008. (US Energy Information Administration)

The global utility marketplace totals over \$2.5 trillion in equity capitalization, including over \$1 billion in North America, \$700 billion in Europe, \$600 billion in Asia, and \$200 billion in South America. While there are fewer European utilities, they are larger and more geographically diversified than the U.S.-based utilities. The challenges of delivering low cost energy and water, with significant variations in natural resource (fuel) situations and political dynamics, have allowed for and fostered certain valuable core competencies, such as nuclear and renewable generation technological advancement across the world.

Over the past few years, U.S. utilities have significantly benefited from the abundance of shale gas, while European utilities, such as Iberdrola, Electricidade de Portugal, and Endesa have grown to be global leaders in renewable generation development. Electricité de France is the world's largest nuclear operator, and National Grid is one of the world's better transmission operators. Asia, South/Latin America, and certain developing regions offer greater demand growth, infrastructure investment opportunities, and potentially greater return potential. We expect continued investment and consolidation from abroad to result in cross integration, as well as to provide a wider range of investment opportunities.

Valuation Multiples

At year-end 2018, electric, gas and water utility stocks traded near historically high multiples. Electric utilities traded at 19.6x, 18.6x and 17.5x 2018, 2019, and 2020 earnings estimates, while gas utilities were at 21.4x, 21.0x and 20.0x, and water utilities traded at estimates of 28.1x, 26.4x, and 23.6x, respectively. The 10- and 30-year U.S. Treasuries yielded 2.69% and 3.02%, compared to year end 2017 levels of 2.41% and 2.74%, respectively. Water utilities trade at higher multiples than other utility subgroups, reflecting potential consolidation growth, lower risk profiles, and scarcity value. Gas utilities also trade at relatively high multiples, reflecting potential takeovers and strong potential natural gas demand growth, as well as the pipeline and storage infrastructure growth potential. Adjusted for interest rates, utility P/E multiples appear reasonable, considering the strong fundamental outlook, which includes stronger than historical growth rates (5%-6% over the next several years vs. 3%-4% in the 1990s), and lower risk profiles.

We favor utility stocks with: above-average earnings and dividend growth potential; reasonable prices; and potential catalysts. In 2018, the stronger performers have either experienced or are expected to experience an extraordinary catalyst, such as a merger, spin-off or activist investor.

Table 2 **Top Performing Power and Utility Stocks in 2018**

		12/31	2018		12-Months	
	Symbol	Closing Price	Total Return	P/E 2019	High	Low
NRG Energy	NRG	\$39.60	39.6%	11.3	\$43.08	\$23.75
AES Corp	AES	14.46	39.0	11.1	16.28	9.86

Source: Thomson One

The top three 2018 performers, NRG, AES, and FE, all have been targeted by activist investors, particularly Elliott Management and Bluescape, and eight of the top 15 performers have either been involved in a recent merger, a pending merger, or are speculated to be in a future merger (NRG, VST, SCG, CTWS, OTTR, UTL, VVC, and EVRG). The Elliott/Bluescape pair target undervalued and more complex utilities, with the intent to re-focus and simplify. We note that Elliott's Value Act Capital is promoting an environmental influence with its AES investment, and has also invested in Hawaiian Electric for environmental reasons. The presence of large value-oriented and activist players is encouraging for utility investors as it offers comfort that even an underperforming utility can provide return potential.

The weaker performers were also subject to extraordinary events, including the California wildfires of 2017 and 2018 (EIX and PCG), a potentially terminated merger (AVA), and a volcanic eruption (ORA). The Canadian utilities have underperformed for various reasons, including higher leverage, lower ROEs, recent acquisitions, and political interference.

Table 3 Depressed Utility Stocks

	Symbol	12/31 Closing Price	Decline From 12-Month High	P/E 2019	12-Months High	Low
AltaGas	ALA-T	\$13.90	-72.9%	13.6	\$51.27	\$33.61
PG&E Corp.	PCG	23.75	-51.9	5.9	49.42	17.26

Avista	AVA	42.48	-19.7	19.3	52.91	42.13
Canadian Utilities	CU-T	31.32	-16.4	13.9	37.47	29.12

Source: Thomson One

EIX and PCG declined significantly on potential liabilities associated with 2017 and 2018 wildfires, while ORA's decline is primarily related to an active Hawaii volcano covering its geothermal plant on the big island. California's unique inverse condemnation law has resulted in the utilities being liable for property and other damages associated with the devastating fires. In 2018, California passed wildfire legislation to provide the California Public Utilities Commission (CPUC) with greater authority and flexibility to assign and allocate fault, as well as to allow for a financial solvency stress test and securitization of liabilities above the stress test. However, the inverse condemnation law remains in place, another round of wildfires hit in late 2018, investigation continues, and the CPUC treatment remains uncertain.

Merger and Acquisition Activity Update

Since 1995, the electric utility sector has experienced over 145 acquisition announcements among Edison Electric Institute (EEI) member utilities and roughly 120 completed deals. In 2018, five deals were announced, including SCG/Dominion, VVC/CenterPoint, Gulf Power/NextEra Energy, Peoples Gas/AquaAmerica, Infrareit/SRE, and seven deals closed (SCG/D, NEE/Gulf Power, Oncor/Sempra, Calpine/Energy Capital, Dynegy/Vistra Energy, Great Plains/Westar, and AltaGas/WGL) (see below).

In 2018, merger activity slowed somewhat, which is not all that surprising, considering there were twenty-eight deals announced in the 2014-2017 time frame, with 25 of them completed. The more acquisitive utilities have been busy integrating recent acquisitions. In addition, tax reform may have slowed some deal making, given uncertainty about details and then the non-deductibility of holding company interest expense.

Consolidation activity is outlined below:

Date	Buyer	Target Entity	Enterprise Value	Premium*
10/23/2018	AquaAmerica	Peoples Gas	\$4.3 billion	NA
10/18/2018	Sempra Energy	Infrareit	\$1.3 billion	18%
4/23/2018	CenterPoint Energy	Vectren	\$8.1 billion	17%
2/15/2018	SJW Corp.	Connecticut Water Svc.	\$750 million	18%
7/19/2017	Hydro One	Avista	\$5.3 billion	24%

Deals Closed in 2016/2017/2018

Date	Buyer	Target Entity	Enterprise Value	Premium*
12/31/2018	NextEra Energy	Gulf Power	\$5.8 billion	NA
12/31/2018	Dominion Energy	SCANA	\$14.6 billion	31%
7/6/2018	AltaGas	WGL Resources	\$6.4 billion	12%
4/9/2018	Dynegy	Vistra Energy	\$11.1 billion	12%
3/9/2018	Sempra Energy	Oncor	\$18.8 billion	NA
3/8/2018	Energy Capital	Calpine	\$5.6 billion	23%
9/20/2017	Steel River	DeltaGas	\$258 million	17%
8/4/2017	First Reserve	Gas Natural	\$196 million	39%
1/2/2017	Algonquin PU	Empire District Electric	\$2.4 billion	21%
10/14/16	Fortis	ITC Holdings	\$11.3 billion	14%
10/3/16	Duke Energy	Piedmont Natural Gas	\$6.7 billion	42%
9/16/16	Dominion Res.	Questar Corp.	\$6.0 billion	22%
9/12/16	Spire	Energy South	\$344 million	Private
7/1/16	Emera	TECO Energy	\$10.4 billion	31%
7/1/16	Southern Co.	AGL Resources	\$12 billion	38%
3/30/16	Macquarie	CLECO	\$4.7 billion	15%
3/23/16	Exelon	Pepco Hldgs.	\$11.9 billion	20%
2/12/16	Black Hills	Source Gas	\$1.89 billion	Private

*Represents the premium to the closing share price on the last trading day prior to the announcement of the deal.

Larger U.S. utilities, global utilities, value-oriented investors, activist investors, and private entities find regulated utilities attractive for the compelling investment opportunity known as the “utility compact”. The utility compact assures that investment in prudent utility infrastructure is recognized and allowed a fair return. As a result, investors benefit from the simple “success formula” (investment + rate recognition = earnings growth). The renowned value investor Berkshire Hathaway has vowed to be the largest utility in the U.S. Since its 1999 acquisition of MidAmerican Energy, Berkshire Energy has acquired several utilities, including PacifiCorp-2005, NV Energy-2013, AltaLink-2014, and attempted others, including Constellation Energy (2008) and ONCOR (2017). Several private equity and infrastructure entities, including KKR, Macquarie, and Blackrock have acquired power generation and electric, gas and water utilities over the years.

The forces driving utility consolidation remain in place, and include stagnant demand growth, economies of scale, and efficiency. The electric and gas utility sector remains fragmented, with over fifty electric utilities and twenty gas utilities and ten water utilities.

More significant takeover premiums are normally associated with fundamentally sound, reasonably priced, mid cap and small cap utilities. Attractive takeover characteristics include constructive regulatory environments, healthy service areas, transmission growth potential, low carbon footprints, strategic geographies, or a particularly stressful situation. Given the significant long term demand for natural gas, we consider most gas distribution utilities, particularly those with pending pipeline development projects, to be highly coveted. Our Fund holds numerous small-to-mid-cap utilities with potential takeover characteristics.

An increasing number of midstream/pipeline master limited partnerships (MLPs) have converted or are converting into C-corporations, including ONEOK, Kinder Morgan, Enbridge, and Williams, due to changes in federal corporate tax policy and Federal Energy Regulatory Commission (FERC) income tax allowance treatment. The tax changes led to a significant weakening of the U.S. MLP capital markets, which hampers MLP growth opportunities as they are dependent on consistent access to capital markets at an effective cost of capital to fund projects to grow their distributions. We consider pipeline and storage assets to be utilities or “utility-like” in risk profile with potentially higher growth opportunities. The conversion to non-MLP corporate structures makes many pipeline/midstream companies more appropriate for our utility fund, as well as providing potential asset acquisition opportunities.

EPS Growth of 5%-6% — Above Historical Averages

We forecast utilities to grow EPS (and dividends) at a 5.5% CAGR over 2017-2020, which is at the high end of the recent 4%-6% CAGR, driven by ongoing infrastructure investment, or rate base growth. We believe 2018 earnings growth will be above the 5.5% rate, given warm summer temperatures across the nation and the median dividend growth of 6.4%, both of which were higher than historical averages of approximately 3%-4%. The successful formula driving the strong earnings outlook remains: Investment Opportunities + Constructive Regulation = Earnings Growth.

In 2018, EEI member electric utilities are forecast to have invested \$127.1 billion, which compares to a record \$122.8 billion (revised up from \$113.6 billion) in 2017, marking the seventh consecutive year of record

investment. The investment opportunity serves as the basis for earnings growth for the foreseeable future. Higher capital investment is related to:

- Clean energy transformation as coal retires and is replaced by natural gas, wind, and solar;
- Electric transmission (FERC incentives allow favorable returns);
- Distribution investment via grid modernization, reliability, and expansion (automatic rate recovery);
- Natural gas infrastructure, including pipeline expansion and replacement.

The Great Power Generation Transformation

The global power sector, including North America, has accelerated the transformation from carbon intensive coal power generation to cleaner burning natural gas and renewable power generation. Cleaner generation is driven by the economics and efficiency of new gas plants and low gas prices, increasing state renewable portfolio standards, federal tax credits, public demands, and technology improvement. Cost declines have made large scale wind and solar farms competitive with new combined cycle gas plants.

In 2018, EIA forecast 37% of U.S. generation to come from zero carbon emitting nuclear (20%), hydro (7%), and renewables (10%), 34% from natural gas, and 28% from coal, approximately. In 1986, 58% of generation was from coal. There has not been a coal plant built in more than five years and, absent technological breakthroughs, there may never be another built. The nation's nuclear plants continue to age, and the low cost of natural gas and renewables challenge the ongoing economics of upgrades. In 2017, 26 GWs of capacity was added, including 12 GWs of gas, 7.3 GWs of wind, 6.0 GWs of solar.

Over 2018-2020, EEI forecasts 248 GWs of new generation, including approximately 91 GWs of gas, 85 GWs of wind, and 48.5 GWs of solar to the existing 1,200 GWs of U.S. capacity. Over the same period, EEI expects 49 GWs of capacity to retire, including approximately 21.5 GWs of coal, 22.8 GWs of gas, and 5.8 GWs of nuclear.

Currently, twenty-nine states have renewable portfolio standards (RPS), including 100% mandates in California and Hawaii by 2045. Several coastal states recently conducted major offshore wind RFPs, including Massachusetts (1,600 MWs by 2027), Connecticut (200-MW), and Rhode Island (400-MW). Avangrid won round one of the Massachusetts bid with the 800-MW Vineyard Wind Project (2022), and Deepwater Wind won both the Rhode Island and Connecticut RFPs with its 600-MW project Revolution Wind project (2023). New York and New Jersey each plan 2,400 MWs and 3,500 MWs of wind by 2030, with an 800-MW New York RFP in 2018-2019. Several other states, including Virginia, Maryland, and North Carolina, are also considering plans.

Many utilities and developers are rushing to meet the safe harbor provisions of the late 2015 tax credit extensions, which allow the wind production tax credit (PTC) to continue, but to phase out through 2020 (2016-100%, 2017-80%, 2018-60%, 2019-40%). Importantly, the safe harbor feature allows a project started in 2016 through 2019 and finished in 2020 through 2023 to qualify for 100%/80%/60%/40% of the PTC. The 30% solar investment tax credit extends through 2019, and will decline to 26% in 2020, 22% in 2021, and then permanently to 10% for commercial and 0% for residential.

Finally, the large commercial and industrial customer base is increasingly seeking to advertise progressive sustainable strategies, including owned or contracted renewable generation. The RE100 is a collaborative, global initiative uniting more than 100 influential businesses (Apple, AB InBev, Bank of America, Bloomberg, etc.) committed to 100% renewable electricity.

Battery Storage to Revolutionize Power Generation

We believe large scale battery storage has the potential to revolutionize the power sector. The unique beneficial qualities of storage include the ability to absorb excess renewable energy and discharge that same energy when renewable resources are less available. Storage can provide peaking power, frequency, and voltage support, as well as seasonal load shifting capabilities. The pace of development and deployment is accelerating, and lithium ion battery prices have declined significantly over the last several years. Many utilities are requesting energy storage options in resource plans (nearly 9 GWs of RFPs requesting battery storage) and energy consultant Navigant forecasts 2.7 GWs of annual storage by 2027.

Transmission

According to EEI, transmission investment is expected to grow to \$23.9 billion in 2018 (\$22.9 billion in 2017) from \$12.0 billion in 2011. FERC's favorable, incentive-oriented regulations make transmission investment one of the more compelling uses of capital for electric utilities, but complaints about lower returns on equity (ROE) have dampened enthusiasm over the last few years. Allowed-ROEs had ranged as high as 14%, but recent rate decisions reset the benchmark at a lower level, and several complaints, recommendations, and orders are tied up in the regulatory/legal process. On October 16, 2018, FERC outlined a new ROE-setting methodology that averages four separate methods, which would result in a roughly 10.41% ROE and allow for a higher zone of reasonableness. We consider it likely that the new FERC commissioners will award constructive ROEs, as well as implement policy to end the pancaking of complaints, which would be favorable for future utility earnings growth.

Grid Modernization and Electrification

In 2018, electric utilities invested \$37.5 billion in distribution system improvement and replacement, including storm hardening, grid technology, and advanced meters. Natural gas distribution pipeline replacement is accelerating in light of recent explosions and new standards. Because many states are moving to frequent rate adjustments to replace pipe, pipe investment has become a favored source of consistent earnings growth.

In addition, utility managements expect increased investment to modernize and adapt to the electric vehicle (EV). Bloomberg New Energy Finance forecasts that EVs will represent 9% of electric demand by 2050, up from 0.2% today. As expected, California is leading the way and on pace to have a total of 2.8-4.2 million light duty, zero emission vehicles on the road by 2030 (California Energy Commission December 2017 forecast), compared to approximately 350,000 in use in 2017. By shifting EV load to hours of the day when there is excess generation on the grid, driven by large and small scale solar projects, the load is less costly to serve, which puts downward pressure on rates.

Rate Recognition of Investment

Public and political support of investment, combined with the low cost of natural gas and, more recently, tax-related rate reductions, have allowed for an increasingly constructive regulatory environment. State PUCs regulatory principles have evolved to include numerous adjustments and mechanisms to address infrastructure investment, as well as rate design changes to address efficiency and distributed generation. Many state PUCs allow frequent (quarterly, semi-annual, or annual) rate adjustments for environmental, transmission, renewable, and other items, as well as “pass-through” for fuel, healthcare, and pension expenses. Given flattish demand growth and in order to encourage distributed generation and efficiency, many regulators have “decoupled,” or separated revenues from sales. The improved regulatory treatment results in a greater opportunity to earn the ROEs allowed, and results in “stair-step” earnings growth. The supportive regulation has led utilities to ramp infrastructure investment budgets to deliver EPG growth.

Allowed Returns Lower but Favorable Relative to Interest Rates and Cost-of-Capital

In 2018, electric and gas utilities were authorized average ROEs of 9.65% and 9.55%, respectively. In 2017, the average authorized electric and gas utility allowed-ROEs were 9.74% and 9.72%, respectively, compared to 9.77% and 9.50% in 2016. While ROEs have declined over the years as U.S. Treasury yields declined, the decreases in utility costs-of-capital have been even greater. The spread between the allowed-ROE and the 10-year U.S. Treasury yield is currently 600-basis points, and it has ranged between 600-850 basis points over the past few years. During the 1990s, the utility sector averaged a roughly 400-600 basis points spread.

When combined with opportunities to invest and earn returns on a growing rate base, we consider the allowed-ROEs to be more than adequate to grow earnings and dividends at or above the consensus growth rates. Given the over 200-basis point rise in short term rates and over 150-basis point rise in the 10-year U.S. Treasury since its all-time low, we believe allowed-ROEs have bottomed and will likely rise should rates continue to rise.

Interest Rates and the Fed

Should economic growth accelerate, we would expect inflation concerns and higher 10- and 30-year U.S. Treasury yields, which would pressure utility valuation multiples. While utility stocks are not bond proxies, and share prices are a function of earnings and dividend growth rates, higher rates negatively impact equities because future cash flows are impacted by the assumed discount rate. In addition, current utility dividend returns become less compelling when returns on other investments increase, including U.S. Treasury yields. The factors below mitigate the negative impact of higher interest rates.

- **Annual dividend hikes:** Utilities target annual dividend increases, which serve to mitigate the negative impact of higher rates. In 2018, electric utilities increased the annual dividend by a median of 6.4%.
- **ROE is set based on interest rates:** A utility’s cost-of-capital, including equity returns (ROEs), is set by state PUCs and increases (decreases) as interest rates rise (fall). The 10-year U.S. Treasury yield

has risen 150 basis points from its bottom, which suggests allowed-ROEs have bottomed and PUCs could consider higher returns.

- **Annual riders minimize inflation risk:** State PUCs and FERC regulatory principles have improved to include more frequent rate adjustments, which mitigate inflation risk.
- **Utility stocks pay higher dividends than other sectors:** The present value of a higher near term dividend stream is less impacted by changes in interest rates than a lower near term dividend stream.

Let's Talk Stocks

The following are stock specifics on selected holdings of our Fund. Favorable earnings prospects do not necessarily translate into higher stock prices, but they do express a positive trend that we believe will develop over time. Individual securities mentioned are not necessarily representative of the entire portfolio. For the following holdings, the share prices are listed first in United States dollars (USD) and second in the local currency, where applicable, and are presented as of December 31, 2018.

AES Corp. (AES – \$14.46 – NYSE) is a global power company. Since late 2011, AES has been narrowing its strategic focus, which included the sale of over \$3 billion in non-core assets, buying back stock and debt, and paying a dividend. Roughly 90% of earnings are now derived from only eight countries (compared to 30 several years ago) under four reporting segments, including U.S. (US, Puerto Rico, and El Salvador); South America (Chile, Colombia, Argentina, and Brazil); MCAC (Mexico, Panama, and Dominican Republic); and Eurasia. The acquisition of sPower enhanced the company's renewable platform by adding 1.3 GWs of solar and wind and a 10.0 GW renewable development pipeline. The company is adding 8.3 GWs of new generation (including 1,320 MWs of coal in India), investing in battery-based energy storage and targeting adjusted earnings, cash flow and dividend growth of 8%-10% through 2020. AES offers a 4.0% current return on a \$0.52 per share annual dividend, which management expects to grow 10% annually. On January 18, 2018, AES announced the addition of activist investor Jeffrey Ubben of ValueAct Capital Management to the Board of Directors. We regard AES as one of the better securities to allow the Fund to gain exposure to utility markets both inside and outside of the U.S.

American Electric Power Co. Inc. (AEP – \$74.74 – NYSE) is one of the nation's largest electric utilities. It serves more than 5.4 million retail customers in eleven states (Ohio and Texas are the largest), owns approximately 26 GW of generating capacity, 40,000 miles of transmission lines (the nation's largest), and 223,000 miles of distribution lines. Following non-regulated power plant sales, AEP is focused on the regulated utility business, with plans to invest nearly \$33 billion over the 2019-2023 time period in regulated assets, including 75% in transmission and distribution, and contracted renewable power. Management expects 5%-7% annual earnings growth from \$3.85 per share (2018 earnings estimate) driven by capital investment and rate recovery, and sustainable cost controls. AEP Transco, a transmission development subsidiary, expects to grow earnings to \$1.01-\$1.04 per share by 2020 from \$0.16 per AEP share in 2013, driven by a \$4.5 billion transmission capital investment plan for 2018-2019. AEP currently pays an annual dividend of \$2.68 per share, representing a payout ratio of roughly 70% payout ratio of \$3.85 per share.

Eversource Energy (ES – \$65.04 – NYSE) is New England's largest electric and gas distribution utility and delivery system. ES is the product of a 2012 merger between Northeast Utilities, headquartered in Hartford, Connecticut, and NSTAR, headquartered in Boston, Massachusetts, creating a premier New England distribution utility. ES serves 3.6 million customers in Connecticut, New Hampshire, and Massachusetts. The company targets 5%–7% long term earnings growth, driven by transmission investment, cost cutting opportunities, and oil-to-gas heat conversions in the Northeast. In late 2017, ES completed the acquisition of Aquarion Water Company in Connecticut, Massachusetts and New Hampshire for \$1.6 billion. The company expects further transmission development as aging nuclear and coal facilities are replaced with renewables, including offshore wind generation.

Iberdrola S.A. (IBE – \$8.04/€7.02 – Madrid Stock Exchange), headquartered in Bilbao, Spain, is one of the larger global power companies, with operations primarily in Spain, Portugal, the UK, the U.S., Mexico, and Brazil. The company owns and operates ~44,600 MWs of generation, including 14,200 MWs of renewables, and serves over ~20 million electric and gas customers. IBE's strategy is focused on its renewable energy and regulated businesses in countries with high ratings, such as the U.S. Iberdrola owns 81.5% of AVANGRID, a high quality electric and gas distribution utility in the Northeast with significant renewable development pipeline. IBE targets 7.5% annual net profit growth through 2020 and expects to invest over 25 billion euros (90% regulated or long term contracted activities; 50% US, 30% UK, and 20% Europe) through 2020 in distribution, transmission, and renewables.

National Fuel Gas Co. (NFG – \$51.18 – NYSE) is a diversified natural gas company. NFG owns a regulated gas utility serving the region around Buffalo, New York, gas pipelines that move gas between the Midwest and Canada and from the Marcellus to the Northeast, gathering and processing systems, and an oil and gas exploration and production business. NFG's regulated utility and pipeline businesses, as well as its California oil production business, provide stable earnings and cash flows to support the dividend, while the natural gas production business offers significant upside potential. Natural gas prices have been depressed over the past few years, but NFG's net ownership of 785,000 acres in the Marcellus Shale holds enormous natural gas reserve potential, and the company has proven to be among the lower cost producers. We continue to expect above average long term earnings and cash flow growth from improving gas prices, growing gas production, and strategically located pipeline expansion. The company has increased its dividend for 46 consecutive years.

National Grid plc (NGG – \$47.98 – London Stock Exchange), based in London, England, is an electricity and gas utility company focused on transmission and distribution activities in electricity and gas in both the United Kingdom (65% of assets) and the U.S (35%). The company's segments include UK Electricity Transmission, which is engaged in high voltage electricity transmission networks in Great Britain; UK Gas Transmission, which is the gas transmission network in Great Britain and United Kingdom liquefied natural gas (LNG) storage activities; UK Gas Distribution, which includes four of the eight regional networks of Great Britain's gas distribution system, and U.S. Regulated, which includes gas distribution networks, electricity distribution networks and high voltage electricity transmission networks in New York, and New England and electricity generation facilities in New York.

NextEra Energy Inc. (NEE – \$173.82 – NYSE) is the holding company for Florida Power & Light (FP&L), largest electric utility in Florida, and NextEra Energy Resources, a leading wholesale renewables operator. Florida

Power & Light operates one of the premier utility franchises in the nation, with favorable long term demographics and above average rate base growth potential due to power plant rate adjustments, flexible amortization, and other regulatory mechanisms. In late 2016, FP&L implemented a four year rate plan (2017-2020) based on a 10.6% (+/- 100 basis points) allowed-ROE. Additionally, NEE owns and operates the nation's largest renewable power portfolio, with a significant pipeline of future growth opportunities, and owns 65% of the NextEra Energy Partners, a yieldco focused on renewable development and acquisitions. NEE also owns and is developing gas pipeline projects designed to bring more natural gas into Florida. We regard NEE as one of the better positioned electric companies to grow earnings and dividends over the next several years.

OGE Energy Corp. (OGE – \$39.19 – NYSE) is a traditional regulated utility serving 850,000 electric customers in Oklahoma and western Arkansas. The utility benefits from strong rate base (+7%) and customer growth (+1.0%) and recently (fourth quarter 2018) filed for Oklahoma rate recognition of environmental equipment and a natural gas plant conversion. OGE owns 26% of Enable Midstream Partners.

Severn Trent plc (SVT – \$23.14/£18.16 – London Stock Exchange) is an international provider of water and wastewater services. Severn Trent Water, the UK-based utility, provides water to eight million people and wastewater services to nine million people in the Midlands and Mid-Wales. Severn Trent operates under a 2015-2020 five year rate plan that provides inflation adjusted annual rates increases approved by OFWAT, the UK water regulator. The plan allows SVT to achieve efficiencies and modestly growing returns. The utility has filed its plan for the 2020-2025 period and expected a final decision in late 2019. As one of the UK's premier water and wastewater providers, Severn Trent is well positioned to provide expertise and infrastructure investment opportunities in less developed regions of the world. Severn Trent Services, the non-regulated water and waste water service division of the company, which focuses on water purification projects and operating plants and systems for municipalities, has a growing presence in Europe, the Middle East, and Asia.

WEC Energy Group Inc. (WEC – \$69.26 – NYSE) is based in Milwaukee, Wisconsin. Following Wisconsin Energy Company's mid-2015 acquisition of Integrys Energy Group, the combined company's assets include Wisconsin Electric, the state's largest electric utility, with over 1.1 million electric customers and 1.1 million gas customers in southeastern, east central, and northern Wisconsin, and 400,000 electric customers and 1.7 million gas customers in Illinois, Michigan, Minnesota, and Wisconsin. WEC is a well-managed, high quality, traditional utility operating in a constructive regulatory environment. Management forecasts the combined company growth rate at 5%-7% over the long term. The company recently established a non-regulated infrastructure subsidiary to invest in wind, solar and gas storage projects. Additionally, WEC has a 60% ownership stake in the American Transmission Corp., which provides another investment opportunity as well as financial engineering optionality.

Conclusion

We continue to expect the utility sector to provide a low risk 8%-to-9% annual total return over the long term, based on the median current return of 3.2% and 5%-6% annual earnings and dividend growth. We believe valuation multiples are supported by strong fundamentals, low interest rates, and ongoing takeover potential. Solid fundamentals include healthy balance sheets, credit ratings, improved regulatory principles, focused strategies, low natural gas prices and opportunities to invest in rate base as well as the potential for

takeovers. We believe that the combination of strong utility fundamentals, the Fed's vigilance, the flattened yield curve, and the potential for escalating geopolitical volatility and/or domestic economic slow-down bode well for the relative performance of utilities.

Information contained in this Shareholder Commentary has been obtained from sources we believe to be reliable, but cannot be guaranteed. Beneficial ownership of shares held in the Fund by Mr. Gabelli and various entities he is deemed to control are disclosed in the Fund's annual proxy statement.

Monthly Distribution Policy for Common Shareholders

Pursuant to its distribution policy, the Fund paid \$0.10 per share cash distributions on October 24, 2018, November 23, 2018, and December 24, 2018 to common shareholders of record on October 17, 2018, November 15, 2018, and December 07, 2018, respectively, for a total distribution of \$0.30 per share during the fourth quarter of 2018.

Under the Fund's initial distribution policy, the Fund pays a minimum annual distribution of 6% of the initial public offering price of \$20.00 per share. Pursuant to this policy, the Fund intends to pay a distribution of \$0.10 per share each month and, if necessary, an adjusting distribution in December which includes any additional income and realized net capital gains in excess of the monthly distributions for that year to satisfy the minimum distribution requirements of the Internal Revenue Code.

Each quarter, the Board reviews the amount of any potential distribution and the income, capital gain, or capital available. The Board will continue to monitor the Fund's distribution level, taking into consideration the Fund's net asset value and the financial market environment. The Fund's distribution policy is subject to modification by the Board at any time. The distribution rate should not be considered the dividend yield or total

return on an investment in the Fund.

If the Fund does not generate sufficient earnings (dividends and interest income and realized net capital gain) equal to or in excess of the aggregate distributions paid by the Fund in a given year, then the amount distributed in excess of the Fund's earnings would be deemed a return of capital. Since this would be considered a return of a portion of a shareholder's original investment, it is generally not taxable and is treated as a reduction in the shareholder's cost basis.

Long term capital gains, qualified dividend income, ordinary income, and paid-in capital, if any, will be allocated on a pro-rata basis to all distributions to common shareholders for the year. Based on the distribution allocations of the Fund as of December 31, 2018, the total distributions paid to common shareholders in 2018 represent approximately 40% from net investment income, 53% from net capital gains, and 7% from paid-in capital. The estimated components of each distribution are updated and provided to shareholders of record in a notice accompanying the distribution and are available on our website (www.gabelli.com). All shareholders with taxable accounts will receive written notification regarding the components and tax treatment for all 2018 distributions in early 2019 via Form 1099-DIV.

Series A Cumulative Puttable and Callable Preferred Shares

The Fund's Series A Cumulative Puttable and Callable Preferred Shares paid a \$0.475 per share cash distribution on December 26, 2018, to preferred shareholders of record on December 18, 2018. The Series A Preferred Shares, which trade on the NYSE American under the symbol "GLU Pr A," were issued on June 19, 2013, at \$50.00 per share and pay distributions quarterly. The annual dividend rate of 3.80% was determined based on the terms of the Series A Preferred Shares. After five years of call protection, the Series A Preferred Shares became callable at any time at the liquidation value of \$50.00 per share plus accrued dividends. The next distribution is scheduled for March 2019. The Fund is authorized to purchase its Series A Preferred Shares in the open market from time to time when such shares are trading at a discount to the liquidation value of \$50.00 per share. During the fourth quarter of 2018, the Fund repurchased and retired 100 Series A Preferred Shares in the open market at the purchase price of \$46.19 per share and a discount of 7.6% to the liquidation value.

Long-term capital gains, qualified dividend income, and ordinary income, if any, will be allocated on a pro-rata basis to all distributions to preferred shareholders for the year. Based on the distribution allocations of the Fund as of December 31, 2018, the total distributions paid to preferred shareholders represent 42% from net investment income and 58% from net capital gains. The estimated components of each distribution are updated and provided to shareholders of record in a notice accompanying the distribution and are available on our website (www.gabelli.com). All shareholders with taxable accounts will receive written notification regarding the components and tax treatment for all 2018 distributions in early 2019 via Form 1099-DIV.

Tax Treatment of Distributions to Common and Preferred Shareholders

All or part of the distributions may be treated as long-term capital gain or qualified dividend income (or a combination of both) for individuals, each subject up to the maximum federal income tax rate. In addition,

certain U.S. shareholders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare surcharge on their “net investment income”, which includes dividends received from the Fund and capital gains from the sale or other disposition of shares of the Fund.

AUTOMATIC DIVIDEND REINVESTMENT AND VOLUNTARY CASH PURCHASE PLANS

Enrollment in the Plan

It is the policy of The Gabelli Global Utility & Income Trust (the “Fund”) to automatically reinvest dividends payable to common shareholders. As a “registered” shareholder you automatically become a participant in the Fund’s Automatic Dividend Reinvestment Plan (the “Plan”). The Plan authorizes the Fund to credit common shares to participants upon an income dividend or a capital gains distribution regardless of whether the shares are trading at a discount or a premium to net asset value. All distributions to shareholders whose shares are registered in their own names will be automatically reinvested pursuant to the Plan in additional shares of the Fund. Plan participants may send their share certificates to Computershare Trust Company, N.A. (“Computershare”) to be held in their dividend reinvestment account. Registered shareholders wishing to receive their distributions in cash must submit this request in writing to:

The Gabelli Global Utility & Income Trust
c/o Computershare Trust Company, N.A.
P.O. Box 505000
Louisville, KY 40233

Shareholders requesting this cash election must include the shareholder’s name and address as they appear on the Fund’s records. Shareholders with additional questions regarding the Plan or requesting a copy of the terms of the Plan, may contact Computershare at (800) 336-6983.

If your shares are held in the name of a broker, bank, or nominee, you should contact such institution. If such institution is not participating in the Plan, your account will be credited with a cash dividend. In order to participate in the Plan through such institution, it may be necessary for you to have your shares taken out of “street name” and re-registered in your own name. Once registered in your own name your distributions will be automatically reinvested. Certain brokers participate in the Plan. Shareholders holding shares in “street name” at participating institutions will have dividends automatically reinvested. Shareholders wishing a cash dividend at such institution must contact their broker to make this change.

The number of common shares distributed to participants in the Plan in lieu of cash dividends is determined in the following manner. Under the Plan, whenever the market price of the Fund’s common shares is equal to or exceeds net asset value at the time shares are valued for purposes of determining the number of shares equivalent to the cash dividends or capital gains distribution, participants are issued common shares valued at the greater of (i) the net asset value as most recently determined or (ii) 95% of the then current market price of the Fund’s common shares. The valuation date is the dividend or distribution payment date or, if that date is not a NYSE American trading day, the next trading day. If the net asset value of the common shares at the time of valuation exceeds the market price of the common shares, participants will receive common shares from the Fund valued at market price. If the Fund should declare a dividend or capital gains distribution payable only in cash, Computershare will buy common shares in the open market, or on the NYSE American or elsewhere, for the participants’ accounts, except that Computershare will endeavor to terminate purchases in the open market and cause the Fund to issue shares at net asset value if, following the commencement of such purchases, the market value of the common shares exceeds the then current net asset value.

The automatic reinvestment of dividends and capital gains distributions will not relieve participants of any income tax which may be payable on such distributions. A participant in the Plan will be treated for federal income tax purposes as having received, on a dividend payment date, a dividend or distribution in an amount equal to the cash the participant could have received instead of shares.

Voluntary Cash Purchase Plan

The Voluntary Cash Purchase Plan is yet another vehicle for our shareholders to increase their investment in the Fund. In order to participate in the Voluntary Cash Purchase Plan, shareholders must have their shares registered in their own name.

Participants in the Voluntary Cash Purchase Plan have the option of making additional cash payments to Computershare for investments in the Fund's common shares at the then current market price. Shareholders may send an amount from \$250 to \$10,000. Computershare will use these funds to purchase shares in the open market on or about the 1st and 15th of each month. Computershare will charge each shareholder who participates \$0.75, plus a pro rata share of the brokerage commissions. Brokerage charges for such purchases are expected to be less than the usual brokerage charge for such transactions. It is suggested that any voluntary cash payments be sent to Computershare Trust Company, N.A., P.O. Box 505000, Louisville, KY 40233 such that Computershare receives such payments approximately 10 days before the 1st and 15th of the month. Funds not received at least five days before the investment date shall be held for investment until the next purchase date. A payment may be withdrawn without charge if notice is received by Computershare at least 48 hours before such payment is to be invested.

Shareholders wishing to liquidate shares held at Computershare must do so in writing or by telephone. Please submit your request to the above mentioned address or telephone number. Include in your request your name, address, and account number. The cost to liquidate shares is \$2.50 per transaction as well as the brokerage commission incurred. Brokerage charges are expected to be less than the usual brokerage charge for such transactions.

For more information regarding the Automatic Dividend Reinvestment Plan and Voluntary Cash Purchase Plan, brochures are available by calling (914) 921-5070 or by writing directly to the Fund.

The Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to the members of the Plan at least 90 days before the record date for such dividend or distribution. The Plan also may be amended or terminated by Computershare on at least 90 days written notice to participants in the Plan.

Portfolio Manager Biography

Mario J. Gabelli, CFA, is Chairman, Chief Executive Officer, and Chief Investment Officer – Value Portfolios of GAMCO Investors, Inc. that he founded in 1977, and Chief Investment Officer – Value Portfolios of Gabelli Funds, LLC and GAMCO Asset Management Inc. He is also Executive Chairman of the Board of Directors of Associated Capital Group, Inc. Mr. Gabelli is a summa cum laude graduate of Fordham University and holds an MBA degree from Columbia Business School, and Honorary Doctorates from Fordham University and Roger Williams University.

We have separated the portfolio manager's commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio manager's commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

The Net Asset Value per share appears in the Publicly Traded Funds column, under the heading "Specialized Equity Funds," in Monday's The Wall Street Journal. It is also listed in Barron's Mutual Funds/Closed End Funds section under the heading "Specialized Equity Funds."

The Net Asset Value per share may be obtained each day by calling (914) 921-5070 or visiting www.gabelli.com.

The NASDAQ symbol for the Net Asset Value per share is "XGLUX."

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund may from time to time purchase its common shares in the open market when the Fund's shares are trading at a discount of 10% or more from the net asset value of the shares. The Fund may also from time to time purchase shares of its preferred stock in the open market when the preferred shares are trading at a discount to the liquidation value.

This report is printed on recycled paper.

The Gabelli Global Utility & Income Trust

Annual Report — December 31, 2018

To Our Shareholders,

For the year ended December 31, 2018, the net asset value (NAV) total return of The Gabelli Utility & Income Trust (the Fund) was (8.9)%, compared with a total return of 4.1% for the Standard & Poor's (S&P) 500 Utilities Index. The total return for the Fund's publicly traded shares was (16.7)%. The Fund's NAV per share was \$18.75, while the price of the publicly traded shares closed at \$16.10 on the NYSE American. See below for additional performance information.

Enclosed are the financial statements, including the schedule of investments, as of December 31, 2018.

Comparative Results

Average Annual Returns through December 31, 2018 (a) (Unaudited)

	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>	<u>10 Year</u>	<u>Since Inception (05/28/04)</u>
Gabelli Global Utility & Income Trust					
NAV Total Return (b)	(8.86)%	5.43%	2.77%	7.01%	6.49%
Investment Total Return (c)	(16.74)	6.57	2.74	7.58	5.66
S&P 500 Utilities Index	4.11	10.72	10.74	10.46	9.85
Lipper Utility Fund Average	2.38	9.46	6.69	10.08	9.29
S&P 500 Index	(4.38)	9.26	8.49	13.12	7.89

- (a) *Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. The Fund's use of leverage may magnify the volatility of net asset value changes versus funds that don't employ leverage. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The S&P 500 Utilities Index is an unmanaged indicator of electric and gas utility stock performance. The Lipper Utility Fund Average reflects the average performance of mutual funds classified in this particular category. The S&P 500 Index is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.*
- (b) Total returns and average annual returns reflect changes in the NAV per share, reinvestment of distributions at NAV on the ex-dividend date, and adjustments for the rights offering and are net of expenses. Since inception return is based on an initial NAV of \$19.06.
- (c) Total returns and average annual returns reflect changes in closing market values on the NYSE American, reinvestment of distributions, and adjustments for the rights offering. Since inception return is based on an initial offering price of \$20.00.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semiannual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website (www.gabelli.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. To elect to receive all future reports in paper free of charge, please contact your financial intermediary, or, if you invest directly with the Fund, you may call 800-422-3554 or send an email request to info@gabelli.com.

Summary of Portfolio Holdings (Unaudited)

The following table presents portfolio holdings as a percent of total investments as of December 31, 2018:

The Gabelli Global Utility & Income Trust

U.S. Government Obligations	48.5%	Entertainment	0.5%
Energy and Utilities: Integrated	16.5%	Alternative Energy	0.4%
Telecommunications	6.1%	Consumer Products	0.4%

* Amount represents less than 0.05%.

The Fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain this information at www.gabelli.com or by calling the Fund at 800-GABELLI (800-422-3554). The Fund's Form N-Q is available on the SEC's website at www.sec.gov and may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Proxy Voting

The Fund files Form N-PX with its complete proxy voting record for the twelve months ended June 30, no later than August 31 of each year. A description of the Fund's proxy voting policies, procedures, and how the Fund voted proxies relating to portfolio securities is available without charge, upon request, by (i) calling 800-GABELLI (800-422-3554); (ii) writing to The Gabelli Funds at One Corporate Center, Rye, NY 10580-1422; or (iii) visiting the SEC's website at www.sec.gov.

Ratio of net investment income to average net assets attributable to common shares before preferred share distributions	2.73%	2.88%	3.83%	2.81%	3.85%
Ratio of operating expenses to average net assets attributable to common shares(c)	1.33%(d)(e)	1.34%(d)	1.39%(d)(f)	1.41%(d)	1.39%
Portfolio turnover rate	12.8%	9.2%	21.8%	14.2%	26.6%
Cumulative Preferred Shares:					
Series A Preferred					
Liquidation value, end of year (in 000's)	\$ 2,319	\$ 51,304	\$ 51,304	\$ 51,304	\$ 51,621
Total shares outstanding (in 000's)	46	1,026	1,026	1,026	1,032
Liquidation preference per share	\$ 50.00	\$ 50.00	\$ 50.00	\$ 50.00	\$ 50.00
Average market value(g)	\$ 49.10	\$ 50.90	\$ 51.17	\$ 50.49	\$ 50.55
Asset coverage per share(h)	\$ 127.17	\$ 139.88	\$ 129.47	\$ 128.40	\$ 137.34
Series B Preferred					
Liquidation value, end of year (in 000's)	\$ 62,901	—	—	—	—
Total shares outstanding (in 000's)	1,258	—	—	—	—
Liquidation preference per share	\$ 50.00	—	—	—	—
Average market value(g)	\$ 51.32	—	—	—	—
Asset coverage per share(h)	\$ 127.17	—	—	—	—
Asset coverage(i)	254%	280%	259%	257%	275%

† Based on net asset value per share, adjusted for reinvestment of distributions at the net asset value per share on the ex-dividend dates and adjustments for the rights offering.

†† Based on market value per share at initial public offering of \$20.00 per share, adjusted for reinvestments of distributions at prices obtained under the Fund's dividend reinvestment plan and adjustments for the rights offering.

(a) Calculated based on average common shares outstanding on the record dates throughout the years.

(b) Amount represents less than \$0.005 per share.

(c) Ratio of operating expenses to average net assets including liquidation value of preferred shares for the years ended December 31, 2018, 2017, 2016, 2015, and 2014 would have been 1.00%, 0.85%, 0.86%, 0.89%, and 0.89%, respectively.

(d) The Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. For the years ended December 31, 2018, 2017, 2016, and 2015, there was no impact on the expense ratios.

(e) During the year ended December 31, 2018, the Fund incurred interest expense. If this expense had not been incurred, the expense ratios would have been 1.31% attributable to common shares and 0.99% including liquidation of preferred shares. For the years ended December 31, 2017, 2016, 2015 and 2014, there was no impact on the expense ratios.

(f) During the year ended December 31, 2016, the fund received a reimbursement of custody expenses paid in prior years. Had such reimbursement been included in 2016, the expense ratios would have been 1.18% attributable to common shares and 0.73% including liquidation value of preferred shares.

(g) Based on weekly prices.

(h) Asset coverage per share is calculated by combining all series of preferred shares.

(i) Asset coverage is calculated by combining all series of preferred shares.

See accompanying notes to financial statements.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements

1. Organization. The Gabelli Global Utility & Income Trust (the Fund) is a non-diversified closed-end management investment company organized as a Delaware statutory trust on March 8, 2004 and registered under the Investment Company Act of 1940, as amended (the 1940 Act). Investment operations commenced on May 28, 2004.

The Fund's investment objective is to seek a consistent level of after-tax total return over the long term with an emphasis currently on qualified dividends. The Fund will attempt to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in equity securities (including preferred securities) of domestic and foreign companies involved to a substantial extent in providing products, services, or equipment for the generation or distribution of electricity, gas, or water and infrastructure operations, and in equity securities (including preferred securities) of companies in other industries, in each case in such securities that are expected to pay periodic dividends.

2. Significant Accounting Policies. As an investment company, the Fund follows the investment company accounting and reporting guidance, which is part of U.S. generally accepted accounting principles (GAAP) that may require the use of management estimates and assumptions in the preparation of its financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

New Accounting Pronouncements. The SEC recently adopted changes to Regulation S-X to simplify the reporting of information by registered investment companies in financial statements. The amendments require presentation of the total, rather than the components, of distributable earnings on the Statement of Assets and Liabilities and also require presentation of the total, rather than the components, of distributions to shareholders, except for tax return of capital distributions, if any, on the Statement of Changes in Net Assets Attributable to Common Shareholders. The amendments also removed the requirement for parenthetical disclosure of undistributed net investment income on the Statement of Changes in Net Assets Attributable to Common Shareholders. These Regulation S-X amendments are reflected in the Fund's financial statements for the year ended December 31, 2018. As a result of adopting these amendments, the distributions to shareholders in the December 31, 2017 Statement of Changes in Net Assets Attributable to Common Shareholders presented herein have been reclassified to conform to the current year presentation.

To improve the effectiveness of fair value disclosure requirements, the Financial Accounting Standards Board recently issued Accounting Standard Update (ASU) 2018-13, Fair Value Measurement Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement (ASU 2018-13), which adds, removes, and modifies certain aspects relating to fair value disclosure. ASU 2018-13 is effective for interim and annual reporting periods beginning after December 15, 2019; early adoption of the additions relating to ASU 2018-13 is not required, even if early adoption is elected for the removals under ASU 2018-13. Management has early adopted the removals set forth in ASU 2018-13 in these financial statements and has not early adopted the additions set forth in ASU 2018-13.

Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

available price or, if the Board of Trustees (the Board) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the Adviser).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt obligations for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Certain securities are valued principally using dealer quotations. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded. OTC futures and options on futures for which market quotations are readily available will be valued by quotations received from a pricing service or, if no quotations are available from a pricing service, by quotations obtained from one or more dealers in the instrument in question by the Adviser.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value American Depositary Receipt securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Board's determinations as to the fair value of investments).

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in the aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of the Fund's investments in securities and other financial instruments by inputs used to value the Fund's investments as of December 31, 2018 is as follows:

	Valuation Inputs			Total Market Value at 12/31/18
	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	
INVESTMENTS IN SECURITIES:				
ASSETS (Market Value):

TOTAL INVESTMENTS IN SECURITIES – ASSETS	\$86,590,543	\$81,756,902	\$4,984	\$168,352,429

(a) Please refer to the Schedule of Investments (SOI) for the industry classifications of these portfolio holdings.

The Fund did not have transfers into or out of Level 3 during the year ended December 31, 2018.

Additional Information to Evaluate Qualitative Information.

General. The Fund uses recognized industry pricing services – approved by the Board and unaffiliated with the Adviser – to value most of its securities, and uses broker quotes provided by market makers of securities not valued by these and other recognized pricing sources. Several different pricing feeds are received to value domestic equity securities, international equity securities, preferred equity securities, and fixed income securities. The data within these feeds are ultimately sourced from major stock exchanges and trading systems where these securities trade. The prices supplied by external sources are checked by obtaining quotations or actual transaction prices from market participants. If a price obtained from the pricing source is deemed unreliable, prices will be sought from another pricing service or from a broker/dealer that trades that security or similar securities.

Fair Valuation. Fair valued securities may be common or preferred equities, warrants, options, rights, or fixed income obligations. Where appropriate, Level 3 securities are those for which market quotations are not available, such as securities not traded for several days, or for which current bids are not available, or which are restricted as to transfer. When fair valuing a security, factors to consider include recent prices of comparable securities that are publicly traded, reliable prices of securities not publicly traded, the use of valuation models, current analyst reports, valuing the income or cash flow of the issuer, or cost if the preceding factors do not apply. A significant change in the unobservable inputs could result in a lower or higher value in Level 3 securities. The circumstances of Level 3 securities are frequently monitored to determine if fair valuation measures continue to apply.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

The Adviser reports quarterly to the Board the results of the application of fair valuation policies and procedures. These may include backtesting the prices realized in subsequent trades of these fair valued securities to fair values previously recognized.

Derivative Financial Instruments. The Fund may engage in various portfolio investment strategies by investing in derivative financial instruments for the purposes of increasing the income of the Fund, hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase, or hedging against a specific transaction with respect to either the currency in which the transaction is denominated or another currency. Investing in certain derivative financial instruments, including participation in the options, futures, or swap markets, entails certain execution, liquidity, hedging, tax, and securities, interest, credit, or currency market risks. Losses may arise if the Adviser's prediction of movements in the direction of the securities, foreign currency, and interest rate markets is inaccurate. Losses may also arise if the counterparty does not perform its duties under a contract, or, in the event of default, the Fund may be delayed in or prevented from obtaining payments or other contractual remedies owed to it under derivative contracts. The creditworthiness of the counterparties is closely monitored in order to minimize these risks. Participation in derivative transactions involves investment risks, transaction costs, and potential losses to which the Fund would not be subject absent the use of these strategies. The consequences of these risks, transaction costs, and losses may have a negative impact on the Fund's ability to pay distributions.

Collateral requirements differ by type of derivative. Collateral requirements are set by the broker or exchange clearing house for exchange traded derivatives, while collateral terms are contract specific for derivatives traded over-the-counter. Securities pledged to cover obligations of the Fund under derivative contracts are noted in the Schedule of Investments. Cash collateral, if any, pledged for the same purpose will be reported separately in the Statement of Assets and Liabilities.

The Fund's policy with respect to offsetting is that, absent an event of default by the counterparty or a termination of the agreement, the master agreement does not result in an offset of reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities across transactions between the Fund and the applicable counterparty. The enforceability of the right to offset may vary by jurisdiction.

The Fund's derivative contracts held at December 31, 2018, if any, are not accounted for as hedging instruments under GAAP and are disclosed in the Schedule of Investments together with the related counterparty.

Swap Agreements. The Fund may enter into equity contract for difference swap transactions for the purpose of increasing the income of the Fund. The use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an equity contract for difference swap, a set of future cash flows is exchanged between two counterparties. One of these cash flow streams will typically be based on a reference interest rate combined with the performance of a notional value of shares of a stock. The other will be based on the performance of the shares of a stock. Depending on the general state of short term interest rates and the returns on the Fund's portfolio securities at the time an equity contract for difference swap transaction reaches its scheduled termination date, there is a risk that the Fund will not be able to obtain a replacement transaction or that the terms of the replacement will not be as favorable as on the expiring transaction.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

Unrealized gains related to swaps are reported as an asset and unrealized losses are reported as a liability in the Statement of Assets and Liabilities. The change in value of swaps, including the accrual of periodic amounts of interest to be received or paid on swaps, is reported as unrealized gain or loss in the Statement of Operations. A realized gain or loss is recorded upon receipt or payment of a periodic payment or termination of swap agreements. At December 31, 2018, the Fund held no investments in equity contract for difference swap agreements.

The Fund's volume of activity in equity contract for difference swap agreements during the year ended December 31, 2018 had an average monthly notional amount of approximately \$510,865.

For the year ended December 31, 2018, the effect of equity contract for difference swap agreements can be found in the Statement of Operations under Net Realized and Unrealized Gain/(Loss) on Investments, Swap Contracts, and Foreign Currency, Net realized gain on swap contracts and Net change in unrealized appreciation/depreciation on swap contracts.

Forward Foreign Exchange Contracts. The Fund may engage in forward foreign exchange contracts for the purpose of hedging a specific transaction with respect to either the currency in which the transaction is denominated or another currency as deemed appropriate by the Adviser. Forward foreign exchange contracts are valued at the forward rate and are marked-to-market daily. The change in market value is included in unrealized appreciation/depreciation on foreign currency translations. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's portfolio securities, but it does establish a rate of exchange that can be achieved in the future. Although forward foreign exchange contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. There were no forward foreign exchange contracts outstanding at December 31, 2018.

Limitations on the Purchase and Sale of Futures Contracts, Certain Options, and Swaps. Subject to the guidelines of the Board, the Fund may engage in "commodity interest" transactions (generally, transactions in futures, certain options, certain currency transactions, and certain types of swaps) only for bona fide hedging or other permissible transactions in accordance with the rules and regulations of the Commodity Futures Trading Commission (CFTC). Pursuant to amendments by the CFTC to Rule 4.5 under the Commodity Exchange Act (CEA), the Adviser has filed a notice of exemption from registration as a "commodity pool operator" with respect to the Fund. The Fund and the Adviser are therefore not subject to registration or regulation as a commodity pool operator under the CEA. In addition, certain trading restrictions are now applicable to the Fund which permit the Fund to engage in commodity interest transactions that include (i) "bona fide hedging" transactions, as that term is defined and interpreted by the CFTC and its staff, without regard to the percentage of the Fund's assets committed to margin and options premiums and (ii) non-bona fide hedging transactions, provided that the Fund does not enter into such non-bona fide hedging transactions if, immediately thereafter, either (a) the sum of the amount of initial margin deposits on the Fund's existing futures positions or swaps positions and option or swaption premiums would exceed 5% of the market value of the Fund's liquidating value, after taking into account unrealized profits and unrealized losses on any such transactions, or (b) the aggregate net notional value of the Fund's commodity interest transactions would not exceed 100% of the market value of the Fund's

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

liquidating value, after taking into account unrealized profits and unrealized losses on any such transactions. Therefore, in order to claim the Rule 4.5 exemption, the Fund is limited in its ability to invest in commodity futures, options, and certain types of swaps (including securities futures, broad based stock index futures, and financial futures contracts). As a result, in the future the Fund will be more limited in its ability to use these instruments than in the past, and these limitations may have a negative impact on the ability of the Adviser to manage the Fund, and on the Fund's performance.

Foreign Currency Translations. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at current exchange rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/(loss) on investments.

Foreign Securities. The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

Foreign Taxes. The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

Restricted Securities. The Fund is not subject to an independent limitation on the amount it may invest in securities for which the markets are restricted. Restricted securities include securities whose disposition is subject to substantial legal or contractual restrictions. The sale of restricted securities often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than the sale of securities eligible for trading on national securities exchanges or in the over-the-counter markets. Restricted securities may sell at a price lower than similar securities that are not subject to restrictions on resale. Securities freely saleable among qualified institutional investors under special rules adopted by the SEC may be treated as liquid if they satisfy liquidity standards established by the Board. The continued liquidity of such securities is not as well assured as that of publicly traded securities, and, accordingly, the Board will monitor their liquidity. At December 31, 2018, the Fund held no restricted securities.

Securities Transactions and Investment Income. Securities transactions are accounted for on the trade date with realized gain/(loss) on investments determined by using the identified cost method. Interest income (including amortization of premium and accretion of discount) is recorded on an accrual basis. Premiums and discounts on debt securities are amortized using the effective yield to maturity method. Dividend income is recorded on

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

the ex-dividend date, except for certain dividends from foreign securities that are recorded as soon after the ex-dividend date as the Fund becomes aware of such dividends.

Distributions to Shareholders. Distributions to shareholders are recorded on the ex-dividend date. Distributions to shareholders are based on income and capital gains as determined in accordance with federal income tax regulations, which may differ from income and capital gains as determined under GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, and timing differences. Distributions from net investment income for federal income tax purposes include net realized gains on foreign currency transactions. These book/tax differences are either temporary or permanent in nature. To the extent these differences are permanent, adjustments are made to the appropriate capital accounts in the period when the differences arise. Permanent differences were primarily due to the reclassification of swap gains and tax treatment of currency gains and losses. These reclassifications have no impact on the NAV of the Fund. For the year ended December 31, 2018, reclassifications were made to decrease paid-in capital by \$252, with an offsetting adjustment to total distributable earnings.

Under the fund's current common share distribution policy, the Fund declares and pays monthly distributions from net investment income, capital gains, and paid-in capital. The actual source of the distribution is determined after the end of the calendar year. Pursuant to this policy, distributions during the year may be made in excess of required distributions. To the extent such distributions are made from current earnings and profits, they are considered ordinary income or long term capital gains. The Fund's current distribution policy may restrict the Fund's ability to pass through to shareholders all of its net realized long term capital gains as a Capital Gain Distributions sourced to the maximum federal income tax rate and may cause such gains to be treated as ordinary income. Distributions sourced from paid-in capital should not be considered as dividend yield or the total return from an investment in the Fund. The Board will continue to monitor the Fund's distribution level, taking into consideration the Fund's NAV and the financial market environment. The Fund's distribution policy is subject to modification by the Board at any time.

Distributions to shareholders of the Fund's Series A Preferred Shares and Series B Preferred Shares are recorded on a daily basis and are determined as described in Note 5.

The tax character of distributions paid during the years ended December 31, 2018 and 2017 was as follows:

	Year Ended December 31, 2018		Year Ended December 31, 2017	
	Common	Preferred	Common	Preferred
Distributions paid from:				
Ordinary income (inclusive of short term gains)	\$2,284,459	\$ 565,221	\$1,820,482	\$ 719,899
Net long term capital gains	2,323,612	574,909	3,113,074	1,229,657
Return of capital	325,485	—	—	—
Total distributions paid	<u>\$4,933,556</u>	<u>\$1,140,130</u>	<u>\$4,933,556</u>	<u>\$1,949,556</u>

Provision for Income Taxes. The Fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). It is the policy of the Fund to comply with the requirements of the Code applicable to regulated investment companies and to distribute substantially all of its net investment company taxable income and net capital gains. Therefore, no provision for federal income taxes is required.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

As of December 31, 2018, the components of accumulated earnings/losses on a tax basis were as follows:

Net unrealized appreciation on investments, swap contracts, and foreign currency translations	\$18,193,584
Qualified late year loss deferral*	(26,537)
Other temporary differences**	(147,994)
Total	<u>\$18,019,053</u>

* Under the current law, qualified late year losses realized after October 31 and prior to the Fund's year end may be elected as occurring on the first day of the following year. For the year ended Date, the Fund elected to defer \$26,537 of late year deferral of short term capital losses.

** Other temporary differences are primarily due to adjustments on preferred share class distribution payables.

At December 31, 2018, the temporary differences between book basis and tax basis net unrealized appreciation on investments were primarily due to deferral of losses from wash sales for tax purposes.

The following summarizes the tax cost of investments and the related net unrealized appreciation at December 31, 2018:

	<u>Cost</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
Investments	\$150,156,328	\$25,047,995	\$(6,851,894)	\$18,196,101

The Fund is required to evaluate tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Fund as tax expense in the Statement of Operations if the tax positions were deemed not to meet the more-likely-than-not threshold. During the year ended December 31, 2018, the Fund did not incur any income tax, interest, or penalties. As of December 31, 2018, the Adviser has reviewed all open tax years and concluded that there was no impact to the Fund's net assets or results of operations. The Fund's federal and state tax returns for the prior three fiscal years remain open, subject to examination. On an ongoing basis, the Adviser will monitor the Fund's tax positions to determine if adjustments to this conclusion are necessary.

3. Investment Advisory Agreement and Other Transactions. The Fund has entered into an investment advisory agreement (the Advisory Agreement) with the Adviser which provides that the Fund will pay the Adviser a fee, computed weekly and paid monthly, currently equal on an annual basis to 0.50% of the value of the Fund's average weekly total assets. In accordance with the Advisory Agreement, the Adviser provides a continuous investment program for the Fund's portfolio and oversees the administration of all aspects of the Fund's business and affairs.

During the year ended December 31, 2018, the Fund paid \$32,799 in brokerage commissions on security trades to G.research, LLC, an affiliate of the Adviser.

During the year ended December 31, 2018, the Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. The amount of such expenses paid through this directed brokerage arrangement during this period was \$1,854.

The cost of calculating the Fund's NAV per share is a Fund expense pursuant to the Advisory Agreement. During the year ended December 31, 2018, the Fund accrued \$45,000 in accounting fees in the Statement of Operations.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

As per the approval of the Board, the Fund compensates officers of the Fund, who are employed by the Fund and are not employed by the Adviser (although the officers may receive incentive based variable compensation from affiliates of the Adviser). During the year ended December 31, 2018, the Fund accrued \$138,939 in payroll expenses in the Statement of Operations.

The Fund pays each Trustee who is not considered an affiliated person an annual retainer of \$3,000 plus \$1,000 for each Board meeting attended. Each Trustee is reimbursed by the Fund for any out of pocket expenses incurred in attending meetings. All Board committee members receive \$500 per meeting attended. The Audit Committee Chairman receives an annual fee of \$3,000, the Nominating Committee Chairman receives an annual fee of \$2,000, and the Lead Trustee receives an annual fee of \$1,000. A Trustee may receive a single meeting fee, allocated among the participating funds, for participation in certain meetings held on behalf of multiple funds. Trustees who are directors or employees of the Adviser or an affiliated company receive no compensation or expense reimbursement from the Fund.

4. Portfolio Securities. Purchases and sales of securities during the year ended December 31, 2018, other than short term securities and U.S. Government obligations, aggregated \$13,070,447 and \$40,910,630, respectively.

5. Capital. The Fund is authorized to issue an unlimited number of common shares of beneficial interest (par value \$0.001). The Board has authorized the repurchase of its shares on the open market when the shares are trading at a discount of 10% or more (or such other percentage as the Board may determine from time to time) from the NAV of the shares. During the years ended December 31, 2018 and 2017, the Fund did not repurchase and retire any shares in the open market.

The Fund's Declaration of Trust, as amended, authorizes the issuance of an unlimited number of shares of \$0.001 par value Preferred Shares. Preferred Shares are senior to the common shares and result in the financial leveraging of the common shares. Such leveraging tends to magnify both the risks and opportunities to common shareholders. Dividends on the Series A Preferred are cumulative and the liquidation value is \$50 per share. The Fund is required by the 1940 Act and by the Fund's Statement of Preferences to meet certain asset coverage tests with respect to the Preferred Shares. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Series A Preferred Shares at the redemption price of \$50 per share plus an amount equal to the accumulated and unpaid dividends whether or not declared on such shares in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund's ability to pay dividends to common shareholders and could lead to sales of portfolio securities at inopportune times. The income received on the Fund's assets may vary in a manner unrelated to the fixed and variable rates, which could have either a beneficial or detrimental impact on net investment income and gains available to common shareholders.

The Fund has an effective shelf registration authorizing the offering of an additional \$150 million of common or preferred shares. As of December 31, 2018, after considering the common and preferred shares rights offerings, the Fund has approximately \$65 million available for issuance under the current shelf registration.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

The Series A Preferred has an annual dividend rate of 3.80%. The Fund may redeem at any time all or any part of the Series A Preferred at the liquidation value plus accumulated and unpaid dividends. During the year ended December 31, 2018, 978,908 Series A Preferred were put back to the Fund at a liquidation value of \$50 per share, plus accumulated and unpaid dividends. During the year ended December 31, 2018, the Fund repurchased and retired 800 of the series A Preferred in the open market at an investment of \$37,527 and average discount of approximately 6.20% from its liquidation preference.

During the year ended December 31, 2018, the Fund completed a rights offering whereby one transferable right was issued for each common share held as of November 12, 2018. Three rights were required to purchase one additional common share and one Series B Preferred share at the subscription price of \$67.50. On December 19, 2018, the Fund issued 1,258,029 common shares and 1,258,029 Series B Preferred shares receiving net proceeds of \$84,586,957, after the deduction of estimated offering expenses of \$330,000. The NAV of the Fund was reduced by \$0.55 per share on the day the additional common shares were issued due to the additional common shares being issued below NAV.

The Series B Preferred will pay distributions quarterly at an annualized dividend rate of 7.00% of the \$50 per share liquidation preference for the quarterly dividend periods ending on or prior to December 2019 (Year 1). At least 30 days prior to the end of the Year 1, the Board will determine and publicly announce a reset fixed dividend rate that will apply for all remaining quarterly dividend periods. Each reset dividend rate will be determined by the Board or a committee thereof in its sole discretion, and such rate will be at least 200 basis points over the yield of the ten year U.S. Treasury Note at the date of determination, but in no case will such rate be less than an annualized rate of 4.00% nor greater than an annualized rate of 7.00%. The Series B may be put back to the Fund during the 30-day period prior to each of December 26, 2021 and December 26, 2023 at the liquidation preference of \$50 per share, plus any accumulated and unpaid dividends, and redeemed by the Fund, at its option, at the liquidation preference of \$50 per share, plus any accumulated and unpaid dividends, at any time commencing on December 26, 2023. The Fund intends to apply for an NYSE American listing of the Series B Preferred.

The following table summarizes Cumulative Preferred Share information:

Series	Issue Date	Authorized	Number of Shares Outstanding at 12/31/18	Net Proceeds	2018 Dividend Rate Range	Dividend Rate at 12/31/18	Accrued Dividends at 12/31/18
A 3.800%	April 11, 2013	1,200,000	46,374	\$70,286,465	Fixed Rate	3.800%	\$ 1,224
B 7.000%	December 19, 2018	1,370,433	1,258,029	84,586,957	Fixed Rate	7.000%	146,770

The holders of Preferred Shares generally are entitled to one vote per share held on each matter submitted to a vote of shareholders of the Fund and will vote together with holders of common shares as a single class. The holders of Preferred Shares voting together as a single class also have the right currently to elect two Trustees and under certain circumstances are entitled to elect a majority of the Board of Trustees. In addition, the affirmative vote of a majority of the votes entitled to be cast by holders of all outstanding shares of the Preferred Shares, voting as a single class, will be required to approve any plan of reorganization adversely affecting the Preferred Shares, and the approval of two-thirds of each class, voting separately, of the Fund's outstanding voting stock must approve the conversion of the Fund from a closed-end to an open-end investment company. The approval of a majority (as defined in the 1940 Act) of the outstanding Preferred Shares and a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities are required to approve certain other actions, including changes in the Fund's investment objectives or fundamental investment policies.

The Gabelli Global Utility & Income Trust

Notes to Financial Statements (Continued)

6. Industry Concentration. Because the Fund primarily invests in common stocks and other securities of foreign and domestic companies in the utility industry, its portfolio may be subject to greater risk and market fluctuations than a portfolio of securities representing a broad range of investments.

7. Indemnifications. The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

8. Subsequent Events. Management has evaluated the impact on the Fund of all subsequent events occurring through the date the financial statements were issued and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

The Gabelli Global Utility & Income Trust

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of
The Gabelli Global Utility & Income Trust:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of The Gabelli Global Utility & Income Trust (the “Fund”) as of December 31, 2018, the related statement of operations for the year ended December 31, 2018, the statement of changes in net assets attributable to common shareholders for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2018 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets attributable to common shareholders for each of the two years in the period ended December 31, 2018 and the financial highlights for each of the five years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

² The Fund's Board of Trustees is divided into three classes, each class having a term of three years. Each year the term of office of one class expires and the successor or successors elected to such class serve for a three year term. The three year term for each class expires as follows:

* Term expires at the Fund's 2019 Annual Meeting of Shareholders or until their successors are duly elected and qualified.

** Term expires at the Fund's 2020 Annual Meeting of Shareholders or until their successors are duly elected and qualified.

*** Term expires at the Fund's 2021 Annual Meeting of Shareholders or until their successors are duly elected and qualified.

For officers, includes time served in prior officer positions with the Fund. Each officer will hold office for an indefinite term until the date he or she resigns or retires or until his or her successor is elected and qualified.

³ This column includes only directorships of companies required to report to the SEC under the Securities Exchange Act of 1934, as amended, i.e., public companies, or other investment companies registered under the 1940 Act.

⁴ Trustees who are not interested persons are considered "Independent" Trustees.

⁵ This Trustee is elected solely by and represents the shareholders of the preferred shares issued by this Fund.

(a) Non-taxable.

(b) Total amounts may differ due to rounding.

(c) Taxable as ordinary income for Federal tax purposes.

(d) Decrease in cost basis.

(e) On May 7, 2013, the Fund also distributed rights equivalent to \$1.0458 per share based upon full subscription of all issued common and preferred shares.

All designations are based on financial information available as of the date of this annual report and, accordingly, are subject to change. For each item, it is the intention of the Fund to designate the maximum amount permitted under the Internal Revenue Code and the regulations thereunder.

AUTOMATIC DIVIDEND REINVESTMENT AND VOLUNTARY CASH PURCHASE PLANS

Enrollment in the Plan

It is the policy of The Gabelli Global Utility & Income Trust to automatically reinvest dividends payable to common shareholders. As a “registered” shareholder, you automatically become a participant in the Fund’s Automatic Dividend Reinvestment Plan (the “Plan”). The Plan authorizes the Fund to credit shares of common stock to participants upon an income dividend or a capital gains distribution regardless of whether the shares are trading at a discount or a premium to net asset value. All distributions to shareholders whose shares are registered in their own names will be automatically reinvested pursuant to the Plan in additional shares of the Fund. Plan participants may send their stock certificates to Computershare Trust Company, N.A. (“Computershare”) to be held in their dividend reinvestment account. Registered shareholders wishing to receive their distribution in cash must submit this request in writing to:

The Gabelli Global Utility & Income Trust
c/o Computershare
P.O. Box 505000
Louisville, KY 40233

Shareholders requesting this cash election must include the shareholder’s name and address as they appear on the share certificate. Shareholders with additional questions regarding the Plan or requesting a copy of the terms of the Plan may contact Computershare at (800) 336-6983.

If your shares are held in the name of a broker, bank, or nominee, you should contact such institution. If such institution is not participating in the Plan, your account will be credited with a cash dividend. In order to participate in the Plan through such institution, it may be necessary for you to have your shares taken out of “street name” and re-registered in your own name. Once registered in your own name, your dividends will be automatically reinvested. Certain brokers participate in the Plan. Shareholders holding shares in “street name” at participating institutions will have dividends automatically reinvested. Shareholders wishing a cash dividend at such institution must contact their broker to make this change.

The number of shares of common stock distributed to participants in the Plan in lieu of cash dividends is determined in the following manner. Under the Plan, whenever the market price of the Fund’s common stock is equal to or exceeds net asset value at the time shares are valued for purposes of determining the number of shares equivalent to the cash dividends or capital gains distribution, participants are issued shares of common stock valued at the greater of (i) the net asset value as most recently determined or (ii) 95% of the then current market price of the Fund’s common stock. The valuation date is the dividend or distribution payment date or, if that date is not a New York Stock Exchange (“NYSE”) trading day, the next trading day. If the net asset value of the common stock at the time of valuation exceeds the market price of the common stock, participants will receive shares from the Fund valued at market price. If the Fund should declare a dividend or capital gains distribution payable only in cash, Computershare will buy common stock in the open market, or on the NYSE American or elsewhere, for the participants’ accounts, except that Computershare will endeavor to terminate purchases in the open market and cause the Fund to issue shares at net asset value if, following the commencement of such purchases, the market value of the common stock exceeds the then current net asset value.

The automatic reinvestment of dividends and capital gains distributions will not relieve participants of any income tax which may be payable on such distributions. A participant in the Plan will be treated for federal income tax purposes as having received, on a dividend payment date, a dividend or distribution in an amount equal to the cash the participant could have received instead of shares.

Voluntary Cash Purchase Plan

The Voluntary Cash Purchase Plan is yet another vehicle for our shareholders to increase their investment in the Fund. In order to participate in the Voluntary Cash Purchase Plan, shareholders must have their shares registered in their own name.

Participants in the Voluntary Cash Purchase Plan have the option of making additional cash payments to Computershare for investments in the Fund’s shares at the then current market price. Shareholders may send an amount from \$250 to \$10,000. Computershare will use these funds to purchase shares in the open market on or about the 1st and 15th of each month. Computershare will charge each shareholder who participates \$0.75, plus a pro rata share of the brokerage commissions. Brokerage charges for such purchases are expected to be less than the usual brokerage charge for such transactions. It is suggested that any voluntary cash payments be sent to Computershare, P.O. Box 505000, Louisville, KY 40233 such that Computershare receives such payments approximately 10 days before the 1st and 15th of the month. Funds not received at least five days before the investment date shall be held for investment until the next purchase date. A payment may be withdrawn without charge if notice is received by Computershare at least 48 hours before such payment is to be invested.

Shareholders wishing to liquidate shares held at Computershare must do so in writing or by telephone. Please submit your request to the above mentioned address or telephone number. Include in your request your name, address, and account number. The cost to liquidate shares is \$2.50 per transaction as well as the brokerage commission incurred. Brokerage charges are expected to be less than the usual brokerage charge for such transactions.

For more information regarding the Dividend Reinvestment Plan and Voluntary Cash Purchase Plan, brochures are available by calling (914) 921-5070 or by writing directly to the Fund.

The Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to the members of the Plan at least 90 days before the record date for such dividend or distribution. The Plan also may be amended or terminated by Computershare on at least 90 days written notice to participants in the Plan.

THE GABELLI GLOBAL UTILITY & INCOME TRUST AND YOUR PERSONAL PRIVACY

Who are we?

The Gabelli Global Utility & Income Trust is a closed-end management investment company registered with the Securities and Exchange Commission under the Investment Company Act of 1940. We are managed by Gabelli Funds, LLC, which is affiliated with GAMCO Investors, Inc., a publicly held company that has subsidiaries that provide investment advisory services for a variety of clients.

What kind of non-public information do we collect about you if you become a Fund shareholder?

When you purchase shares of the Fund on the New York Stock Exchange, you have the option of registering directly with our transfer agent in order, for example, to participate in our dividend reinvestment plan.

- *Information you give us on your application form.* This could include your name, address, telephone number, social security number, bank account number, and other information.
- *Information about your transactions with us.* This would include information about the shares that you buy or sell; it may also include information about whether you sell or exercise rights that we have issued from time to time. If we hire someone else to provide services — like a transfer agent — we will also have information about the transactions that you conduct through them.

What information do we disclose and to whom do we disclose it?

We do not disclose any non-public personal information about our customers or former customers to anyone other than our affiliates, our service providers who need to know such information, and as otherwise permitted by law. If you want to find out what the law permits, you can read the privacy rules adopted by the Securities and Exchange Commission. They are in volume 17 of the Code of Federal Regulations, Part 248. The Commission often posts information about its regulations on its website, www.sec.gov.

What do we do to protect your personal information?

We restrict access to non-public personal information about you to the people who need to know that information in order to provide services to you or the Fund and to ensure that we are complying with the laws governing the securities business. We maintain physical, electronic, and procedural safeguards to keep your personal information confidential.

Portfolio Manager Biography

Mario J. Gabelli, CFA, is Chairman, Chief Executive Officer, and Chief Investment Officer - Value Portfolios of GAMCO Investors, Inc. that he founded in 1977, and Chief Investment Officer - Value Portfolios of Gabelli Funds, LLC and GAMCO Asset Management Inc. He is also Executive Chairman of Associated Capital Group, Inc. Mr. Gabelli is a summa cum laude graduate of Fordham University and holds an MBA degree from Columbia Business School and Honorary Doctorates from Fordham University and Roger Williams University.

We have separated the portfolio manager's commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio manager's commentary is unrestricted. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

The Net Asset Value per share appears in the Publicly Traded Funds column, under the heading "Specialized Equity Funds," in Monday's The Wall Street Journal. It is also listed in Barron's Mutual Funds/Closed End Funds section under the heading "Specialized Equity Funds."

The Net Asset Value per share may be obtained each day by calling (914) 921-5070 or visiting www.gabelli.com.

The NASDAQ symbol for the Net Asset Value is "XGLUX."

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund may from time to time purchase its common shares in the open market when the Fund's shares are trading at a discount of 10% or more from the net asset value of the shares. The Fund may also, from time to time, purchase its preferred shares in the open market when the preferred shares are trading at a discount to the liquidation value.
