Associate Portfolio Manager

To Our Shareholders,

Thank you for your investment in the GAMCO Global Growth Fund.

For the quarter ended December 31, 2018, the net asset value (NAV) per Class I Share of The GAMCO Global Growth Fund decreased 14.3% compared with a decrease of 12.8% for the Morgan Stanley Capital International (MSCI) All Country (AC) World Index. Other classes of shares are available. See page 2 for additional performance information for all classes.

On December 19 at 2:29 pm, 29 minutes after markets signaled their initial distaste for the release of the FOMC statement, Federal Reserve chairman Jerome Powell approached the podium to deliver the most anticipated Federal Reserve press conference in recent history.

It was the culmination of an eventful year for the market. The exuberant reaction to the passage of the Tax Cuts and Jobs Act resulted in the best January market return in over 20 years, as January marked a new high of 2872 for the S&P 500. The remainder of the year can best be summarized as strong corporate earnings and broad U.S. economic strength, a sharp contrast to most major international economies which saw decelerating growth. U.S. GDP growth peaked at 4.2% in the second quarter and followed up with a solid 3.5% in the third quarter. Fourth quarter growth is tracking somewhat weaker. The stronger U.S. economy, relative to other developed economies, and divergent global central bank policies resulted in a steadily increasing U.S. dollar over the course of the year. Despite increasing uncertainty around trade and tariff disputes, the relatively robust economic backdrop in 2018 gave the Federal Reserve cover to raise rates in March, June and September, as expected and with little resistance.

Average Annual Returns through December 31, 2018 (a)

	Quarter	1 Year	3 Year	5 Year	10 Year	15 Year	Since Inception (2/7/94)
Class I (GGGIX)	(14.33)%	(2.37)%	8.92%	6.04%	12.44%	7.55%	8.75%
Class AAA (GICPX)	(14.40)	(2.80)	8.27	5.43%	11.96	7.23	8.54
MSCI AC World Index	(12.75)	(9.42)	6.60	4.26	9.46	6.19	7.33 (b)
Lipper Global Large-Cap Growth Fund Classification	(13.23)	(6.23)	6.79	4.91	10.26	7.08	7.01
Class A (GGGAX)	(14.40)	(2.80)	8.28	5.43	11.96	7.23	8.55
With sales charge (c)	(19.33)	(8.39)	6.16	4.19	11.30	6.80	8.29
Class C (GGGCX)	(14.56)	(3.50)	7.46	4.64	11.12	6.42	7.94
With contingent deferred sales charge (d)	(15.41)	(4.46)	7.46	4.64	11.12	6.42	7.94

In the current prospectuses dated April 30, 2018 as supplemented on May 31, 2018, the gross expense ratios for Class AAA, A, C, and I Shares are 1.67%, 1.67%, 2.42%, and 1.42%, respectively, and the net expense ratios for these share classes after contractual reimbursements by Gabelli Funds, LLC, (the "Adviser") are 1.25%, 1.25%, 2.00%, and 1.00%, respectively. Class AAA and Class I Shares do not have a sales charge. The maximum sales charge for Class A Shares and Class C Shares is 5.75% and 1.00%, respectively.

- (a) *Returns represent past performance and do not guarantee future results. Total returns and average annual returns reflect changes in share price, reinvestment of distributions, and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Returns would have been lower had the Adviser not reimbursed certain expenses. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days of purchase. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectuses contain information about these and other matters and should be read carefully before investing. To obtain a prospectus, please visit our website at www.gabelli.com. Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks. The Class AAA Share NAVs are used to calculate performance for the periods prior to the issuance of Class A Shares, Class C Shares, and Class I Shares on March 2, 2000, March 12, 2000, and January 11, 2008, respectively. The actual performance of the Class A and Class C Shares would have been lower due to the additional fees and expenses associated with these classes of shares. The actual performance of Class I Shares would have been higher due to lower expenses related to this class of shares. The MSCI AC World Index is an unmanaged market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI AC World Index consists of 45 country indices comprising 24 developed and 21 emerging market country indices. The Lipper Global Large-Cap Growth Fund Classification reflects the performance of mutual funds classified in this particular category. Dividends are considered reinvested. You cannot invest directly in an index.*
- (b) MSCI AC World Index since inception performance is a blend of Gross Performance excluding applicable taxes and Net Performance. This benchmark's Net Performance began on December 29, 2000.
- (c) Performance results include the effect of the maximum 5.75% sales charge at the beginning of the period.
- (d) Assuming payment of the 1% maximum contingent deferred sales charge imposed on redemptions made within one year of purchase.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, are available on our website at www.gabelli.com.

But this time, Powell had a bigger challenge in front of him. Even though the S&P would reach a new high water mark of 2930 in September, the market indices were showing signs of fatigue, with certain market internals showing outright signs of distress. There was political pressure from the President, calling out the Federal Reserve for being too aggressive. What's more, the ongoing trade negotiations with China created the overhang of a potential binary event with the March 1 deadline fast approaching. This is where Powell found himself, a week before Christmas, attempting to justify another 25 basis point increase with global markets hanging on his every enunciation. Just minutes into Powell's prepared remarks, investors had heard enough and headed for the exits. Despite some "crosscurrents," namely slower global growth and increased financial market volatility, the FOMC continued to see healthy levels of growth and falling unemployment. Two more hikes were expected in 2019, and another in 2020.

The Economy

Despite a slightly reduced outlook for the Federal Reserve funds rate, Powell's commentary was not dovish enough for the markets. In defense of the FOMC, by most measures the economy is on solid footing. Though inflation (PCE deflator) remains near the Federal Reserve's medium term objective of 2%, the Federal Reserve likely views the near record low unemployment rate of 3.7% as the precursor to higher inflation and, given its dual mandate of employment and price stability, is trying to get ahead of an overheating economy. Hence, the ninth hike in three years.

What may not be fully appreciated by the Federal Reserve are the second order effects of capital spending. Capex has been constrained for most of this expansion, due to the buildup of excess capacity in the previous business cycle. Corporate America has since favored buybacks and dividends over capital investment. However, with the new tax code, aging capital stock, and high CEO confidence, corporations are investing again. U.S. real capex is growing about 7%. Capex carries a healthy multiplier, which is encouraging for economic growth. Capex drives job gains and improved productivity, an important component of economic growth that has been absent most of this expansion. As productivity improves output per worker, unit labor costs (cost of labor per unit of output) should remain subdued, containing wage pressure and inflation. This is all to say, low rates of unemployment may yet continue without necessarily breeding higher inflation. That is, if business confidence isn't shaken by tariff uncertainty.

So, nine hikes in three years. Eight hikes in two. That is a lot. Optimists argue that rates remain low relative to history. Unfortunately, this view fails to consider a few things that make today's monetary tightening cycle more delicate than it may appear. U.S. real GDP trend growth is approximately 2.5%, much lower than the 3.5% average GDP of the 2000s and 4%-plus GDP growth of the 1980s. Consequently, a 2.5% Federal Reserve funds rate will have a greater tightening impact on our economy than it would have had in prior business cycles. But even more important than the absolute levels of interest rates is the rate of change. And the rate of change has been drastic, from effectively zero to 2.5% in three years. To translate this into real world ramifications, consider the change in mortgage rates in the U.S. In just the past year, the mortgage payment on a median priced home in the U.S has increased 13%, more than twice the 6% increase in the median sale price. Borrowers feel this.

It takes 18 to 24 months for changes in interest rates to be fully absorbed by the economy, and it typically takes a full 24 months from the first hike for market volatility to increase. The Federal Reserve began its tightening cycle, in earnest with its second rate hike, on December 14, 2016. From this perspective, the fourth quarter correction appears to be right on cue. While the markets may cheer a Federal Reserve pause in 2019, there is still a significant amount of tightening in the pipeline that is yet to be digested by the economy, with or without another hike.

The Markets

We've written ad nauseam about the headwinds to growth, which include higher rates, a strong U.S. dollar, tariffs, and domestic weakness in China and Europe. Additionally, earnings will face difficult year-over-year comparisons as we lap the tax cut benefit in early 2019. But the most important factor weighing on markets is the drastic change in the liquidity environment. Asset prices are recalibrating to a new era of tighter monetary policy. In addition to rising interest rates, the Federal Reserve is running off its balance sheet at a cadence of \$50 billion per month, the economic impact of which is more difficult to quantify. Asset prices are now reflecting the expectation for slower growth in 2019 given the tighter monetary backdrop. This was sniffed out by the "early cyclical" parts of the market that one would expect: homebuilders and autos. In 2018, the S&P 500 Homebuilders Select index and S&P 500 Automobiles and Components index lost 26% and 32%, respectively. Other cyclical areas of the market, including some of the biggest beneficiaries of tax reform and deregulation, haven't fared much better. The S&P 500 Banks and S&P 500 Energy indices declined 16% and 18%, respectively.

Since the beginning of 2018, the S&P 500 price-to-earnings multiple has contracted nearly 25%, from 18.5x to 14.5x. Multiple contraction is consistent with Federal Reserve tightening cycles of the past. Historically, multiple compression does not abate until the Federal Reserve officially completes its tightening cycle. To be sure, increased risks from slower global growth and tariffs are also weighing on the market multiple. These concerns have also been reflected in 2019 S&P earnings growth estimates, which have decreased modestly since last quarter, from +10.1% to +8.8% year-over-year.

We continue to monitor the yield curve (spread between 2-year and 10-year Treasuries), which has predicted 9 of the last 9 recessions. The yield curve reached a low of 11 basis points (bps) on December 19, down from 78bps in February. While the yield curve does have a track record of predictive power, the timing of subsequent recessions has been inconsistent. Historically, recessions have commenced between 6 and 24 months after the yield curve inverts. So an inversion tomorrow is not cause for immediate panic. Nonetheless, if the yield curve were to invert, we would expect a short-term emotional reaction from the market, and we would be preparing for a more severe intermediate-term slowdown.

Portfolio Observations

In anticipation of late cycle market behavior, we've maintained a defensive posture throughout 2018. We've emphasized organic secular growers with high level of profitability and free cash flow. Given our expectation for a strong U.S. dollar, we've favored U.S. domiciled companies and companies that generate U.S. dollar revenues.

The current correction has provided an attractive entry point for many unique assets that have historically sold at premium valuations. We have taken advantage of recent market volatility by adding to these positions, whose growth opportunities remain intact. Despite our expectation for continued stock price volatility, we expect these companies to sustain their top-line growth as their products will remain in high demand, even if the economy slows.

We initiated a new position in Adyen (1.7% of net assets as of December 31, 2018), a Dutch global payment acquirer. Adyen is rapidly gaining market share with its single integrated platform which vastly simplifies the payments value chain for online and omni-channel merchants. We also initiated a position in the pioneer of athleisure apparel, Lululemon (1.5%), a company that has become an international growth phenomenon. Just as impressive as its high end apparel is Lululemon's vertically integrated operating model. Lululemon is able to capture more margin than competitors that utilize wholesale distribution channels.

Other new purchases in the quarter include Intuitive Surgical (1.0%), the maker of the da Vinci robotic surgical system, and Aon (1.9%), a leading provider of risk, retirement and health solutions.

We added to our position in Netflix (2.1%) , which continues to add subscribers at an astonishing rate. The company expects 8 million paid net additions in the fourth quarter, which would bring its paid subscriber base to about 140 million. Comcast, by comparison, has 22 million video subs. With each passing quarter, Netflix is able to spread its formidable content costs across its ever wider subscriber base. We expect the company to more than double its subscriber base over the next decade as it more deeply penetrates international markets. The company continues to build out its library of original content, which decreases its dependence on licensed content and creates even more exclusivity. Investors should benefit from material growth in free cash flow over the next few years.

We increased our positions in ServiceNow (1.7%) and Palo Alto Networks (1.0%). IT spending intentions for 2019 suggest continued healthy demand for enterprise software, as companies prioritize digital transformation projects, which result in better customer and employee experiences, improved efficiencies and lower total cost of ownership. Many customers view these companies as highly strategic in their effort to modernize their tech stack. Further, our enterprise software vendors have an ever increasing mix of subscription revenue, which results in larger and more predictable revenue streams and is generally accretive to margins.

We increased our stake in Illumina (2.4%), the leader in next-generation DNA sequencing. The cost to sequence an entire human genome has dropped from \$100 million in 2002 to under \$1,000 today. Illumina believes its recently launched NovaSeq instrument will one day enable the \$100 genome. As costs decline, Illumina is benefitting from an explosion of use cases for sequencing, such as noninvasive prenatal testing, rare and undiagnosed disease, oncology, population genomics, and consumer genomics, such as 23andMe and Ancestry. Many of these end markets are seeing inflection points. In 2017, Illumina processed 7 million samples for the consumer market – more than the previous 10 years combined.

We added to Amazon (3.8%), which is rapidly becoming a profitable company. Amazon is benefitting from growth in its high margin revenue streams, including Amazon Web Services, advertising, and subscriptions. Even its retail operation, whose level of profitability has long been chided by skeptics, has become profitable

in North America as the business leverages its vast fixed costs and the higher margin third-party business becomes a greater part of the overall mix.

Other names we added to in the quarter, based on recent business performance and attractive valuations, were Abbott Laboratories (1.1%) and Keyence (4.2%).

Several positions were eliminated in order to reduce cyclical exposure including Blackstone, Boeing, and Fanuc. We sold two retailers, TJX companies and Ulta Beauty. While these businesses maintain differentiated retail models, the most recent quarterly results were disappointing in the context of their valuation. Other companies that were eliminated due to growth concerns were Align Technology, Broadridge, and Swatch.

We reduced Home Depot (1.0%) given our outlook for the housing market, as we expect tighter financial conditions to impact housing turnover. However, we maintain a favorable view on the company's long-term prospects. Home Depot's business is difficult for ecommerce players to disintermediate and the company is run by a highly competent management team.

Lastly, we reduced NVIDIA (0.6%) after quarterly results and guidance missed our expectations. However, the company's long-term growth opportunity in gaming, data center, and autonomous vehicles remains largely intact. We expect to get more visibility on NVIDIA's growth outlook in the weeks ahead.

Other positions that were trimmed include Accenture (2.3%), Autodesk (0.8%), Kering (2.6%), Nestle (2.3%), Sherwin-Williams (1.2%), and Sony (1.2%).

At quarter's end, we were overweight (relative to the MSCI All Country World Index) communication services, consumer discretionary, technology, and healthcare. We were underweight financials, industrials, energy, materials, real estate, and utilities. We were equal weight consumer staples.

We ended the quarter overweight the U.S. and the Euro Zone, equal weight the U.K., and underweight Emerging Markets, Canada, Japan, Pacific ex-Japan and Other Europe.

Performance Commentary

Holdings with the most positive impact on performance for the quarter (based upon price change and the size of the holding) were, in order, Jardine Matheson (2.3% of net assets as of December 31, 2018), HDFC Bank (1.3%), American Tower (1.3%), Tableau (1.3%), Pernod Ricard (1.0%), Unicharm (0.4%), Abbott Laboratories (1.1%), Tencent (1.0%), Walt Disney (0.4%), and Danaher (0.7%). The biggest detractors, in order, were Amazon (3.8%), Apple (2.1%), Sony (1.2%), Alphabet (5.1%), Microsoft (5.2%), adidas (3.6%), Keyence (4.2%), Adobe (3.3%), Netflix (2.1%), and Accenture (2.3%).

For the full year, the stocks with the most positive impact on performance were, in order, Adobe (3.3%), Microsoft (5.2%), Amazon (3.8%), UnitedHealth (3.7%), Tableau (1.3%), Illumina (2.4%), Mastercard (1.9%), Jardine Matheson (2.3%), Visa (2.6%), and Zoetis (2.1%). The most negative contributors for the year were, in order, NVIDIA (0.6%), Fanuc (2.3%), Accenture (2.3%), Keyence (4.2%), Tencent (1.0%), Adyen (1.7%), Schroders (0.7%), IHS Markit (2.5%), Aon (1.9%), and Sony (1.2%).

In Conclusion

In volatile times like these, it is helpful to revisit first principles. The S&P 500 is trading at 14.5x forward earnings, below its 35 year mean of 15x. At 14.5x, the S&P 500 offers an earnings yield of 7%, a dividend yield of 2.25% and the potential for long-term capital appreciation. In contrast, the 10-year Treasury yields a fixed 2.65%, with limited prospects for long-term capital appreciation. So stocks remain attractive relative to bonds. Bullish sentiment, a contrarian indicator, was ubiquitous at the beginning of the year but has largely retracted; this is a healthy development for stocks. Consumer sentiment remains elevated; historically, consumer sentiment drops about a year prior to a recession. Earnings growth remains healthy and employment remains at a near record; typically, a recession is accompanied with earnings, employment and an economy that are all in decline. And at the company level, the market is offering a window of opportunity to buy special businesses at attractive valuations.

One of the most important competitive edges that we retain as fundamental stock pickers is time arbitrage – the ability to maintain a long-term outlook amid the short-term noise. Our long-term investment horizon allows us to buy businesses with competitive moats that will enable their earnings to compound over many years. For those with a similar investment horizon, stocks remain attractive relative to bonds and cash. However, this is a time to be selective. Dispersion has increased. Breadth has narrowed. An emphasis on fundamentals is warranted. Market corrections shake out the weak hands. Those who can weather the storm will be rewarded.

Global Allocation

The accompanying chart presents the Fund's holdings by geographic region as of December 31, 2018. The geographic allocation will change based on current global market conditions. Countries and/or regions represented in the chart and discussed in this commentary may or may not be included in the Fund's future portfolio.

HOLDINGS BY GEOGRAPHIC REGION

Let's Talk Stocks

The following are stock specifics on selected holdings of our Fund. Favorable earnings prospects do not necessarily translate into higher stock prices, but they do express a positive trend that we believe will develop over time. Individual securities mentioned are not necessarily representative of the entire portfolio. For the following holdings, the percentage of net assets and their share prices are stated first in United States dollars (USD) and second in the local currency, where applicable, as of December 31, 2018.

adidas (3.6% of net assets as of December 31, 2018) (ADS.GR – \$208.99/€182.40 – Frankfurt Stock Exchange) is the world's second-largest sporting goods manufacturer. *adidas* maintains leading market share in Europe and is number two, behind Nike, in the United States and China. The brand has experienced a resurgence in recent years which has resulted in strong growth across all geographies, including market share gains in the United States.

Adobe Systems (3.3%) (ADBE – \$226.24 – NASDAQ) is the global leader in digital marketing and digital media solutions. Adobe has the most comprehensive end-to-end solution for digital marketing. Its tools allow customers to create digital content, deploy it across media and devices, and measure and optimize it over time. Adobe has successfully transitioned from a product-based desktop business to a cloud-based subscription business. Over 90% of total revenue is now recurring. The demand for design capabilities continues to rise at a dramatic pace, as reflected in Adobe's large and growing total addressable market of \$64 billion in 2019.

Alphabet (5.1%) (GOOG/GOOGL – \$1,035.61/\$1,044.96 – NASDAQ) is the parent company of Google, the world's leading Internet search engine. The company benefits from a powerful competitive moat in one of the best secular markets, digital advertising, in which Google maintains approximately 40% market share. The company generates revenue by providing advertisers the opportunity to deliver targeted and measurable advertising. Alphabet's healthy core search business has allowed the company to pursue a variety of "moonshot" projects such as streaming video (YouTube), life sciences (Verily), and autonomous driving (Waymo).

Amazon.com (3.8%) (AMZN – \$1,501.97 – NASDAQ) launched in 1995 as an online book retailer and has evolved into a dominant e-commerce platform and public cloud provider. Amazon is benefitting from the secular trend of e-commerce and the transition from on-premise to public cloud data centers. Amazon's competitive advantage within e-commerce is Amazon Prime, which benefits from a virtuous cycle as the continuously expanding selection of inventory drives traffic, which attracts more sellers, who add yet more selection. Amazon continues to invest in the Prime value proposition (free and faster shipping, free video and music streaming, libraries of free books and magazines, and a host of other benefits). Prime members spend more than non-Prime customers and their purchasing volume tends to increase over time. In addition to its retailing operations, Amazon pioneered the concept of hyperscale public cloud with its Amazon Web Services (AWS) and continues to be the dominant market share leader within that rapidly growing industry.

KEYENCE (4.2%) (6861.T – \$505.44/¥55,399 – Tokyo Stock Exchange) has steadily grown since 1974 to become an innovative leader in the development and manufacturing of industrial automation and inspection equipment worldwide. Products consist of code readers, laser markers, machine vision systems, measuring systems, microscopes, sensors, and static eliminators. Today, KEYENCE serves over 200,000 customers in 70 countries around the world.

L'Oreal (3.7%) (OR.P – \$228.82/€199.72 – Euronext Paris) is the leading premium beauty brand with a strong portfolio that includes Lancôme, Yves Saint Laurent, Giorgio Armani Beauty, Garnier and Kiehl's. The luxury cosmetics market grew approximately 9% in 2017, outpacing the total cosmetics market which itself grew an impressive 4%-5%. The beauty market is positioned for continued growth due to the emergence of new middle and upper classes, urbanization, and aging populations. L'Oreal is well positioned in the e-commerce channel and we expect profits to benefit from increased direct-to-consumer sales.

LVMH (3.0%) (LVMH.P – \$292.78/€255.53 – Euronext Paris) is a leading luxury brand with a balanced portfolio of products and diverse geographical revenue. The unique portfolio is comprised of Wines & Spirits, Fashion & Leather Goods, Perfumes & Cosmetics, and Watches & Jewelry.

Microsoft (5.2%) (MSFT – \$101.57 – NASDAQ) is the world’s largest software company. CEO Satya Nadella has pivoted the company away from its legacy Windows business, prioritizing cloud applications and services. The transition from Office to cloud-based Office 365 is resulting in growth in users, average revenue per user, and recurring revenue. Microsoft’s Azure has emerged as a rapidly growing public cloud competitor to Amazon’s AWS. Azure stands to benefit from Microsoft’s existing enterprise customer base and distribution channel. The company’s legacy assets position it as the hybrid cloud vendor of choice. In contrast to its cloud competition, Microsoft is free of conflict of interest with its customers.

UnitedHealth Group (3.7%) (UNH – \$249.12 – NYSE) is one of the largest and most diversified managed care companies in the United States. Its high growth Optum services business provides wellness and care management programs, financial services, information technology solutions and pharmacy benefit management (PBM) services to approximately 115 million customers.

Visa (2.6%) (V – \$131.94 – NYSE) operates a card payments network, connecting consumers, financial institutions, merchants, governments, and businesses in more than 200 countries. Visa benefits from the secular trend of cash-to-card conversion, and the displacement of cash and checks with digital forms of payment. Global card payment penetration is less than 50%, increasing approximately 2 percentage points per year. Card payment penetration is substantially lower in emerging markets, such as Brazil (35%), Mexico (16%) and India (15%).

January 10, 2019

Top Ten Holdings (Percent of Net Assets)
December 31, 2018

Microsoft Corp.	5.2%	L’Oreal S.A.	3.7%
Alphabet Inc.	5.1%	adidas AG	3.6%
Keyence Corp.	4.2%	Adobe Inc.	3.3%
Amazon.com Inc.	3.8%	LVMH Moet Hennessy Louis Vuitton SE	3.0%
UnitedHealth Group Inc.	3.7%	Visa Inc.	2.6%

Minimum Initial Investment – \$1,000

The Fund's minimum initial investment for regular accounts is \$1,000. There are no subsequent investment minimums. No initial minimum is required for those establishing an Automatic Investment Plan. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days after the date of purchase. See the prospectuses for more details.

www.gabelli.com

Please visit us on the Internet. Our homepage at www.gabelli.com contains information about GAMCO Investors, Inc., the Gabelli/GAMCO Mutual Funds, IRAs, 401(k)s, current and historical quarterly reports, closing prices, and other current news.

The Fund's daily NAVs are available in the financial press and each evening after 7:00 PM (Eastern Time) by calling 800-GABELLI (800-422-3554). Please call us during the business day, between 8:00 AM – 7:00 PM (Eastern Time), for further information.

We welcome your comments and questions via e-mail at info@gabelli.com. You may sign up for our e-mail alerts at www.gabelli.com and receive early notice of quarterly report availability, news events, media sightings, and mutual fund prices and performance.

e-delivery

We are pleased to offer electronic delivery of Gabelli fund documents. Direct shareholders of our mutual funds can elect to receive their Annual and Semiannual Reports, Manager Commentaries, and Prospectuses via e-delivery. For more information or to sign up for e-delivery, please visit our website at www.gabelli.com.

Multi-Class Shares

GAMCO Global Series Funds began offering additional classes of Fund shares in March 2000. Class AAA Shares are no-load shares offered directly through selected broker/dealers. Class A and Class C Shares are targeted to the needs of investors who seek advice through financial consultants. Class I Shares are available directly through the Fund's distributor or brokers that have entered into selling agreements specifically with respect to Class I Shares. The Board of Directors determined that expanding the types of Fund shares available through various distribution options should enhance the ability of the Fund to attract additional investors.

Portfolio Management Team Biographies

Caesar M. P. Bryan joined GAMCO Asset Management in 1994. He is a member of the global investment team of Gabelli Funds, LLC and portfolio manager of several funds within the Gabelli/GAMCO Funds Complex. Prior to joining Gabelli, Mr. Bryan was a portfolio manager at Lexington Management. He began his investment career in 1979 at Samuel Montagu Company, the London based merchant bank. Mr. Bryan graduated from the University of Southampton in England with a Bachelor of Law and is a member of the English Bar.

Howard F. Ward, CFA, joined Gabelli Funds in 1995 and currently serves as GAMCO's Chief Investment Officer of Growth Equities as well as a Gabelli Funds, LLC portfolio manager for several funds within the Gabelli/GAMCO Funds Complex. Prior to joining Gabelli, Mr. Ward served as Managing Director and Lead Portfolio Manager for several Scudder mutual funds. He also was the Investment Officer in the Institutional Investment Department with Brown Brothers, Harriman & Co. for four years. Mr. Ward received his BA in Economics from Northwestern University.

Christopher D. Ward, CFA, joined the GAMCO Growth Team in 2015 as Vice President and Associate Portfolio Manager. Prior to joining GAMCO, Mr. Ward spent five years at Morgan Stanley Private Wealth Management where he served as Director of Business Strategy for The Apollo Group. Before joining Morgan Stanley, he was with the GFI Group, Inc., a wholesale institutional brokerage firm. Mr. Ward is a Chartered Financial Analyst and a member of the New York Society of Security Analysts. He graduated from Boston College with a BA in Economics.

The GAMCO Global Growth Fund

Annual Report — December 31, 2018

(Y)our Portfolio Management Team

Caesar M. P. Bryan
Portfolio Manager

Howard F. Ward, CFA
Portfolio Manager

Christopher D. Ward, CFA
Associate Portfolio Manager

To Our Shareholders,

For the year ended December 31, 2018, the net asset value (NAV) per Class I Share of The GAMCO Global Growth Fund decreased 2.4% compared with a decrease of 9.4% for the Morgan Stanley Capital International (MSCI) All Country (AC) World Index. Other classes of shares are available. See page 3 for performance information for all classes.

Enclosed are the financial statements, including the schedule of investments, as of December 31, 2018.

Performance Discussion (Unaudited)

The Fund's investment objective is to provide investors with appreciation of capital. Current income is a secondary objective of the Fund.

The Fund's investment strategy is to invest at least 65% of its total assets in common stocks of companies which the portfolio managers believe are likely to have rapid growth in revenues and earnings and potential for above average capital appreciation or are undervalued. The Global Growth Fund invests primarily in common stocks of foreign and domestic small-capitalization, mid-capitalization, and large-capitalization issuers. As a "global" fund, the Fund invests in securities of issuers, or related investments thereof, located in at least three countries, and at least 40% of the Fund's total net assets is invested in securities of non-U.S. issuers.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semiannual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website (www.gabelli.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. To elect to receive all future reports in paper free of charge, please contact your financial intermediary, or, if you invest directly with the Fund, you may call 800-422-3554 or send an email request to info@gabelli.com.

This was an eventful year for the market. The exuberant reaction to the passage of the Tax Cuts and Jobs Act resulted in the best January market return in over 20 years. January marked a new high for the S&P 500 of 2872. The remainder of the year can best be summarized as strong corporate earnings and broad U.S. economic strength, a sharp contrast to most major international economies which saw decelerating growth. U.S. GDP growth peaked at 4.2% in the second quarter and followed up with a solid 3.5% in the third quarter. The fourth quarter tracked somewhat weaker. The stronger U.S. economy, relative to other developed economies, and divergent global central bank policies resulted in a steadily increasing U.S. dollar over the course of the year. Despite increasing uncertainty around trade and tariff disputes, the relatively robust economic backdrop in 2018 gave the Federal Reserve cover to raise rates in March, June and September, as expected and with little resistance.

Selected holdings that contributed positively to performance in 2018 were: Microsoft Corp. (5.1% of net assets as of December 31, 2018) is the world's largest software company and develops software products for computing devices ranging from PCs to servers to its Xbox game console. Microsoft is transitioning to a subscription business with high recurring revenues; Amazon.com Inc. (3.8%) launched in 1995 as an online book retailer and has evolved into a dominant e-commerce platform and public cloud provider. Amazon is benefitting from the secular trend of e-commerce and the transition from on premise to public cloud data centers; and Adobe Systems Inc. (3.3%) is the global leader in digital marketing and digital media solutions. Adobe's switch from a software sales licensing model to a monthly subscription based model for Adobe Creative Cloud (CC) has paid off as over 90% of recurring revenue comes from subscriptions.

Some of our weaker performing holdings during the year were: Accenture plc, Cl. A (2.3%), a global professional services company providing a range of strategy, consulting, digital, technology, and operations services and solutions. Broad market sell offs and currency exchange rates lowered the stock price; Aon plc. (1.9%), a leading global professional services firm providing a broad range of risk, retirement and health solutions. Aon's Median Solvency Ratio (a measure of the financial health of defined benefit plan by comparing total assets to total pension liabilities) declined sharply in the fourth quarter; and Adyen NV. (1.7%), a global payment company that allows businesses to accept e-commerce, mobile, and point of sale payments. The stock has recently pared its gains post IPO.

Thank you for your investment in The GAMCO Global Growth Fund.

We appreciate your confidence and trust.

Comparative Results

Average Annual Returns through December 31, 2018 (a) (Unaudited)

	1 Year	5 Year	10 Year	15 Year	Since Inception (2/7/94)
Class I (GGGIX)	(2.37)%	6.04%	12.44%	7.55%	8.75%
Class AAA (GICPX)	(2.80)	5.43	11.96	7.23	8.54
MSCI AC World Index	(9.42)	4.26	9.46	6.19	7.33(b)
Lipper Global Large-Cap Growth Fund Classification	(6.23)	4.91	10.26	7.08	7.01
Class A (GGGAX)	(2.80)	5.43	11.96	7.23	8.55
With sales charge (c)	(8.39)	4.19	11.30	6.80	8.29
Class C (GGGCX)	(3.50)	4.64	11.12	6.42	7.94
With contingent deferred sales charge (d)	(4.46)	4.64	11.12	6.42	7.94

In the current prospectuses dated April 30, 2018, as amended effective June 1, 2018, the gross expense ratios for Class AAA, A, C, and I Shares are 1.67%, 1.67%, 2.42%, and 1.42%, respectively, and the net expense ratios for these share classes after contractual reimbursements by Gabelli Funds, LLC, (the Adviser) are 1.25%, 1.25%, 2.00%, and 1.00%, respectively. See page 9 for the expense ratios for the year ended December 31, 2018. Class AAA and Class I Shares do not have a sales charge. The maximum sales charge for Class A Shares and Class C Shares is 5.75% and 1.00%, respectively.

- (a) Returns represent past performance and do not guarantee future results. Total returns and average annual returns reflect changes in share price, reinvestment of distributions, and are net of expenses. Investment returns and the principal value of an investment will fluctuate. When shares are redeemed, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Returns would have been lower had the Adviser not reimbursed certain expenses. The Fund imposes a 2% redemption fee on shares sold or exchanged within seven days after the date of purchase. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing. The prospectuses contain information about these and other matters and should be read carefully before investing. To obtain a prospectus, please visit our website at www.gabelli.com. Investing in foreign securities involves risks not ordinarily associated with investments in domestic issues, including currency fluctuation, economic, and political risks. The Class AAA Share NAVs are used to calculate performance for the periods prior to the issuance of Class A Shares, Class C Shares, and Class I Shares on March 2, 2000, March 12, 2000, and January 11, 2008, respectively. The actual performance of the Class A and Class C Shares would have been lower due to the additional fees and expenses associated with these classes of shares. The actual performance of Class I Shares would have been higher due to lower expenses related to this class of shares. The MSCI AC World Index is an unmanaged market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI AC World Index consists of 45 country indices comprising 24 developed and 21 emerging market country indices. The Lipper Global Large-Cap Growth Fund Classification reflects the performance of mutual funds classified in this particular category. Dividends are considered reinvested. You cannot invest directly in an index.
- (b) The MSCI AC World Index since inception performance is a blend of Gross Performance excluding applicable taxes and Net Performance. This benchmark's Net Performance began on December 29, 2000.
- (c) Performance results include the effect of the maximum 5.75% sales charge at the beginning of the period.
- (d) Assuming payment of the 1% maximum contingent deferred sales charge imposed on redemptions made within one year of purchase.

COMPARISON OF CHANGE IN VALUE OF A \$10,000 INVESTMENT IN THE GAMCO GLOBAL GROWTH FUND (CLASS AAA SHARES), MSCI AC WORLD INDEX, AND LIPPER GLOBAL LARGE-CAP GROWTH FUND CLASSIFICATION (Unaudited)

* Past performance is not predictive of future results. The performance tables and graph do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

The GAMCO Global Growth Fund

Disclosure of Fund Expenses (Unaudited)

For the Six Month Period from July 1, 2018 through December 31, 2018

Expense Table

We believe it is important for you to understand the impact of fees and expenses regarding your investment. All mutual funds have operating expenses. As a shareholder of a fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports (like this one), among others. Operating expenses, which are deducted from a fund's gross income, directly reduce the investment return of a fund. When a fund's expenses are expressed as a percentage of its average net assets, this figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period.

The Expense Table below illustrates your Fund's costs in two ways:

Actual Fund Return: This section provides information about actual account values and actual expenses. You may use this section to help you to estimate the actual expenses that you paid over the period after any fee waivers and expense reimbursements. The "Ending Account Value" shown is derived from the Fund's **actual** return during the past six months, and the "Expenses Paid During Period" shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for your Fund under the heading "Expenses Paid During Period" to estimate the expenses you paid during this period.

Hypothetical 5% Return: This section provides information about hypothetical account values and

hypothetical expenses based on the Fund's actual expense ratio. It assumes a hypothetical annualized return of 5% before expenses during the period shown. In this case – because the hypothetical return used is **not** the Fund's actual return – the results do not apply to your investment and you cannot use the hypothetical account value and expense to estimate the actual ending account balance or expenses you paid for the period. This example is useful in making comparisons of the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs such as sales charges (loads), redemption fees, or exchange fees, if any, which are described in the Prospectus. If these costs were applied to your account, your costs would be higher. Therefore, the 5% hypothetical return is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. The "Annualized Expense Ratio" represents the actual expenses for the last six months and may be different from the expense ratio in the Financial Highlights which is for the year ended December 31, 2018.

	Beginning Account Value 07/01/18	Ending Account Value 12/31/18	Annualized Expense Ratio	Expenses Paid During Period*
The GAMCO Global Growth Fund				
Actual Fund Return				
Class AAA	\$1,000.00	\$ 903.40	1.25%	\$ 6.00
Class A	\$1,000.00	\$ 903.30	1.25%	\$ 6.00
Class C	\$1,000.00	\$ 900.20	2.00%	\$ 9.58
Class I	\$1,000.00	\$ 904.70	1.00%	\$ 4.80
Hypothetical 5% Return				
Class AAA	\$1,000.00	\$1,018.90	1.25%	\$ 6.36
Class A	\$1,000.00	\$1,018.90	1.25%	\$ 6.36
Class C	\$1,000.00	\$1,015.12	2.00%	\$10.16
Class I	\$1,000.00	\$1,020.16	1.00%	\$ 5.09

* Expenses are equal to the Fund's annualized expense ratio for the last six months multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184 days), then divided by 365.

Summary of Portfolio Holdings (Unaudited)

The following table presents portfolio holdings as a percent of net assets as of December 31, 2018:

The GAMCO Global Growth Fund

Information Technology	39.4%	Real Estate	1.3%
Consumer Discretionary	21.5%	Materials	1.2%
Health Care	18.6%	Other Assets and Liabilities (Net)	<u>0.1%</u>
Consumer Staples	8.7%		<u>100.0%</u>
Financials	6.9%		
Industrials	2.3%		

The Fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (the SEC) for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain this information at www.gabelli.com or by calling the Fund at 800-GABELLI (800-422-3554). The Fund's Form N-Q is available on the SEC's website at www.sec.gov and may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Proxy Voting

The Fund files Form N-PX with its complete proxy voting record for the twelve months ended June 30, no later than August 31 of each year. A description of the Fund's proxy voting policies, procedures, and how the Fund voted proxies relating to portfolio securities is available without charge, upon request, by (i) calling 800-GABELLI (800-422-3554); (ii) writing to The Gabelli Funds at One Corporate Center, Rye, NY 10580-1422; or (iii) visiting the SEC's website at www.sec.gov.

† Total return represents aggregate total return of a hypothetical \$1,000 investment at the beginning of the year and sold at the end of the year including reinvestment of distributions and does not reflect the applicable sales charges.

(a) Per share amounts have been calculated using the average shares outstanding method.

(b) Amount represents less than \$0.005 per share.

(c) The Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. For the years ended December 31, 2018, 2017, 2016, and 2015, there was no impact on the expense ratios.

(d) Under an expense reimbursement agreement with the Adviser, the Adviser reimbursed expenses of \$261,050 for the year ended December 31, 2018 and certain Class I expenses to the Fund of \$19,466, \$14,648, \$12,486, and \$3,489 for the years ended December 31, 2017, 2016, 2015, and 2014, respectively.

(e) During the year ended December 31, 2016, the Fund received reimbursements of custody expenses paid in prior years. Had such reimbursement (allocated by relative net asset values of the Fund's share classes) been included in that period, the expense ratios would have been 1.20% (Class AAA), 1.21% (Class A), 1.96% (Class C), and 0.47% (Class I).

See accompanying notes to financial statements.

The GAMCO Global Growth Fund

Notes to Financial Statements

1. Organization. The GAMCO Global Growth Fund, a series of GAMCO Global Series Funds, Inc. (the Corporation), was incorporated on July 16, 1993 in Maryland. The Fund is a non-diversified open-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act), and one of five separately managed portfolios (collectively, the Portfolios) of the Corporation. The Fund's primary objective is capital appreciation. The Fund commenced investment operations on February 7, 1994.

2. Significant Accounting Policies. As an investment company, the Fund follows the investment company accounting and reporting guidance, which is part of U.S. generally accepted accounting principles (GAAP) that may require the use of management estimates and assumptions in the preparation of its financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

New Accounting Pronouncements. The SEC recently adopted changes to Regulation S-X to simplify the reporting of information by registered investment companies in financial statements. The amendments require presentation of the total, rather than the components, of distributable earnings on the Statement of Assets and Liabilities and also require presentation of the total, rather than the components, of distributions to shareholders, except for tax return of capital distributions, if any, on the Statement of Changes in Net Assets. The amendments also removed the requirement for parenthetical disclosure of undistributed net investment income on the Statement of Changes in Net Assets. These Regulation S-X amendments are reflected in the Fund's financial statements for the year ended December 31, 2018. As a result of adopting these amendments, the distributions to shareholders in the December 31, 2017 Statement of Changes in Net Assets presented herein have been reclassified to conform to the current year presentation.

To improve the effectiveness of fair value disclosure requirements, the Financial Accounting Standards Board recently issued Accounting Standard Update (ASU) 2018-13, Fair Value Measurement Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement (ASU 2018-13), which adds, removes, and modifies certain aspects relating to fair value disclosure. ASU 2018-13 is effective for interim and annual reporting periods beginning after December 15, 2019; early adoption of the additions relating to ASU 2018-13 is not required, even if early adoption is elected for the removals under ASU 2018-13. Management has early adopted the removals set forth in ASU 2018-13 in these financial statements and has not early adopted the additions set forth in ASU 2018-13.

Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Directors (the Board) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the Adviser).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt obligations for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Such debt obligations are valued through prices provided by a pricing service approved by the Board. Certain securities are valued principally using dealer quotations.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value American Depositary Receipt securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

The Fund employs a fair value model to adjust prices to reflect events affecting the values of certain portfolio securities which occur between the close of trading on the principal market for such securities (foreign exchanges and over-the-counter markets) at the time when net asset values of the Fund are determined. If the Fund's valuation committee believes that a particular event would materially affect net asset value, further adjustment is considered.

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Board's determinations as to the fair value of investments).

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in the aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The closing price is adjusted from the local close, therefore, such securities are classified as Level 2 in the

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

fair value hierarchy presented below. The summary of the Fund's investments in securities by inputs used to value the Fund's investments as of December 31, 2018 is as follows:

	Valuation Inputs		Total Market Value at 12/31/18
	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	
INVESTMENTS IN SECURITIES:			
ASSETS (Market Value):			
Common Stocks:			
Consumer Discretionary	\$ 9,662,678	\$ 8,763,150	\$18,425,828
Consumer Staples	488,904	6,918,552	7,407,456
Financials	5,289,827	601,076	5,890,903
Health Care	14,605,597	1,315,622	15,921,219
Industrials	—	1,914,791	1,914,791
Information Technology	27,802,773	5,926,293	33,729,066
Other Industries (a)	2,189,506	—	2,189,506
Total Common Stocks	60,039,285	25,439,484	85,478,769
TOTAL INVESTMENTS IN SECURITIES – ASSETS	\$60,039,285	\$25,439,484	\$85,478,769

(a) Please refer to the Schedule of Investments for the industry classifications of these portfolio holdings.

Additional Information to Evaluate Qualitative Information.

General. The Fund uses recognized industry pricing services – approved by the Board and unaffiliated with the Adviser – to value most of its securities, and uses broker quotes provided by market makers of securities not valued by these and other recognized pricing sources. Several different pricing feeds are received to value domestic equity securities, international equity securities, preferred equity securities, and fixed income securities. The data within these feeds are ultimately sourced from major stock exchanges and trading systems where these securities trade. The prices supplied by external sources are checked by obtaining quotations or actual transaction prices from market participants. If a price obtained from the pricing source is deemed unreliable, prices will be sought from another pricing service or from a broker/dealer that trades that security or similar securities.

Fair Valuation. Fair valued securities may be common or preferred equities, warrants, options, rights, or fixed income obligations. Where appropriate, Level 3 securities are those for which market quotations are not available, such as securities not traded for several days, or for which current bids are not available, or which are restricted as to transfer. When fair valuing a security, factors to consider include recent prices of comparable securities that are publicly traded, reliable prices of securities not publicly traded, the use of valuation models, current analyst reports, valuing the income or cash flow of the issuer, or cost if the preceding factors do not apply. The circumstances of Level 3 securities are frequently monitored to determine if fair valuation measures continue to apply.

The Adviser reports quarterly to the Board the results of the application of fair valuation policies and procedures. These may include backtesting the prices realized in subsequent trades of these fair valued securities to fair values previously recognized.

Foreign Currency Translations. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at current exchange

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/(loss) on investments.

Foreign Securities. The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

Foreign Taxes. The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

Securities Transactions and Investment Income. Securities transactions are accounted for on the trade date with realized gain or loss on investments determined by using the identified cost method. Interest income (including amortization of premium and accretion of discount) is recorded on an accrual basis. Premiums and discounts on debt securities are amortized using the effective yield to maturity method. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities that are recorded as soon after the ex-dividend date as the Fund becomes aware of such dividends.

Determination of Net Asset Value and Calculation of Expenses. Certain administrative expenses are common to, and allocated among, various affiliated funds. Such allocations are made on the basis of each fund's average net assets or other criteria directly affecting the expenses as determined by the Adviser pursuant to procedures established by the Board.

In calculating NAV per share of each class, investment income, realized and unrealized gains and losses, redemption fees, and expenses other than class specific expenses are allocated daily to each class of shares based upon the proportion of net assets of each class at the beginning of each day. Distribution expenses are borne solely by the class incurring the expense.

Distributions to Shareholders. Distributions to shareholders are recorded on the ex-dividend date. Distributions to shareholders are based on income and capital gains as determined in accordance with federal income tax regulations, which may differ from income and capital gains as determined under GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, timing differences, and differing characterizations of distributions made by the Fund. Distributions from net investment income for federal income tax purposes include net realized gains on foreign currency transactions. These book/tax differences are either temporary or permanent in nature.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

To the extent these differences are permanent, adjustments are made to the appropriate capital accounts in the period when the differences arise. Permanent differences were primarily due to net operating losses. These reclassifications have no impact on the NAV of the Fund. These reclassifications have no impact on the NAV of the Fund. For the year ended December 31, 2018, reclassifications were made to decrease paid-in capital by \$116,318, with an offsetting adjustment to total distributable earnings.

The tax character of distributions paid during the years ended December 31, 2018 and 2017 was as follows:

	<u>Year Ended</u> <u>December 31, 2018</u>	<u>Year Ended</u> <u>December 31, 2017</u>
Distributions paid from:		
Net long term capital gains	\$6,683,193	\$2,715,285
Return of capital	—	10,148
Total distributions paid	<u>\$6,683,193</u>	<u>\$2,725,433</u>

Provision for Income Taxes. The Fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). It is the policy of the Fund to comply with the requirements of the Code applicable to regulated investment companies and to distribute substantially all of its net investment company taxable income and net capital gains. Therefore, no provision for federal income taxes is required.

At December 31, 2018, the components of accumulated earnings/losses on a tax basis were as follows:

Net unrealized appreciation on investments and foreign currency translations	<u>\$24,258,791</u>
Total	<u>\$24,258,791</u>

The Fund is permitted to carry capital losses forward for an unlimited period. Capital losses that are carried forward will retain their character as either short term or long term capital losses.

At December 31, 2018, the temporary differences between book basis and tax basis net unrealized appreciation on investments were due to deferral of losses from wash sales for tax purposes, mark-to-market adjustments on investments no longer considered a passive foreign investment company and basis adjustments for litigation gains.

The following summarizes the tax cost of investments and the related net unrealized appreciation at December 31, 2018:

	<u>Cost</u>	<u>Gross</u> <u>Unrealized</u> <u>Appreciation</u>	<u>Gross</u> <u>Unrealized</u> <u>Depreciation</u>	<u>Net Unrealized</u> <u>Appreciation</u>
Investments	\$61,219,049	\$26,718,365	\$(2,458,645)	\$24,259,720

The Fund is required to evaluate tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Fund as tax expense in the Statement of Operations if the tax positions were deemed not to meet the more-likely-than-not threshold. During the year ended December 31, 2018, the Fund did not incur any income tax, interest, or penalties. As of December 31, 2018, the Adviser has reviewed all open tax years and concluded that there was no impact to the Fund's net assets or results of operations. The Fund's federal and state tax returns for

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

the prior three fiscal years remain open, subject to examination. On an ongoing basis, the Adviser will monitor the Fund's tax positions to determine if adjustments to this conclusion are necessary.

3. Investment Advisory Agreement and Other Transactions. The Fund has entered into an investment advisory agreement (the Advisory Agreement) with the Adviser which provides that the Fund will pay the Adviser a fee, computed daily and paid monthly, at the annual rate of 1.00% of the value of its average daily net assets. In accordance with the Advisory Agreement, the Adviser provides a continuous investment program for the Fund's portfolio, oversees the administration of all aspects of the Fund's business and affairs, and pays the compensation of all Officers and Directors of the Fund who are affiliated persons of the Adviser.

The Adviser has contractually agreed to waive its investment advisory fee and/or reimburse expenses of Class I Shares to the extent necessary to maintain the total operating expenses (excluding brokerage, acquired fund fees and expenses, interest, taxes, and extraordinary expenses) until at least April 30, 2020 at no more than 1.00% of the value of its average daily net assets. Effective June 1, 2018, the Adviser amended its contractual agreement with respect to Class AAA, A, and C shares to waive its investment advisory fees and/or to reimburse expenses to the extent necessary to maintain the annualized total operating expenses of the Fund (excluding brokerage costs, acquired fund fees and expenses, interest, taxes, and extraordinary expenses) until at least April 30, 2020, at no more than 1.25%, 1.25%, and 2.00% of the value of the Fund's average daily net assets for Class AAA, Class A, and Class C, respectively. This arrangement is in effect through April 30, 2020. For the year ended December 31, 2018, the Adviser reimbursed the Fund in the amount of \$261,050. In addition, the Fund has agreed, during the two year period following any waiver or reimbursement by the Adviser, to repay such amount to the extent, that after giving effect to the repayment, such adjusted annualized total operating expenses of the Fund would not exceed the foregoing expense limitations of the value of the Fund's average daily net assets for Class AAA, Class A, Class C, and Class I Shares. The agreement is renewable annually. At December 31, 2018, the cumulative amount which the Fund may repay the Adviser, subject to the terms above, is \$280,516:

For the year ended December 31, 2017, expiring December 31, 2019	\$ 19,466
For the year ended December 31, 2018, expiring December 31, 2020	<u>261,050</u>
	<u>\$280,516</u>

The Corporation pays each Director who is not considered to be an affiliated person an annual retainer of \$6,000 plus \$1,000 for each Board meeting attended and they are reimbursed for any out of pocket expenses incurred in attending meetings. All Board committee members receive \$1,000 per meeting attended. The Chairman of the Audit Committee receives an annual fee of \$3,000, and the Lead Director receives an annual fee of \$2,000. A Director may receive a single meeting fee, allocated among the participating funds, for attending certain meetings held on behalf of multiple funds. Directors who are directors or employees of the Adviser or an affiliated company receive no compensation or expense reimbursement from the Corporation.

4. Distribution Plan. The Fund's Board has adopted a distribution plan (the Plan) for each class of shares, except for Class I Shares, pursuant to Rule 12b-1 under the 1940 Act. Under the Class AAA, Class A, and Class C Share Plans, payments are authorized to G.distributors, LLC (the Distributor), an affiliate of the Adviser, at annual rates of 0.25%, 0.25%, and 1.00%, respectively, of the average daily net assets of those classes, the annual limitations under each Plan. Such payments are accrued daily and paid monthly.

The GAMCO Global Growth Fund

Notes to Financial Statements (Continued)

5. Portfolio Securities. Purchases and sales of securities during the year ended December 31, 2018, other than short term securities and U.S. Government obligations, aggregated \$54,908,890 and \$55,232,701, respectively.

6. Transactions with Affiliates and Other Arrangements. During the year ended December 31, 2018, the Fund paid brokerage commissions on security trades of \$60 to G.research, LLC, an affiliate of the Adviser. Additionally, the Distributor retained a total of \$4,878 from investors representing commissions (sales charges and underwriting fees) on sales and redemptions of Fund shares.

The Fund received credits from a designated broker who agreed to pay certain Fund operating expenses. The amount of such expenses paid through this directed brokerage arrangement during this period was \$1,922.

The cost of calculating the Fund's NAV per share is a Fund expense pursuant to the Advisory Agreement. During the year ended December 31, 2018, the Fund accrued \$45,000 in accounting fees in the Statement of Operations.

7. Line of Credit. The Fund participates in an unsecured line of credit which expires on March 6, 2019 and may be renewed annually, of up to \$75,000,000 under which it may borrow up to 10% of its net assets from the custodian for temporary borrowing purposes. Borrowings under this arrangement bear interest at a floating rate equal to the higher of the overnight Federal Funds rate plus 125 basis points or the 30 day ICE LIBOR plus 125 basis points in effect on that day. This amount, if any, would be included in "Interest expense" in the Statement of Operations. At December 31, 2018, there were no borrowings outstanding under the line of credit.

The average daily amount of borrowings outstanding under the line of credit during the year ended December 31, 2018 was \$29,584, with a weighted average interest rate of 3.57%. The maximum amount borrowed at any time during the year ended December 31, 2018 was \$2,017,000.

8. Capital Stock. The Fund offers four classes of shares – Class AAA Shares, Class A Shares, Class C Shares, and Class I Shares. Class AAA and Class I Shares are offered without a sales charge. Class A Shares are subject to a maximum front-end sales charge of 5.75%, and Class C Shares are subject to a 1.00% contingent deferred sales charge for one year after purchase.

The Fund imposes a redemption fee of 2.00% on all classes of shares that are redeemed or exchanged on or before the seventh day after the date of a purchase. The redemption fee is deducted from the proceeds otherwise payable to the redeeming shareholders and is retained by the Fund as an increase in paid-in capital. The redemption fees retained by the Fund during the years ended December 31, 2018 and 2017, if any, can be found in the Statement of Changes in Net Assets under Redemption Fees.

9. Indemnifications. The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

10. Subsequent Events. Management has evaluated the impact on the Fund of all subsequent events occurring through the date the financial statements were issued and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

The GAMCO Global Growth Fund

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of
The GAMCO Global Growth Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of The GAMCO Global Growth Fund (the “Fund”) (one of the funds constituting GAMCO Global Series Funds, Inc. (the “Corporation”)), including the schedule of investments, as of December 31, 2018, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund (one of the funds constituting GAMCO Global Series Funds, Inc.) at December 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Corporation’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Corporation is not required to have, nor were we engaged to perform, an audit of the Corporation’s internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Corporation’s internal control over financial reporting. Accordingly, we express no such opinion

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018, by correspondence with the custodian. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst + Young LLP

We have served as the auditor of one or more Gabelli/GAMCO Funds investment companies since 1992.

The GAMCO Global Growth Fund

Board Consideration and Re-Approval of Investment Advisory Agreement (Unaudited)

During the six months ended December 31, 2018, the Board of Directors of the Corporation approved the continuation of the investment advisory agreement with the Adviser for the Fund on the basis of the recommendation by the directors (the Independent Board Members) who are not interested persons of the Fund. The following paragraphs summarize the material information and factors considered by the Independent Board Members as well as their conclusions relative to such factors.

Nature, Extent, and Quality of Services. The Independent Board Members considered information regarding the Fund's portfolio managers, the depth of the analyst pool available to the Adviser and the portfolio managers, the scope of supervisory, administrative, shareholder, and other services supervised or provided by the Adviser and the absence of significant service problems reported to the Board. The Independent Board Members noted the experience, length of service, and reputation of the Fund's portfolio managers.

Investment Performance. The Independent Board Members reviewed the short, medium, and long term performance of the Fund (as of September 30, 2018) against a peer group of seven other comparable funds prepared by the Adviser (the Adviser Peer Group), and against a peer group prepared by Broadridge (the Broadridge Performance Peer Group) consisting of all retail and institutional global large cap growth funds, regardless of asset size or primary channel of distribution, as represented by the Lipper Global Large-Cap Growth Index. The Independent Board Members noted that the Fund's performance was in the first (highest) quartile for the one, three, and five year periods, as measured against the Adviser Peer Group. Against the Broadridge Performance Peer Group, the Independent Board Members noted that the Fund's performance was in the fifth quintile for the one year period, the second quintile for the three year period, and the first quintile for the five year period.

Profitability. The Independent Board Members reviewed summary data regarding the profitability of the Fund to the Adviser both with a pro rata administrative overhead charge and with a stand alone administrative charge. The Independent Board Members also noted that a portion of the Fund's portfolio transactions were executed by an affiliated broker of the Adviser and that another affiliated broker of the Adviser received distribution fees and minor amounts of sales commissions.

Economies of Scale. The Independent Board Members discussed the major elements of the Adviser's cost structure, the relationship of those elements to potential economies of scale and reviewed data provided by the Adviser.

Sharing of Economies of Scale. The Independent Board Members noted that the investment management fee schedule for the Fund does not take into account any potential economies of scale that may develop.

Service and Cost Comparisons. The Independent Board Members compared the expense ratios of the investment management fee, other expenses, and total expenses of the Fund with similar expense ratios of the Adviser Peer Group and a peer group of seven other global large cap growth funds selected by Broadridge, and noted that the Adviser's management fee includes substantially all administrative services of the Fund as well as investment advisory services. The Independent Board Members noted that the Fund's total expense ratio was the highest of both peer groups, but that the Fund's size was below average within each peer group. The Independent Board Members also noted that the advisory fee structure was the same as that in effect for most of the Gabelli funds. The Independent Board Members were presented with, but did not consider to be material to their decision, various information comparing the advisory fee with the fee for other types of accounts managed by the Adviser.

The GAMCO Global Growth Fund

Board Consideration and Re-Approval of Investment Advisory Agreement (Unaudited) (Continued)

Conclusions. The Independent Board Members concluded that the Fund enjoyed highly experienced portfolio management services and good ancillary services and an acceptable performance record. The Independent Board Members also concluded that the Fund's expense ratios and the profitability to the Adviser of managing the Fund were reasonable, and that economies of scale were not a significant factor in their thinking at this time. The Independent Board Members did not view the potential profitability of ancillary services as material to their decision. On the basis of the foregoing and without assigning particular weight to any single conclusion, the Independent Board Members determined to recommend continuation of the investment management agreement to the full Board.

Based on a consideration of all these factors in their totality, the Board Members, including all of the Independent Board Members, determined that the Fund's advisory fee was fair and reasonable with respect to the quality of services provided and in light of the other factors described above that the Board deemed relevant. Accordingly, the Board Members determined to approve the continuation of the Fund's Advisory Agreement. The Board Members based their decision on evaluations of all these factors as a whole and did not consider any one factor as all-important or controlling.

The GAMCO Global Growth Fund Additional Fund Information (Unaudited)

The business and affairs of the Fund are managed under the direction of the Corporation's Board of Directors. Information pertaining to the Directors and officers of the Fund is set forth below. Portfolio Management Team Biographies

Caesar M. P. Bryan joined GAMCO Asset Management in 1994. He is a member of the global investment team of Gabelli Funds, LLC and portfolio manager of several funds within the Gabelli/GAMCO Fund Complex. Prior to joining Gabelli, Mr. Bryan was a portfolio manager at Lexington Management. He began his investment career at Samuel Montagu Company, the London based merchant bank. Mr. Bryan graduated from the University of Southampton in England with a Bachelor of Law and is a member of the English Bar.

Howard F. Ward, CFA, joined Gabelli Funds in 1995 and currently serves as GAMCO's Chief Investment Officer of Growth Equities as well as a Gabelli Funds, LLC portfolio manager for several funds within the Gabelli/GAMCO Fund Complex. Prior to joining Gabelli, Mr. Ward served as Managing Director and Lead Portfolio Manager for several Scudder mutual funds. He also was an Investment Officer in the Institutional Investment Department with Brown Brothers, Harriman & Co. Mr. Ward received his BA in Economics from Northwestern University.

Christopher D. Ward, CFA, joined the GAMCO Growth Team in 2015 as Vice President and Research Analyst. Prior to joining Gabelli Funds, Mr. Ward spent five years at Morgan Stanley Private Wealth Management where he served as Director of Business Strategy for The Apollo Group. Before joining Morgan Stanley, he was with the GFI Group, Inc., a wholesale institutional brokerage firm. Mr. Ward is a Chartered Financial Analyst and a member of the New York Society of Security Analysts. He graduated from Boston College with a BA in Economics.

2018 TAX NOTICE TO SHAREHOLDERS (Unaudited)

For the year ended December 31, 2018, the Fund paid to shareholders long term capital gains totaling \$6,683,193, or the maximum allowable. The distribution of long term capital gains has been designated as a capital gain dividend by the Fund's Board of Directors.

All designations are based on financial information available as of the date of this annual report and, accordingly, are subject to change. For each item, it is the intention of the Fund to designate the maximum amount permitted under the Internal Revenue Code and the regulations thereunder.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.
